UNI NOTICES

Open Union Meeting
University Union Society will hold an open meeting Saturday evening. New members have charge of the program. Every member of the student body is invited to come to Union Hall in the Temple at 8:15 p. m., January 17.

Palladian
A negro minstrel show will be presented by the new members Saturday night. This program will be a novelty in university circles. The meeting will start promptly at 8 o'clock. Besides the program refreshments will be served.

Sigma Gamma Epsilon Meeting
On Thursday, January 15, the fraternity will hold its last meeting of the semester. Business which is of utmost importance to every member will be discussed. Dr. Barbour will talk. The committee promises choice trilobites nebraskensis for refreshments.

Delian Picture
A third Delian picture will be taken Saturday at 1:15 p. m. Those who were not in either of the other pictures will meet at the Townsend Studio at that time.

Initiation of new members will be held in Faculty Hall, Saturday evening. All members are requested to be present promptly at 7 o'clock.

A. A. E. Picture
A. A. E. picture in front of M. E. steps Friday at 12 o'clock. 68-21.

American Legion
All men who are members of the Lincoln Post, American Legion and who desire tickets for the banquet-dance, may obtain them on the campus from Donald Parry.

Call for Teachers
Any one interested in a teaching position in the state (physics and history) beginning at once, call at Bureau of Professional Service, 202 Temple.

Faculty Men's Dinner Club
Faculty Men's dinner club will meet Friday, January 23, instead of Friday, January 15.

Christian Science Society
The Christian Science Society of the University meets Thursday evening in Faculty Hall, Temple, at seven-thirty. All students, alumni, and faculty are cordially invited to attend.

Girls' Gymnasium Suits
Gymnasium suits belonging to the following named girls will be disposed of by the Physical Education Department if not called for by January 31: M. A. Jones, Eleanor Eddy, Anna Burtless, Florence Lundell, Dorothy Darlow, Dorothy Davidson, Lucile Overman, Marion Jeffries, Doris Abbott, Hazel Baker, Marjory Temple, Drayton.

Swimming Classes
Regular swimming classes have begun again and will be given at the customary hours.

Observatory Open
Public evenings at the observatory on the second and fourth Tuesday evenings of each month will now be resumed. The observatory will be open to the public from seven to ten Tuesday evening for a view of the Orion nebula, if the skies are clear. In any case the popular lecture will be given; at eight o'clock on the subject, "The great volcanic eruption of Krakatca, in 1883."

Civil Engineering Society
The Cornhusker picture will be taken at 12 noon Thursday, January 15, 1920. All Civil Engineers must be present.

Mathematical Club
The Mathematical Club will meet Thursday, January 15, at 8:00 p. m., in Faculty hall, Temple building. Professor A. L. Candy will talk on "Number Puzzles," and Mr. G. S. Madsen will give a paper on "Mathematics in Artillery." All members are urged to be present. Visitors are always welcome. 65-31.

Students Register
All students in the U. of N. whose father, mother or both parents attended the university, are asked to register at the alumni office in the basement of Administration Building at an early date; also those whose grandparents so attended. It is the wish of the Alumni to have clubs formed of the second and third generation. 65-31.

The Theatres

THE LAST OF THE DUANES—Fox

William Farnum may be seen this week at the Colonial in his latest offering on the screen by Zane Grey, "The Last of the Duanes." As of all Mr. Farnum's characterizations, he depicts a virile American, full of action and life. The story itself is replete with thrills, and supreme in the romance of red-blooded American life. It is a masterful production, well handled by a competent cast. The lighting effects are pleasing even to the well-trained "movie" eye.

MALE AND FEMALE—Arcraft-Paramount

Cecil B. De Mille has attained another milestone in his career in the production of this difficult piece of work—woven into the title of "Male and Female." The story is of monstrous scope and deals with the problems which have confronted all ages, and are especially dominant in our lives today. In this silver-screen presentation Mr. De Mille makes of little Bebe Daniels, once "lead" in Harold Lloyd comedies something more than a "slap-stick" artist. She is the finished product of a masterful stroke, and emerges a dramatist. Gloria Swanson and Thomas Meighan do excellent work. The play was adapted from the famous story, "The Admirable Crichton."

EYES OF YOUTH—Clara Kimball Young Productions

Clara Kimball Young, the screen's most vibrant and responsive personality, appears this week at the Lyric in her own production "Eyes of Youth." This play has been known as the thunderbolt of dramatic force. An all star cast of especial note plays in support of Miss Young. The screen play is not so thrilling, and throbbing as the famous stage version with Marjorie Rambeau, but acting worthy of the keenest commendation is evidenced by the slightest motion on the part of the actors. If the screen had more plays so full of correct technicalities and natural settings, it would take a mighty leap forward. But this is only one of the many plays pleasing to the optics for the month of January.

ICE CARNIVAL TO BE HELD AT WISCONSIN

Madison, Jan. 13.—The fourth annual ice carnival and ski meet will be held on Jan. 24. The large rink back of the boathouse is to be the scene of the attractions. A ski jump has been built back of the Hydraulic building, where the ski exhibitions will be held.

George Martin, chairman of the carnival, has planned many new events. This meet, which is the feature of the season, will prove the popularity of winter sports at Wisconsin. Many people will take advantage of the varied program and enter the races of the meet proper in the afternoon. In the evening a winter carnival will be staged, with masqueraders and confetti. The rink will be lighted with electric lights and torches.

The fraternities and sororities will compete in races and silver cups are to be awarded. The various halls, the Y. M. C. A., and rooming houses will turn out for the competitive events. Ice boats will make excursions around the lake for 25 cents. Men's doubles and women's doubles, broad jumps, obstacle races, backward races are among the 14 events scheduled.

The Badger Ski club and the Outing club will take prominent parts in stunts for the carnival. The rink will be roped-off and a general admission of 25 cents will be charged. Tickets will be on sale next week. A lunch stand, where hot coffee and sandwiches will be served, will be placed at the bath-house. An exhibition of fancy skating will be given by Martin, who is champion of the Northern United States-Southern Canada circuit.

WANT ADS

LOST—A small loose-leaf note book, in Bessey hall, Thursday morning, January 8. Please return to student activities office. 64-31

FOUND—A watch. Owner can recover it by identifying same in 401 Mechanics Arts Hall, and paying for this advertisement.

Electricity—the Master Force in Manufacturing

THE marvels of electricity have revolutionized our manufacturing industries. With belts and pulleys replaced by electric motors operating automatic—almost human—machines, many a slow and tedious process has been eliminated. The factory worker's task of yesterday is made pleasant by his command of this magic power.

The Crane Company's plant at Chicago—electrical throughout—is a model of industrial efficiency. Its 10,000 horsepower of driving energy is brought by three small wires from a distant power plant. Then electricity drives the machinery which handles the coal for heating, cuts the steel, sifts the sand and sorts the material—in fact does everything from scrubbing the floor to winding the clock.

Such an institution is marvelous—superhuman—made thus by the man-multiplying force of electricity. The General Electric Company has been instrumental in effecting this evolution. First, by developing successful electric generating and transmission apparatus to furnish economically this modern form of power. Secondly, through many years of active co-operation with hundreds of manufacturers, it has mastered the art of applying the use of electrical energy to a multitude of needs. And finally, through branch offices and other distributing channels, its products are made accessible to all.

General Electric Company
