

MAKING OF AN AIRMAN
(Continued from page three)

spirit level. It is necessary to set it in motion in order to see how quickly it recovers equilibrium, and consequently how strong the candidate is in this respect. One should not be the least surprised therefore when he is placed in a revolving chair and spun rapidly around, now sitting forward, now back, and asked upon stopping to point in a certain direction or execute some other motions. Nor should he be surprised if everything he does appears to him to be done wrong.

But the medical test is soon over, and if the candidate passes, he may be pretty sure that he is physically perfect. He then goes on to a mental examination which also sounds formidable, but which is in reality and of necessity brief. A few questions are asked as to the candidate's career perhaps, but if he has had college training he need not fear the outcome.

If the candidate is one of the three who pass both tests, as he should be with his advantages, he is notified that he is accepted for training for the air service as a member of the Signal Enlisted Reserve Corps. Then just as soon as the preceding classes move up, he is ordered into active service.

From that moment until he receives his commission as an aviator or is discharged, he is known as an aviation cadet, with the rank of private, first class, a salary of \$100 a month, 60 cents food allowance daily, living quarters, uniform and all traveling expenses, including the trip to the place where he is ordered to report provided by the government.

In that status he goes through the ground school and the flying school until he has qualified as a reserve military aviator. Thereupon he is given his first commission, a second lieutenant, with a salary of \$1,700, quarters provided by the government, but food at about \$1 per day and uniform provided by himself. While on flying duty he receives 25 per cent increase, and while on foreign duty an additional 10 per cent increase.

Then after passing his final tests and becoming a junior military aviator, he automatically advances one grade in rank, in salary, and in allowance. A second lieutenant, therefore, by the time he is fully trained, becomes a first lieutenant, with a base salary of \$2,000. Further, however, as a junior military aviator he now receives 50 per cent increase on his base pay while on flying duty, and another 10 per cent while on duty abroad.

UNIVERSITY NOTICES

Physiology

Dr. R. A. Lyman announces that the notebooks in Physiology 4 can be had now at his office.

Peru Club

The Peru club will meet with W. K. Fowler at 1835 South Twenty-sixth street, Friday evening, February 16.

Junior Debate

Any junior wishing to try out for class debating team please leave name with George Driver at once. Phone B-1778.

Senior Debates

Seniors wishing to try out for the class debates will please leave names with G. V. Lundmark. Call L-7505. Women as well as men are eligible.

Omicron Nu

filled by election last year but all the men selected are now in the army. Harvey Nelson was basketball captain-elect, "Squirt" Owen was the track captain and Rudolph Fuchs was chosen to lead the wrestlers.

For Sale—Regulation made olive drab overcoat, full length, made of good material and worn very little; size 38 or 40. 3t

TYLER AND ST. CLAIR—ORPHEUM TODAY

The first thing that happens at the Orpheum this week is a xylophon. It is a big xylophon—big enough for two people to play it. The remarkable part of the performance is that they do not play the William Tell overture. —Denr Post.—Adv.

THE UKULELE

THE languorous charm of the Hawaiian native instruments—so moving in appeal, so observably in vogue—is strikingly characteristic of the Ukulele. Its tone possesses that curiously beautiful timbre, that exotic charm of tonal quality which has made these instruments so sensationally popular.

The Ukulele has a pleasing grace of form. The finer models are made of genuine Hawaiian Koa wood. It is much in request today among the smarter college and other musical organizations.

It is easy to learn. Its price includes an Instruction Book.

Hawaiian Steel Guitar

Every chord struck upon this typically representative Hawaiian instrument is marked by a weird, plaintive harmony and strangely beautiful qualities of tone. It brings, to any music, qualities full of vivid color and varied charm.

Price \$8.00 and upwards, including Steel and Set of Three Tuners for playing, and Instruction Book.

Catalog on application.

Lyon & Healy "Washburn" Ukuleles, \$15.00; Leonardo Nunes genuine Hawaiian make, \$7.50; Mauna Loa brand, \$4. May be had of 12,000 leading music dealers. Write for name of the nearest dealer.

ACHIEVEMENT

Twenty-five years ago the General Electric Company was founded.

Since then, electricity has sent its thrill through the whole structure of life.

Eager to turn wheels, to lift and carry, to banish dark, to gather heat, to hurl voices and thoughts across space, to give the world new tools for its work—electricity has bent to man's will.

Throughout this period the General Electric Company has held the great responsibilities and high ideals of leadership.

It has set free the spirit of research.

It has given tangible form to invention, in apparatus of infinite precision and gigantic power.

And it has gone forth, co-operating with every industry, to command this unseen force and fetch it far to serve all people.

By the achievements which this company has already recorded may best be judged the greater ends its future shall attain, the deeper mysteries it yet shall solve in electrifying more and more of the world's work.

GENERAL ELECTRIC COMPANY
