LINCOLN, NEBRASKA, TUESDAY, FEBRUARY 10, 1920.

FIVE CENTS PER COPY

GIRLS INITIATE PICTURE DRIVE

Every Co-ed Must Contribute 25c to Decorate Woman's Building.

W. S. G. A. Members Will Collect Money—Campaign Closes Wednesday Afternoon.

The members of the W. S. G. A. society will launch a campaign today to raise money for the purpose of purchasing pictures for the Woman's building. Every girl in the university will be taxed twenty-five cents for this purpose. About \$600 will be raised by the taxation.

The W. S. G. A. society is composed of girls representing every sorority and boarding house on the campus. It is the plan of the campaign officials to have each representative collect twenty-five cents from the occupants of their respective houses. Each member is requested to turn in all money to Dean Heppner, not later than Wednesday afternoon.

The Woman's building has been under a state of repairs for the past few months, will be opened in the near future. The building is a large structure and will need much interior local color. It was decided that pictures would be the most appropriate for the rooms.

The selection of the pictures will probably be left to a committee to be appointed later. The specified amount will doubtless enable the girls to purchase a select group of pictures, among which landscapes and other equally desirable decorations will hold a featuring position.

It is necessary that the work of collecting be done immediately in order that plans may be carried out speedily that the Woman's building may be redecorated as quickly as possible.

ALL-UNIVERSITY PARTY TO BE MORE EXTENSIVE

Two Buildings to be Utilized in Accommodating Saturday Night Crowd.

Preparations are in full swing for the all-university party in the Temple and the Armory, next Saturday, February 14.

Every room in the Temple and the two gymnasiums in the Armory will be used. Beginning at eight o'clock, a vaudeville will be staged in the Temple theater, and refreshments and a variety of stunts will occupy the other rooms of that building. Dancing will be in order in the large gymnasium after the basketball game, while the physical education normal students, both men and women, will give an entertainment in the small gymnasium.

This party differs from the other all-university parties held this year in the scale upon which preparations are being made. Hitherto, just the gymnasiums were used and, consequently were over-crowded.

WEATHER EXPERT TO TALK ON "SOLA RADIATION"

"Variations in the Total Luminous Solar Radiation" is the subject of the talk to be given Tuesday evening at eight o'clock by H. P. Kimball of the United States Weather Bureau, in the lecture room of Brace Physical Laboratory. Mr. Kimball has been connected with the Washington bureau for a number of years and he is regarded one of the most experienced weather men in the country.

The records kept at the Farm campus and a number of lantern slides will be used by Mr. Kimball in his talk. There are only three continually recording machines in the country. One is located at the State Farm and the other two are stationed at Washington, D. C., and at the University of Wisconsin.

BUSINESS STUDENTS GET CALCULATING MACHINE

A calculating machine has been received at the college of business administration for use in the statistical laboratory. The machine, known as the "Millionaire," is of Swiss manufacture and is the finest and most accurate machine of its kind manufactured.

The class in insurance under Professor Albert Babitt was to have used this machine in their work but due to his resignation the practical work with this machine will be postponed until a new instructor can be provided for this course.

ALUMNI ORGANIZE PERSHING CLUBS IN MIDDLE WEST

Larger Western Cities Promote Nebraska Graduate for Presidential Nomination.

University of Nebraska alumni are waging a vigorous campaign to link the name of the University of Nebraska with the fame of John J. Pershing. Since Pershing is a graduate of the Cornhusker institution and has a degree from the college of law here, graduates of his day and those of the succeeding years are taking it upon themselves to promote the Pershing for president boom by the organization of Nebraska Alumni Pershing Clubs throughout the country, and so aid in placing a Nebraska graduate in the presidential chair.

In Denver the Nebraska people have a very effective force at work in the interest of the Pershing candidacy and a Nebraska alumni organization has also established headquarters in Kansas City for the purpose. The Denver Cornhuskers had an enthusiastic dinner in that city last week which turned into a Pershing rally, according to newspaper advices.

There are a large number of Nebraska Alumni Pershing Clubs, especially in the western states, and similar clubs have been formed in the principal eastern cities. All clubs are co-operating with the Lincoln alumni organization which originated the movement.

LAST CALL FOR PICTURES

Juniors and Seniors and organizations who plan to have their pictures in 1920 Cornhusker must hand them in today at the Cornhusker office, U. 206.

MRS. RYAN TO SPEAK AT CONVOCATION TODAY

Economy Campaign Will be Launched at Meeting in the Armory.

"Work and save."

