

**HAND GRENADES**

**"LET YOUR CONSCIENCE BE YOUR GUIDE"**

Yesterday you were stunned to hear that today you would be forced to endure a quiz in history. As you had been too busy for the last few weeks, to worry about such trifles as history, you decided that it was absolutely imperative that you call off your date for the movies, and spend the evening in the pursuit of knowledge—"School of many cares is made"—quoted from an epic by Gayle Vincent Grubb—see Daily Nebraskan for November 11, 1918.

In accordance with the foregoing decision, you retired to your room immediately after dinner and commenced the perusal of "many a quaint and curious volume of forgotten lore." You had scarcely finished reading the first page, when two of the girls came in, and after conversing with you for nearly ten minutes, imparted the real object of their visit, namely, to borrow your hat and new fur neck-piece.

Again you studied. Why, WHY, did the girl in the next room play the ukulele so steadily? You darted in her abode to see the cause of the celestial strains. There you found the whole gang making inroads on a great chocolate cake! Did you linger! Well, you are but human—nearly an hour wasted.

Again you studied. Nearly five minutes passed before your next interruption. One of the girls came in to borrow your Lit.—the Lit. book, certainly not your paper! While she was still shuffling around in your note book, you were called to the telephone. Of course you had to stop in Claribel's room on your return from the telephone booth, but you stayed only long enough to tell her that you had just been talking to Archie, and that you were going to the junior prom with him.

Again you studied, but not for long. Your room-mate came home, and for fifteen minutes you had to listen to her raptures about the lieutenant with whom she had been dating—the fact that all your friends are privates did not add to your enjoyment of the conversation.

Again you studied. Why were you so sleepy? You simply could not get anything out of those boring books. You remembered having once heard that lessons could be learned by sleeping with the books under your pillow. You looked at the books—there were five, large ones which you did not believe would be very comfortable beneath your pillow. However, it was your belief that you should not let pleasure interfere with your lesson so you decided to let your subconscious mind do the work.

**NOTHIN' PTICKLER**  
By Jeff Machamer

Notice to exchange editors:

Please don't borrow from this column, we can't stand that sort of flattery.

It has been scientifically established, that a cork, when held against the bottom of a tub filled with water, will come to the surface immediately after being released. A simple way to keep the cork under water, would be to fasten a brick thereto. (The latter discovery was made last evening, by Mortimer Spoofofus, of the college of science.)

Just because the sun seems to touch the earth when it sets, don't think it hits anybody.

From a "dummy" news story, written by a member of the class in Journalism:

"—the wheel was blown from the freight car and it went through the wall of the Lincoln hotel. The wall didn't terminate its flight and the wheel continued through more walls until it dropped through a ceiling and lit on one of the eggs and demolished it. A piece of the shell landed in a cup of coffee and the drinker strangled to death."

Speaking of calls; when you're down by the river, drop in!

At last comes the underlying reason for the scarcity of cloth around and immediately below the waist line of a sailor's jeans. It follows:

When the first pair of sailor's trousers were made, the machinery employed thereon contained a flaw. There had been a rain the night before, and, due to a leak in the roof overhead, (roofs are generally "overhead") the machinery became wet. The janitor insisted on keeping a hot fire (that variety of janitor's now extinct) and the machine which fashioned the seat of the trousers, shrank! It was fastened to the machine on which the cuffs are made. When the first named machine shrank it pulled away from the other one and the result was a severe stretching of the cuff machine. When the trousers were finally ready-to-wear,—well—you have observed the result. So many uses have been found for the "bell" shaped effect that the flaw went unremedied.

Two heliotroped slips of forty-five were conversing in an undertone. First one: "Is my hair on straight?" Second one: "Yes!—but your teeth droop a little on the left side."

The above story is mostly "false," don't believe it.

