The College World

SEEING THE LIGHT

A senior at the University of Chicago entered college with one idea—to prepare himself for a business position which awaited him upon receiving his degree. He took only those studies which he thought would help him in his job. He excluded all but the barest work in literature, philosophy and kindred subjects. He laughed at all cultural studies. He went in no activities unless he thought they would be direct training in his future work. He made few friends except those who might help him later. Not only his curriculum, but his whole college course represented a case of extreme specialization.

At the end of the third quarter he woke up. He saw that he was an expert in his one narrow field but outside of that he was lost. He analyzed himself and perceived a narrow-minded individual, so narrow as to be an object of pity. And then he changed his course. He arranged his schedule so as to visit courses offered by ten of the university's biggest professors during his last quarter. He is taking every opportunity to branch out from the specialized field which chained him through most of his course.

He has seen the light.—Ohio State Lantern.

WEARS FRESHMAN CAP, ALSO VAN DYKE BEARD

That questionable quantity of college spirit has been found. John W. Bauman, freshman agriculture, of Ashland, proved that it still exists. Bauman is 27 years old and wears a Van Dyke beard. He appears to be anything but a freshman. Several times he has been given credit with being a faculty member. Yet John W. Bauman, freshman agriculture, of Ashland, wears his freshman cap with the same degree of class and college spirit as does the veriest red-cheeked lad scarce out of high school.

Bauman, who has never been in robust physical condition, has been traveling around the country since he was graduated from high school in 1910. Battle Creek, Mich.; San Diego, Cal., and other places represent the six years, interval between his high school era to his university advent.

But ever since his youth, Bauman has had the idea of becoming a farm owner. He has spent much of his time as a farm hand, and this year his desire to take a course in agriculture at Ohio State materialized.

Back to the "spirit" remark: Bauman appeared on the track yesterday if his class or his university needs him and he can give them any of his services. Bauman can be counted on. "I don't believe I'll break any records," he said yesterday, "but if I can do anything, I'll be glad to help."—Exchange.

STUDENTS ARE SPIRITUAL FORCE IN THE GREAT WAR

While the warring nations of Europe and even the United States authorities are making every effort to secure recruits for their armies, the work of obtaining volunteers for the Christian conquest of the world is steadily progressing. The recent report of the student volunteer movement shows that since its organization, thirty years ago, 6,490 students—young men and women volunteers—have gone to various mission boards of North America.

The volunteer movement employs twelve traveling secretaries, who last year made 700 visits to institutions of higher learning in the United States and Canada. This work among students not only supplies recruits for the frontier, but it also deepens the spiritual life of the schools and colleges by bringing the students into close touch with the great enterprise of world civilization.—Exchange.

WISCONSIN ADOPTS NEW FROSH FRATERNITY RULES

Madison, Wis.—Freshmen may now live at the fraternity houses after they have completed one semester of regular university work with a clean record, according to the latest ruling of the student life and interest committee of the University of Wisconsin.

Heretofore first year men have been required to complete an entire year of work before they moved into a fraternity house.

Correspondence with prospective freshmen has been freely allowed during the summer among fraternities, but all the societies have agreed not to meet the first year men at trains if they are furnished with the addresses of the freshmen. This problem has been overcome by a registration system organized by the dean of men. With the new rules in force, regular initiations will be held at the beginning of the second semester this year.—Exchange.

RECIPES FOR CANNING BEAUX

1. I am sorry to have to ask to be excused, but I must meet my mother who will arrive on the 11:40 train. If you care to go with me to the train, I will be glad to spend the early part of the evening with you at the party. (Disqualified. This is preserving, not canning).

2. I am exceedingly sorry and disappointed on account of being unable to accept, but on account of having another date, I must decline this time. (Gives good results and retains the original flavors).

3. It will be impossible for me to accept.

(Requires little time, but gives variable results, depending upon the variety and ripeness of the product you are working with).

4. I would rather be excused. (Quite satisfactory in general. If there is evidence of any working, repeat the process).

5. No. (Changes all of the sugars into acids and has been uniformly satisfactory. The cold treatment is as effective as the hot).

