## BRIEF BITS OF NEWS

Uni Graduate to Teach English—Miss Bernice Stilgebour, who completes her course at the university this semester, has been elected to a position as English instructor at the McKinley junior high school in the city.

Former Assistant to Java—Dr. R. D. Rands, a former assistant in the botany department, has recently been appointed by the government of Holland

to investigate the disease of rubber plants in Java. In a letter under date of September 26, he wrote that he was aboard the Netherlands S. S. "Vondel" passing through the inland sea of Japan on the final lap of his journey and would arrive at Patavia about October 7. He has presumably been at his new post since then. Before he received the appointment, he was in charge of scab and other diseases of wheat in the United States department of agriculture. His address is the Institute Voor Plantenziekten, Buitenzorg, Java. His headquarters are at the Botanical gardens in Buitenzorg, which is one of the most famous gardens in the world.

Almost everyone believes in the principle of making a new start. When we fail we comfort ourselves with the hope that we can try again. But we must not forget that in starting again one of the most important considerations is just where we should make this new start and how to begin it.

Thrift is one of the corner stones on which manhood must be constructed.

However wretched a fellow mortal may be, he is still a member of our common species.

No man has a right to do as he pleases unless he pleases to do right.