**Women Faculty Members on Important State Committee**

Professor Minnie England, of the economics department and Professor Sarka Hrbkova, head of the department of Slavonic languages, were appointed members of a committee for the location and management of motor highways and transportation in Nebraska at a meeting of the Highways and Transportation committee, a branch of the state council of defense, Tuesday afternoon. Professor England will have charge of the publicity department and Professor Hrbkova has charge of the work among the women. Mr. George Johnson, state engineer, Mr. E. C. Hammond and Mr. W. E. Windship are the other members of the committee.

The location of several stations was made and plans were considered for the management of a system of motor trucks for short hauls.

The third assistant postmaster general says that he will use these roads entirely as post roads.

**OFFICIAL S. A. T. C. NOTICES**

(Continued from page 1)

charge of these groups, that they will be held responsible for the conduct of the groups while marching to and from study halls and during the time of study period.

Upon any further complaint of this nature, officers will be detailed to supervise the discipline of the men during study periods.

By direction of Captain Drake.  
FRANK J. O'NEIL,  
2nd Lt. Inf. U. S. A. Adjutant.  
Must Fill Out Questionnaires  
November 20, 1918.

Memorandum to Company commanders:

You are directed to again call to the attention of the men the fact that several have not yet filled out and returned their questionnaires to their local boards.

Instruct them that the previous memorandum to this effect is a military order and must be complied with. Any failure upon the part of those men who have not already filled out

and returned their questionnaires to their local boards, will result in disciplinary measures.

By direction of Captain Drake.  
FRANK J. O'NEIL,  
2nd Lt. Inf. U. S. A. Adjutant.

**TWINS CLUB SUPPORTS**

**FRENCH ORPHAN TWINS**

The University Twins club will meet at the home of Esther and Ruth Jones, 1701 L street, Saturday evening, November 23. All university Twins are urged to attend the meeting and hear the latest French letters and to complete some plans regarding the French orphan twins.

**FIRST PLATOON WINS NEW HONORS IN ANCIENT GAME**

Members of Company "C" were given a slight diversion from the usual monotony of the drill period yesterday morning. Between the periods of serious work, the boys were lined up

on the athletic field in platoon formation, where they raced through an up-to-date form of the old time game of carrying the handkerchief. With the front and rear ranks on opposite sides of the field, the white rag was carried from one side to the other with varying degrees of speed. The first platoon carried away the honors of the day, with the third closely following at their heels.

Today Companies "C" and "B" will meet in competition in the same game.

**DR. NEWHALL COMING FOR S. A. T. C. WORK**

Captain Leslie G. Drake, new commandant of the local S. A. T. C., announced last evening that he had received word from the surgeon general's office stating that Dr. Newhall would arrive at the Nebraska University November 27, for the purpose of delivering a series of lectures on the subject of personal hygiene. These lectures will be given to all the men in the S. A. T. C. and S. N. T. C. and attendance at same will be compulsory.

**THE UKULELE**

THE languorous charm of the Hawaiian native instruments—so moving in appeal, so observably in vogue—is strikingly characteristic of the Ukulele. Its tone possesses that curiously beautiful timbre, that exotic charm of tonal quality which has made these instruments so sensation-ally popular.

The Ukulele has a pleasing grace of form. The finer models are made of genuine Hawaiian Koa wood. It is much in request today among the smarter college and other musical organizations.

It is easy to learn. Its price includes an Instruction Book.

**Hawaiian Steel Guitar**

Every chord struck upon this typically representative Hawaiian instrument is marked by a weird, plaintive harmony and strangely beautiful qualities of tone. It brings, to any music, qualities full of vivid color and varied charm.

Price \$2.00 and upwards, including Steel and Set of Ten Tuning Forks for playing, and Instruction Book.

Catalogs on application.

Lyon & Healy "Washburn" Ukuleles, \$15.00; Leonardo Nunes genuine Hawaiian make, \$7.50; Mauna Loa brand, \$4. May be had of 12,000 leading music dealers. Write for name of the nearest dealer.