—Anonymous.

MAY SEND RIFLE TEAM TO FLORIDA

Efforts to send a rifle team from the University of Iowa to the national tournament to be held in Jacksonville, Fla., in October are being made by Capt. Morton C. Mumma, commandant of cadets. Captain Mumma recently conferred with Adjutant General Logan in Des Moines regarding the matter. A fund of \$1,061 is available to send a team to represent Iowa. One team will be chosen from the militia on the border and the other will be either a civilian or cadet team. All expenses of the men except their sustenance will be borne by the government.

The trip would make it necessary for the men to be away for two weeks, and it might not be possible to get them released from their regular work for that length of time.

Iowa has long had exceptionally high standing on its rifle teams. A national championship came to the team when Captain Mumma was here as commandant before and in the following years the teams have been consistently in the first rank.—Exchange.

ENGINEERS TO BE TRAINED BY MAIL AT WISCONSIN

Madison, Wis., Sept. 30.—To increase the efficiency of employees of state power plants, a plan is being formulated whereby engineers and firemen in these institutions may take a course of technical instruction by mail under the direction of the extension division of the University of Wisconsin and the civil service commission.

The plan was drawn up at a recent meeting of the state engineering department, the board of control, university and normal school officials and the civil service commission. If the plan is carried out the correspondence courses will be required of all power plant employees and the institution concerned will pay the necessary fees.

Separate courses of study will be prescribed for firemen, assistant engineers and chief engineers, each suited to the class of work and approved by the engineering department. Research work done by engineers will be put in annual reports.

Such a course will result in greater economy, increased safety and better upkeep, it is believed. It will enable employees to increase their efficiency and benefit themselves in a definite way.—Exchange.

L System Clothes

Are Designed Exclusively for Young Men

WHEN you count out minted coin for a suit or overcoat, you want something more than a protection from the weather.

L. System of Clothes will protect your reputation for knowing how to dress the part and give full expression to the best that is a young man's personality.

L System Clothes \$20, \$25, \$30

Rudge & Guenzel Co

HEALTH COURSE STARTED

A new post graduate course in public health and sanitation has been incorporated in the courses of study of the Ohio state university. The aim of the study is to prepare young men and women for public-health work in Ohio and elsewhere; to fit them to occupy positions as health officers, members of boards of health, secretaries, agents, or inspectors of health organizations, either official or voluntary. To do this, it is planned to give a groundwork of sanitary knowledge by instruction in the laboratories and by lectures.—Exchange.

ENGINEERS OPEN CLUBHOUSE

Students in the college of engineering at the University of Wisconsin have organized a boarding and lodging club and have rented a club house with rooms for eighteen and boarding accommodations for many more. The house will be called the Engineers' Lodge, and will be managed by upperclassmen in engineering.—Exchange.

HEADS BASKETBALL LEAGUE

Ewald O. Stiehm, a graduate of the University of Wisconsin with the class of 1909, was elected president of the

western conference basketball association at the recent annual meeting. Mr. Stiehm has been head coach at the University of Nebraska since his graduation from Wisconsin, and is now director of athletics at the University of Indiana.—Exchange.

WILL CELEBRATE ANNIVERSARY

Chicago university will soon celebrate its twenty-fifth anniversary. During its history, fifty buildings have been erected, more than fifty thousand students have matriculated and over seven thousand degrees have been conferred.—Exchange.

QUEAR WRITES A MANUAL

A laboratory manual entitled "Sixty-

two Experiments in Crops," is just off the press. The book is written by Charles L. Quear, assistant to President H. J. Waters.

The text is designed for field work in agriculture for the upper grammar grades and beginning high school.—Exchange.

WOMEN ESTIMATE LIVING COST

A class of sixty girls in home economics at the University of Wisconsin recently estimated that a couple should be able to live comfortably on \$500 a year. Most of the girls figured also that a young man should have saved at least \$300 and own a house and lot before getting married.—Exchange.