That is the slogan of the economy campaign to be launched at the university at eleven o'clock today by Mrs. Charles G. Ryan, state manager of the campaign, and other speakers at convocation, in the Armory. The university band will play in front of the Armory before the program begins.

Mrs. Ryan's subject has not been announced, but will probably cover the economy movement in a general way. Prof. J. O. Rankin will speak on "Some Causes of the High Prices and Suggested Remedies." Ruth Hutton will discuss the question, "How may the university girl help to bring about a reduction in prices?" Harry Reed will treat, in a similar way, the university man's part in the economy campaign.

The Innocents and the Black Masques are co-operating with Dean Amanda Heppner, who has charge of the campaign at the university, to give today's convocation the maximum of publicity, in order that the campaign may start off successfully.

STUDENTS CHOSEN FOR INCOME TAX SERVICE IN STATE

Twenty-one University Men to Help Nebraska Make Annual Government Reports.

Twenty-one members of the class in money and banking under Clarence E. Hinds of the First National Bank have been chosen for income tax service out over the state. These men will be sent out over the state from February 9 to February 28 to assist the people of the various towns in the calculating of their income tax.

The following men will go to the several towns as listed:

- Armstrong, Paul, Anselmo—Peoples State Bank.
 - Day, Clint, Weeping Water—First National Bank.
 - Duncan, James, Falls City.
 - Estes, Forrest, Rising City—Farmers State Bank.
 - Feelhaber, Frank, Callaway—Seven Valleys State Bank.
 - Hoffman, E. T., Harvard—Harvard State Bank.
 - Horky, Frank A., Fairbury—First National Bank.
 - Johnson, Myron V., Maywood—Farmers Security Bank.
 - Kenner, James R., Ord—First National Bank.
 - Modlin, Earl H., Blue Hill—Commercial Bank.
 - Murphy, Lawrence L., Waverly, Bank of Waverly.
 - Neuman, Birge L., Wahoo—Saunders County National Bank.
 - Pettee, Eugene W., Hastings—First National Bank.
 - Slater, Dwight E., Harvard—Union State Bank.
 - Taylor, L. T., Tilden—Chas. Stuart.
 - Waldorf, L. D., North Platte—McDonald State Bank.
 - Waterman, L. T., Kearney—Farmers State Bank.
 - Weeth, H. J., Mason City—Mason City Banking Co.
 - Wenke, A. E., Grand Island—First National Bank.
 - Witte, E. F., Dorchester, Bank of.
 - Wolmer, Herman, Grand Island—Grand Island National.

PROFESSOR BRUNER TO TAKE VACATION

Prof. Laurence Bruner of the department of Entomology leaves soon for his California ranch to spend his vacation. Professor Bruner has been at the university for a number of years and is an authority in entomology, known and recognized as such throughout the entire world. It was through his efforts a few years ago that the grass-hopper wave in Argentina was brought to a successful termination.

Professor Bruner is credited with having gathered one of the most complete entomological collections in the world, the greater part of which is now in the possession of Pennsylvania State College. A story about Professor Bruner throws a bright light on the reason for his successful accomplishments in his chosen line.

When a mere boy Professor Bruner had the task of herding cattle on his father's farm near West Point, Nebraska. To while away the long tiresome hours during the warm spring days, he began to note the various creatures of the earth and soon became intensely interested in their

DEAN FORDYCE TO SPEAK AT SOUTH DAKOTA NORMAL

Pres. H. W. Foght, of the Northern Normal and Industrial Schools, a state educational institution at Aberdeen, S. D., has asked Dean Chas. Fordyce to give a series of lectures during their summer session. He will, however, remain here for the first term, which closes July 10. He will then go directly to Aberdeen for the second term at that institution. The subjects to be taught are "Fundamentals in the Teaching Process."

AMERICAN LEGION TO MEET WEDNESDAY NIGHT

The University Post of the American Legion will meet in the Temple, at 7:30 Wednesday evening, February 11. The resignation of the present commandant will be tendered, the Davey Sedition Bill and the Anderson Language Bill will be discussed, and several important communications from the Nebraska State headquarters will be considered. All ex-service men are urged to be present at this meeting.

Tickets for the American Legion dance which is to be held at the Commercial club, Friday, February 13, may be obtained this week.

TO LECTURE ON ASTRONOMY AT TEMPLE FRIDAY

Prof. Forrest Ray Moulton to Give Interesting Talk to Students.

