

HUSKERS LOSE TO HOOSIERS

(Continued from Page One.)
count and a field goal by Patty, who was substituted for Bailey, swelled the Husker total to 20. The final whistle sounded with the score 24-20 in favor of the Hoosiers.

Both teams played excellent basketball. The floor work of the Indiana team was slightly better than the brand exhibited by Schisler's team but the Hoosiers had more shots at the basket than did the Nebraskans. Nebraska fans have nothing but praise for "Jumbo's" team but believe the Cornhuskers will turn the tables when the two teams meet in the Armory again tonight.

The score:

Indiana-24	g.	fg.	pf.	ff.	pts.
Donovan, c.	2	0	2	1	4
Phillips, f.	4	0	1	0	8
Dean, f.	1	6	2	0	8
Kyle, g.	0	0	2	2	0
Dobbins, g.	0	0	1	0	0
Byrum, g.	2	0	1	1	4
Total	11	6	9	4	24

Nebraska-20	g.	fg.	pf.	ff.	pts.
Bailey, f.	0	0	1	0	0
Russell, f.	5	0	2	0	10
Bekins, c.	1	4	0	0	6
Newman, g.	1	0	1	1	2
Schellenberg, g.	0	0	4	0	0
Patty, f.	1	0	0	0	0
Smith, f.	0	0	1	0	0
Jungmeyer, c.	0	0	0	0	0
Pickett, g.	0	0	0	0	0
Total	8	4	8	1	20

Score by halves:

	1st	2nd
Indiana	13	11-24
Nebraska	11	9-20

Goals missed by Dean—four out of ten; goals missed by Bekins—five out of nine.

Referee—F. E. Birch, Cedar Rapids, Ia. Time keeper—John Riddell.

TO WAGE FIGHT AGAINST H. C. L.

(Continued from Page One)
The resolutions framed by the state committee to reduce the cost of living will be presented to school organizations for adoption later. The Y. W. C. A. has already adopted them by the unanimous vote of those at vesper last Tuesday, when Mrs. Ryan addressed them on the high cost of living.

The Kearney State Normal adopted the resolutions at a well attended meeting last week. Miss Heppner puts it up to the university to do as well or better.

PURDUE UNIVERSITY HAS THEFT EPIDEMIC

Government secret service men who have been employed to rid the Prudue University of the forgers and thieves who are doing a land-office business there. The college book stores have been forced to investigate all checks before cashing them, as in the last two weeks, they have lost \$95 through forgeries.

Checks have been stolen, fictitious names, forged signatures forged and matriculation cards have been employed in getting checks cashed. Numerous cases of petty thievery among students have been reported. Clothing, drawing sets and books have been taken in large amounts.

The government secret service, backed by the student-body, are making every effort to run down the guilty persons. Investigation has thrown suspicion upon several persons and it is probable that within a few days, these cases will be found and reckoned with.

DUTIES OF COMMITTEE ON MEMORIAL ANNOUNCED

The students' memorial committee will be authorized to make plans and appoint helpers for districts or counties, as they may decide. A report was heard from a committee named to interview prominent alumni as to ways and means of managing a memorial campaign. In the general methods employed in raising funds for war work were commended. Although no formal action was taken Monday evening it seemed to be the opinion of all that the memorial should be utilitarian in nature and should be placed on the campus for general university use where it could yield the best service for both men and women. The idea of a gymnasium or stadium was favorably received. It was reported that Kansas was building memorial stadium.

FIRST NEBRASKA GRADS HOLD ENVIABLE RECORD

The alumni office received today, the picture of W. H. Snell, '73, of Tacoma, Washington. The class of 1873, was the first graduating class at the University of Nebraska. J. S. Dale, secretary of the Board of Regents is the other member of this class, which holds the distinction of being the only graduating class of 1873 in the United States which has all members alive. Mr. Snell's picture will be placed in the alumni office beside the picture of Mr. Dale which is already there.

