Every year at this time several theorems in which new students may find helpful guidance are usually set forth by those who have been through the mill. Chief in importance among these valuable maxims is the one, "To keep up, is easier than to catch up." If there is, any one pitfall against which new students should be warned at this time it is that of allowing back-work to accumulate.

This year in particular, with class work disorganized; some classes not being held and some being held only part time, the temptation to sluff is particularly great and at the same time particularly dangerous. The time will come all too soon when the student who has allowed his work to pile up will find himself lost in the mass ahead of him. The work of each day will be unintelligible if the foundation has not been laid and every day will see him farther behind. The man who has finished his work as it has been assigned has only the present to care for.

Whether or not there is truth in the old statement that an instructor grades his students for the first six weeks and then throws his grade book away, it is certain that he is able to judge from the first few weeks work what will be the student's record for the year.

Coincident with the announcement of class elections to be held October 8, little groups on the campus began gradually to change their topics of conversation from training corps to politics. Especially was this true with the upperclassmen. Even the Kaiser cannot restrain the veterans of many campaigns from sniffing the air at the prospect of annexing a few more scalps for their belt.

To some, it may seem that politics should be abandoned this year for the more serious business of the war, but good, clean and open campaigning for the support of eligible candidates still has its merits and benefits and should remain a part of the University traditions insofar as it does not interfere with the military program.

As yet, it is difficult to determine just what duties will be placed upon the shoulders of the various class officers, but it is certain that, whatever they may be, they should be performed with care and efficiency. Men or women of especial ability should be selected and it is to be hoped that a goodly number of such candidates will file with the registrar before ballots are closed.

To many of the freshmen who are entering the University this year, the game of politics as played on the campus, may seem complex and obscure and a thing of little importance. The benefits which one derives, however, from the mingling with his fellow students, exchanging ideas and attempting to organize are some of the greatest that are received in the University and the excellent opportunity for these things, afforded by political campaigning, should not be overlooked. Freshmen should fall in line with the spirit of things; learn all they can of the methods of campaigning; pick out a man for their class president whom they feel will prove

a worthy guardian of their affairs and then support him with vim.

The death of David Dean Barrett should be sufficient warning to every student in the University to take every precaution possible against the spread of the Spanish influenza. In another part of The Nebraskan five rules for safeguarding the University from the disease have been printed and should be carefully read and followed to the letter.

Particular care should be exercised by fraternities and sororities in keeping the disease from spreading and every suspicious case should be reported to Dean Engberg immediately. Do not wait until you are sick but at the first symptoms of fever, cold, or sore throat report to one of the medical officers mentioned in the order. Guard against spread of the disease by refraining coughing or sneezing in public places.

The Spanish influenza is extremely virulent and when once started is very difficult to control. In Boston last week the total of victims mounted to over the four hundred mark and in many other cities and army camps the number of deaths has been high. Once the disease gets a start at the University of Nebraska it may be necessary to quarantine the entire school and delay the government program. Every student should consider it his personal duty to take every precaution for himself and to report every case of which he hears.

SIXTY-EIGHT LINCOLN MEN ACCEPTED AT UNIVERSITY

Local Boards Are Notified of Induction Into S. A. T. C. Service

S. A. T. C. officials notified the two Lincoln draft boards Monday morning that sixty-eight registrants from Lincoln have been accepted and will be inducted immediately into the service. The local boards relinquish all claims on the men as soon as they are accepted at the University. Some men have received and returned their questionnaires already, but all will receive them in time and must fill them out regardless of whether the registrants are in the service already or not.

Twenty-nine men are from Division No. 1, and thirty-nine are from Division No. 2. Following are the lists:

CORNELL ARENDT DIES VICTIM OF PNEUMONIA

Cornell Arendt, former student of University of Nebraska, died a victim of pneumonia at Garden City hospital, New York, Sunday, September 29. Arendt attended the University a year and was a member of the Kappa Sigma fraternity.

He joined the aviation branch of the army last fall and was sent to Brooks Field, Texas, in December, where he was given a period of training as aviator. He remained at that place until recently when he was taken ill and removed to Garden City hospital where he succumbed to the illness. His home was in Lincoln.

Stick to Your Trench

Remember, you've got to stick to your trench—  
 Yes, stick like glue to your trench.  
 You dig while it's dark, and you work while it's light,  
 And then there's the "listening post" at night.  
 Though you're soaked to the skin and chilled to the bone;  
 Though your hands are like ice, and your feet like stone;  
 Though your watch is long, and your rest is brief,  
 And you pray like hell for the next relief;  
 Though the wind may howl, and the rain may drench,  
 Remember you've got to stick to your trench—  
 Yes, stick like mud to your trench.

Perhaps a bullet may find its mark,  
 And then there's a funeral after dark;  
 And you say, as you lay him beneath the sod,  
 A sportsman's soul has gone to his God.  
 Behind the trench, in the open ground,  
 There's a little cross and a little mound;  
 And if at your heart-strings you feel a wrench,  
 Remember, he died for his blooming trench—  
 Yes, he died like a man for his trench.

There's a rush and a dash, and they're at your wire,  
 And you open the hell of a rapid fire;  
 The Maxims rattle, the rifles flash,  
 And the bombs explode with a sickening crash.  
 You give them lead, and you give them steel,  
 'Til at last they waver, and turn, and reel.  
 You've done your job—there was never a blench  
 You've given them Hell, and you've saved your trench;  
 BY GOD YOU'VE STUCK TO YOUR TRENCH!

CAPT. C. W. BLACKALL  
 (Fighting in France.)

We too can and will play the game. WE will stick to our trenches--ours can't be mentioned in the same breath with theirs but ours are not always Paradise. We can save till it HURTS to help these fighting men, and not one day or week, but every day till the war is won, and they come home to the greatest welcome humans ever got. Then they can look us in the eye and say, "By God, you've stuck to your Trench!"
