**TACTICS OF AUSTRIAN GOVERNMENT DENOUNCED**  
 (Continued from page one.)

print. It is said," he added, "that Germany and Austria are none. They are and we all know which one."

**No People's Choice**  
 "Not a single step connected with this war received the sanction of a representative body of Austrian people," Professor Shimek pointed out. "There was not a meeting of parliament to decide if war should be declared. It was all done by a meeting of a few men in Vienna. These few men drove millions of men into the battle fields. There is no government in Europe more autocratic than the Austrian. They call it a constitutional monarchy, but the ruler has the power and he has used it often to suspend the constitution whenever he wants to. Austria is as autocratic as Turkey."

"My own father was a prisoner sev-

eral times—he loved good literature and was loyal to his own people," Professor Shimek said. "His lands were confiscated and he would have been executed if the authorities had been able to catch him."

**Bohemians Loyal**  
 The Bohemians may be counted on for support to the very end, the speaker asserted. Many of them went to Canada to enlist before the United States entered the war.

Professor Shimek expressed strong disapproval of people who are inclined to argue about the war. "There is just one side of this question, and that is our side," he declared and the audience applauded.

"I have no use for the pacifist either," he said. "The pacifist is

either a dreamer who is content to accept privileges yet who refuses to accept the responsibilities that go with these privileges, or he is a traitor or he is a coward hiding behind pacifism."

**Attacks German Universities**  
 Professor Shimek asserted that the German universities have been the greatest tool for the German aristocracy in spreading its philosophy and influence over the world. "German philosophy develops a cold-blooded materialism," he said.

In conclusion Professor Shimek pointed out some of the compensations which are resulting from the war. "Social caste is being done away with," he said. "In the Red Cross rooms the women whose hands are

unaccustomed to work, labor by the side of the maid who served her.

"Such sorrows as are coming will result in the welding of our people into one great united nation," he concluded, "where men are not judged by the nationality of their fathers, but by their own merits."

**ACHIEVEMENT**

Twenty-five years ago the General Electric Company was founded. It has set free the spirit of research. Since then, electricity has sent its thrill through the whole structure of life. It has given tangible form to invention, in apparatus of infinite precision and gigantic power. Eager to turn wheels, to lift and carry, to banish dark, to gather heat, to hurl voices and thoughts across space, to give the world new tools for its work—electricity has bent to man's will. And it has gone forth, co-operating with every industry, to command this unseen force and fetch it far to serve all people. Throughout this period the General Electric Company has held the great responsibilities and high ideals of leadership. By the achievements which this company has already recorded may best be judged the greater ends its future shall attain, the deeper mysteries it yet shall solve in electrifying more and more of the world's work.
