FARM CAMPUS PAGE

BIG TIME PLANNED FOR FARMER'S FAIR

GOOD OLD-FASHIONED GAMES AND BIG PARADE FEATURE "AG" DAY MAY 11

A parade in the morning, a free program in the afternoon and a big dance in the evening will be the main attraction at the second annual Farmer's Fair to be held at the college of agriculture May 11.

Floats representing every department in the college, pure bred stock, bands, clowns and cadets will make up the parade.

The afternoon's program will consist of potato races, a ball game, a greased pig contest, a big vaudeville show, side shows and various other attractions. The dance and a vaudeville show are the features of the evening. All the shows and concessions of the afternoon's program will also be open.

Hot lunches, hamburgers, home-made candy and cider will be served by the Home Economics club, which is working with the agricultural club for this event.

Arthur Ingersol, '17, G. A. Blotz, '17, and R. J. Novotony, '18, compose the general committee at the head of the fair.

Last year was the first time a fair of this kind was attempted at Nebraska. A similar day is held at Iowa and Missouri agricultural colleges.

"AG" SCHOOL EXERCISES OF GRADUATION BEGIN TODAY—ADDRESS FRIDAY

The School of agriculture will hold its commencement exercises Friday evening at 8 o'clock in the Temple theatre. Dean H. L. Russell of the University of Wisconsin will deliver the address to the seventy-five graduates.

Some of the class exercises will be held on the Farm campus today and the annual features of the commencement week will be given tomorrow afternoon.

Competitive drill for school company and also for individual honors will be held this afternoon at 2:30 on the athletic field at the Farm.

Tuesday evening the seniors of the school were entertained by the juniors at a banquet held in Home Economics hall. One hundred and fifty members of the junior and senior classes and faculty members were present.

The class day program was given by the seniors yesterday afternoon in Agricultural hall.

Although the enrollment in the school of agriculture is larger than ever before the senior class is smaller.

Will Talk on Exhibit—Prof. Blanche C. Grant will speak this evening at 8:30 in the art gallery in connection with the art exhibit.

Men interested in Summer work see C. G. Amick, 545 No. 14th. T.W.T.—tf

SADDLE AND SIRLOIN CLUB HOLDS CONTEST

SIXTY MEN IN COLLEGE AND SCHOOL OF AGRICULTURE JUDGE LIVE STOCK

Some sixty men of the college and school of agriculture entered a judging contest at the State farm last Saturday under the direction of the Saddle and Sirloin club. W. E. Wiedeberg, D. E. Walrath, '18, Ira Hepperly, '18, O. L. Webb, and E. H. Larson, '20, won first, second, third, fourth, and fifth places respectively. The contest consisted of the placing of twelve classes, three classes each of horses, sheep, cattle and hogs.

Silver cups were the prizes for the five places. Medals and ribbons were awarded to men placing highest in each class.

The Saddle and Sirloin club was organized recently by juniors and seniors in the animal husbandry department, for the purpose of working towards the advancement of the live stock industry in Nebraska. The officers of the organization are M. B. Posson, '18, president; Charles Kellogg, '17, vice president; Elliott R. Davis, sp. secretary, and Leslie Wilson, '18, treasurer. The contest was the first attempted by the club.

Professor Kennedy of Iowa State Agriculture college, Ames, Professor Gramlich, Professor Pier, and Professor Jenkins judged the contest.

ISSUE ADVICE ON SPUD PLANTING

HORTICULTURAL DEPARTMENT IS INSTRUCTING PLANTERS IN GROWING PRICELESS PRODUCT

As the time for potato planting is now at hand, the department of horticulture, college of agriculture, has given out a few suggestions that will prove valuable to the gardener.

The best type of soil for the potato is moderately retentive, ranging from a loam to a sandy loam. For the potato a fertilizer carrying 3 or 4 per cent of nitrogen, from 6 to 8 per cent of phosphoric acid and 8 to 10 per cent of potash is the usual combination. Farm yard manure, if applied at the time of planting seems to have the effect of increasing the prevalence of scab, and for this reason its use has been discouraged.

Potatoes should be planted at intervals of 9 to 15 inches in rows about 30 inches apart. The depth of planting should vary with the season and the character of the soil, and should range from three to five inches. On very heavy retentive soils three inches is sufficiently deep, while on light and looser soils 4 to 5 inches is not too deep.

Good seed is the most important single item in potato culture. For central and southern Nebraska, home-grown potatoes are not satisfactory for seed unless special methods are employed in their production. In these sections of the state northern grown seed potatoes should be

planted. Such seed usually costs about 25 per cent more than home grown seed, but the increase in yield makes it worth fully 100 per cent more than home-grown seed, according to the department of horticulture.

Whatever the source of seed potatoes, nothing but smooth, firm, sound tubers should be planted. At the experiment station such seed has yielded 60 per cent more than elongated, knotty tubers of the same stock. Wilted or sprouted seed tubers produce weaker plants and poorer yields than the tubers that have been kept in good condition. The seed should be cut into pieces having at least two eyes each, to which a considerable portion of the stored starchy material adheres. Different growers have different methods but this is considered a safe plan to follow.

The seed potatoes, uncut, should

be soaked in corrosive sublimate solution, 2 ounces of corrosive sublimate to 16 gallons of water, for one and one-half to two hours, for the control of potato scab, a fungus disease of the potato.

NUBBINS

J. T. Johnson, '18, is quarantined with scarlet fever.

Fifteen students in the animal husbandry department will go to Avoca, Union and Plattsmouth Saturday on

a judging trip. Prof. H. G. Gramlich will accompany them.

B. J. Novotony, '17, has returned from Crete, where he attended the funeral of an uncle.

Prof. M. E. Dickson of the poultry department talked at Cook Tuesday evening.

The department of horticulture is sending out a circular letter to fruit growers of the state on spraying.

Professors Pier and Jenkins and seniors in the animal husbandry department will give a sheep demon-