STUDENTS WORK TO BE SYSTEMATIZED

(Continued from Page One)
eighteen hours, from among those designated by a department and approved by a department and approved by the course of study committee. Elementary or beginning courses open to freshmen shall not be included in the major and some courses must represent distinctly advanced work. A major may include courses in departments other than the one in which the major is offered.

"Each candidate shall also be required to offer a minor consisting of courses aggregating eighteen hours in one or more subjects designated by the department in which the major is offered and approved by the course of study committee. At least eight hours of a minor must be offered in one subject.

"A concise statement of the major and minor requirements indicating what courses are excluded and what courses must be included, shall be published in the announcement of each department providing a major.

"I. That a more adequate means of advising students be organized as follows:

"1. A general circular of advice in regard to the selection of courses together with a provisional course of study card shall be placed in the hands of all students at a considerable period before the day of registration and each student shall be urged to come to his adviser with a tentative programme of his work indicating his general aims.

"2. (a) The dean of the college of arts and sciences shall appoint a suitable number of members of the faculty to serve as advisers to the students of the class of 1924 throughout their two years of work in the junior division.

"(b) He shall also appoint a suitable number of advisers to the class of 1923 to serve for one year.

"(c) Thereafter the dean shall appoint such number of advisers as may be deemed necessary for each entering class, and they shall continue as advisers to this class during its two years' work in the junior division.

"3. It shall be the aim of the board of advisers:

"(a) To meet students during the entire week of registration to discuss with them the general principles which should control their choice of subjects, to discover their aptitudes.

(1). The following form of statement is suggested:

Major (in chemistry): Twenty hours exclusive of chemistry () and (), and inclusive of courses () and ().

Minors: Twenty hours is selected from mathematics, botany, geology, physics, and zoology.

Major (in sociology): Twenty hours from any courses offered by the department.

Minors: Twenty hours selected from any two or three of the following subjects: history, economics, political science, philosophy, and zoology, choice of vocation which they may have thus early formulated, and to advise them of the opportunities offered by the university.

"(b) To offer each student an opportunity to meet his adviser for consultation at least once during each semester.

"(c) To hold meetings for the purpose of discussing the problems arising out of their work and to evolve uniform standards as a basis for their advice.

"(d) To indicate on each course of study card signed whether the selected programme is or is not approved by the adviser.

"4. Each student entering the senior division shall choose an adviser in the department from which he selects his major subject.

"IV. That the aims and purposes of the college and of the junior and senior divisions thereof be set forth in the catalogue in such definite terms as may be agreed upon, for the guidance of students, their parents, and the board of advisers."

The Power of Electricity in Transportation

ELECTRICITY has leveled out the Continental Divide. The steam locomotive, marvelous as it is after a century of development, cannot meet all of the present demands for transportation facilities. Its electric rival has proved to be far superior.

Electricity is the power which drives the trains of New York City's subway and elevated systems. It operates the locks and tows the ships through the Panama Canal. It propels the Navy's latest super-dreadnaught, the *New Mexico*. Electric mine locomotives have replaced the slow-moving mule and the electric automobile has also come to do an important service. Such achievements were made possible by the extensive research and manufacturing activities of the General Electric Company.

On the mountain divisions of the Chicago, Milwaukee & St. Paul Railway—the world's greatest electrification—giant electric locomotives today lift an ever increasing freight tonnage over the mile-high Rockies and also make traveling clean and comfortable. They utilize the abundant energy of distant waterfalls and then, by returning some of this power to the trolley, safely brake the trains on descending grades. And their capabilities are not impaired by excessively cold weather when the steam engine is frozen and helpless.

Electricity has become the universal motive power. It has contributed efficiency and comfort to every form of transportation service and in this evolution General Electric apparatus has played a large part—from mighty electric locomotives to the tiny lamp for the automobile.

Some Advantages of Railroad Electrification

- Saving the Nation's coal
- Lower maintenance costs.
- Greater reliability and fewer delays.
- Ability to haul smoothly heavier trains at higher speed.
- Operation of electric locomotives unaffected by extreme cold.
- Ability to brake trains on descending grades by returning power to the trolley.
