BURNET PICTURES
SCENES AT FRONT
 (Continued from page 1)
 whose understanding was purified and
 refined in the heat of battle. The
 new birth of the nation came upon
 her—battlefields.
 The attendance at the Tuesday
 morning convocation was unusually
 large. Students and faculty listened
 attentively to the speakers' dramatic
 picturization of battle scenes and his
 recital of the horrors and devastation
 of the war. Dr. Burnet illustrated his
 lecture with lantern slides depicting
 actual scenes on the field. Through-
 out his talk he occupied a chair and
 read from a manuscript.
 Visit the State Farm
 Following the lecture members of
 the mission inspected the Bessey hall
 laboratories and other buildings on
 the campus in which they evinced
 much interest. They took luncheon
 at the state farm at noon and during
 the afternoon looked over the build-
 ings there and visited the classes.
 Before their departure for the east
 in the evening several informal talks
 were given by members of the visiting
 commission and by faculty members
 who escorted them on their tour of
 inspection.
 Some people act as if they had a

**R. O. T. C. UNIT TO
 BE STARTED HERE**
 (Continued from page 1)
 less appointed by the new officer in
 charge.
 To Receive Credit for Drill
 All university men are required to
 have at least two years of military
 science as an integral part of their
 curriculum. S. A. T. C. men will be
 given five hours credit for their work
 while members of the present unit,
 should they continue in the univer-
 sity.
 Influenza Retards Demobilization
 No little inconvenience is being
 caused during the demobilization by
 the large number of cases of influenza
 among the student soldiers, since the
 discharge of each individual must
 await his personal signature to a se-
 ries of papers. No man will be dis-
 charged from the army whose physical
 condition, in the opinion of army doc-

tors, is not as perfect as upon his
 induction. The physical examinations
 are very rigid, and every man must
 show himself free from disease before
 he will be given his discharge.
 Navy Physical Examinations
 Members of the S. N. T. C. were
 given physical examinations yesterday
 by naval physicians. Several men
 who have had the influenza during
 their service in the naval unit, were
 found to have defective lungs, and
 for this reason, will not be discharged
 with other members of the company.
 Demobilization Started Yesterday
 Two hundred and twenty men were
 discharged yesterday, according to the
 tabulation made at military headquar-
 ters last evening. Work did not com-
 mence yesterday morning at 7 o'clock,
 as was originally intended, because
 of the delay in the arrival of the pay
 roll, which had been deposited in a
 local bank and was not available until
 its opening hour. All of the men dis-
 charged were members of Section B,
 and the greater majority of them left
 Lincoln before evening.
 At least three hundred and fifty
 men will probably be given discharges
 today, which will practically complete
 the discharge of Section B. Com-
 pany A will be the first company in
 Section A to receive discharges, fol-
 lowed by Companies C and D, station-
 ed in the Social Science barracks. The
 farm companies will be the last to
 be released.
 Issued to All Companies
 The naval company was the only
 unit which did not receive equipment
 this week, all members of the army
 corps receiving winter clothing. Mis-
 fits of uniforms were frequent, but
 most of the men, by going through a
 series of barbers and trades with their
 fellow soldiers, were finally success-
 ful in making a fairly presentable ap-
 pearance.
