

**DRAFTED MEN MAY STILL ENTER NAVY**

Local Office Ordered to Accept Low Numbered

**PLACES MEN IN CLASS V**

Mechanics, Wire or Canvass Workers, Wood Workers, Engine Experts and Carpenters in Demand

Word has been received from the naval recruiting office at Omaha that men of draft age whose draft number is so low that they will not be needed in the current quota, may still enlist in the navy. The department is still in need of men, especially, men with any kind of mechanical training, and all such men are urged by the department to enlist at once.

The following advice has been received by the local exemption boards. "Upon presentation to a recruiting officer of a certificate by his local board to the effect that his class and order number are so low that he is not within the current quota of his local board, any registrant may enlist voluntarily in the navy or in the marine corps and thereafter, upon presentation by the registrant to his local board of a certificate of a commissioned officer of the navy or marine corps stating that he has been so enlisted, such certificate shall be filed with the Questionnaire and the registrant shall be placed in Class V on the ground that he is in the naval service of the United States."

**The Letter Received**

A letter received at the local naval recruiting office is here quoted for the information of University men who are of draft age:  
U. S. NAVY RECRUITING STATION  
Paxton Bldg., 16th and Farnam Sts.  
Omaha, Nebr.

December 18th, 1917.

"1. It is just as easy for men who is registered for the draft to enlist in the navy now as it was before December 15th. A wrong impression has spread throughout this district that enlistments stopped December 15th. That evidently was caused by the army stopping its recruiting. The navy is still in need of men, especially men with any kind of mechanical training or tendencies.

"2. The one main thing to remember in registered men's cases is that they must have a statement from their draft board showing that their class and order number is so low that they will not be needed in the current quota. A sample statement follows:

"John Jones whose class and order number is so low that he will not be needed in the current quota is therefore free to enlist in the navy. Signed by all members of the board."

"If it is impossible for these men to get the signatures of all the members, the chairman will suffice.

Any man who through owning an automobile and taking care of it himself shows a tendency of making a good mechanic; or any man who has worked with wire or canvass, or any kind of a wood worker and acetylene welder is badly needed as a landman for quartermaster in the navy. Good gas engine mechanics are needed as machinists' mates (aviation). Carpenters, blacksmiths and others also are needed.

"For the present, men are being sent back to their homes on government transportation, both ways, for an indefinite period to await call. As this is highly satisfactory with most of them it can be used as an inducement to get them to enlist.

**Military Department Announces Extra Drill**

The Military department has announced that it will give extra drill for those, both connected with the department, and others who are preparing to go into the army. Tuesday evening fifty-four men reported, a large number of them being privates in the regular cadet regiment. There is no extra credit in school given for this work, but the response is highly gratifying.

**Teachers Withdraw to Replace Men in Service**

A large number of juniors and seniors from the Teachers' college are planning to temporarily discontinue their school work and go out and teach in the places of high school principals and supervisors who have been called to the colors. These students will teach during the remainder of the school year, and will finish their year's school work in the summer session. The school at present has a request for a student to take the position of supervisor of practice in a neighboring school, at a salary of \$2,000 a year.