Professor Forrest Ray Moulton of the University of Chicago will give an illustrated lecture on "The Doctrine of Evolution in Astronomy" Friday evening, February 13, at the Temple theater. The lecture is given under the joint auspices of the Sigma Xi and the Phi Beta Kappa societies, and is open to the public.

Professor Moulton is an unusually interesting speaker. He ranks high not only as a popular lecturer, but also as a scientist. On the subject on which he is to speak in Lincoln he is the world's leading authority.

Those who have followed the contributions of American science to the winning of the war know that Major Moulton was in charge of mathematical research in ballistics in the Ordnance department. One of his achievements in this department is described in a recent number of the Literary Digest, which says in part:

"No single person has contributed more than Professor Moulton. As a result of obtuse calculations he made a change in the copper driving band of the six-inch shell, which increased the range two and one half miles; what is even more remarkable, he so

(Continued on Page Four.)

BLUE PRINT IS OUT

Blue Print may be had by calling at room 105½ M. A. building at any time during the day.

SCOUTMASTERS' SCHOOL HAS LARGE ENROLLMENT

Almost One Hundred Men Attend Opening Lecture at Teachers' College.

The Scoutmasters' School which opened in the Teachers' College Tuesday evening, started with an enrollment of nearly one hundred members. Those taking the course include a number of leading business men of the city who are interested in the Boy Scout movement. The instructors include about one dozen of the faculty of the university who contribute one or more lectures on one or more subjects of boy life. Training school will continue until March 30, sessions being held on Tuesday evenings from 7:45 to 9:45.

Last Tuesday evening, Professor A. A. Reed outlined the course and gave important suggestions as to ways and means of conducting the class. Dean Chas. Fordyce will give a lecture on the subject of "Adam Kid" (emphasis on the last syllable of "Adam"). Other interesting lectures on "Psychology of Adolescence;" "Social Psychology;" "Leadership;" "Americanization;" "Bird Life;" "Trees;" and "Instincts of Animals" will be given in future classes.

MAY ORGANIZE BASEBALL TEAM

National Sport Might Again Enter into Nebraska Activities this Spring.

Bids for Game from Western Pill-Swatters Hastens Athletic Plans.

While a 1920 Nebraska baseball team is not yet an assured thing there is every reason to believe that the Cornhusker school will be represented on the diamond this spring. Paul J. Schissler will be in charge of the baseball activities and has issued a call for all men who are interested in the great American pastime to meet in the Chapel Wednesday afternoon at 3:30.

For the past few years baseball has not been in vogue at Nebraska. Nevertheless there have always been a few who have strongly favored the return of the game and as present indications point, baseball will again occupy a prominent place in Nebraska athletics. Provost Lees, who is at present Director of Athletics, has sanctioned varsity baseball, providing it does not draw too heavily on the athletic treasury. Although the Provost has not given his official consent, there is little doubt but what he will in the near future place the official stamp of approval on varsity baseball.

The staging of a successful baseball season will require a great deal of work and a few of the most important problems will be discussed at the meeting of candidates slated for Wednesday afternoon. Coach Schissler is anxious to see a large number of men on hand at this meeting in order that the season may get under way as soon as possible. There is an abundance of excellent material at Nebraska and there should be little trouble in development.

TO HOLD MATINEE DANCE FOR EDUCATIONAL FUND

Plan to Raise Nebraska's Quota With Afternoon Fete, Saturday.

Matinee dances are becoming quite the most popular form of entertainment in these busy days. The dance craze which rather waned before the war, has returned, more of a craze than before and everybody is dancing, dancing, dancing.

And because there are not enough evenings in the week, the matinee dance is coming in vogue. So Lincoln folk are going to have another opportunity to repeat the delightful experience of a few weeks ago as the Smith College women are planning a matinee dance and tea at Roseville for the afternoon of St. Valentine's Day, Saturday, February 14.

The proceeds from the affair will go to help swell the coffers of the Smith College Educational Benefit fund. Smith College as well as other large institutions of learning is in

(Continued on Page Four.)

PROF. H. H. KIMBALL TO LECTURE TUESDAY

Prof. H. H. Kimball of the United States Weather Bureau, Washington, D. C. will give a talk in the lecture room of Brace Physical Laboratory Tuesday evening, February at 8 o'clock. His subject will be "Variations in Total and Luminous Solar Radiation" and will be illustrated by lantern slides. The records kept at the farm campus are used extensively in the paper.

Professor Kimball comes from Washington every two years to test the radiation recording machine at Nebraska. This machine keeps a continuous record of the sun's radiations. There are only two beside this one in the United States; one is in Madison, Wisconsin and the other is at Washington, D. C.
