VOL. XIX. NO. 118.

LINCOLN, NEBRASKA, FRIDAY, APRIL 9, 1920.

FIVE CENTS PER COPY

WILL PRESENT REQUIEM MASS

Famous Minneapolis Symphony Orchestra to Make Three Appearances Here in June.

TO HONOR SOLDIER DEAD

The Minneapolis Symphony Orchestra has been engaged by the University to make three appearances in Lincoln, the week preceding Commencement, in memorial services honoring Nebraska's soldier dead. These appearances will be made at the auditorium Friday evening, June 4, Saturday afternoon, June 5 and Saturday evening, June 5.

Two symphony concerts will precede the final and most important event, the production of Verdi's "Requiem Mass." This will be given in conjunction with the University Chorus of three hundred voices under the direction of Mrs. Carrie B. Raymond.

Fifty men compose this famous musical organization under the leadership of Emil Oberhoffer. It is rated as one of the three best orchestras in the country. Four popular soloists will accompany the orchestra; Emma Noe, soprano; Harriet McConnel, contralto; George Ralsey, tenor, and Finlay Campbell, baritone.

"Combination tickets" will be sold for these performances, which will admit the owner to one of the first two concerts and also to the "Requiem Mass." Individual tickets may also be purchased for the other concert. Only those bearing "combination tickets," however, will be admitted to the "Requiem" performance.

Students will be able to purchase reservations next week on the campus. Calls are coming from all over the state asking for tickets and the supply will be exhausted shortly after it is put on sale.

This will be one of the largest, if not the largest, event of a musical nature given at Lincoln during the entire year. The spirit of patriotism and respect shown to our soldier dead is at its highest and the student body is expected to turn out well at the performances. The Legion memorial services a few weeks ago was indicative of the manner with which Nebraskans honor their heroes. The presentations will be well worth attending by any one.

NOLCOMBE DESCRIBES EGYPTIAN CITY LIFE

Writes from Kantara Telling of Experiences in Metropolis on the Nile.

An idea of the life in Egypt and the channels into which the money recently subscribed for usage in eastern fields will be turned may be obtained from this letter received by the Y. M. C. A. cabinet from C. Steele Holcombe, '17.

Kantara, Egypt, March 5, 1920.
Dear Friends:

Although we have left Cairo and are now located at Kantara, which is the principle camp for the British campaign in the East, I feel that the most interesting subject to write about is the city which is the capital of Egypt and the intellectual center of the Mohammedan world.

At first glance upon leaving the station we felt quite sure that we had arrived in a very modern city with paved streets, electric cars, parks, etc. The familiar cries of the baggage porters and carriage drivers greeted us with their customary persistence, but finally we were allowed to select a rather nice looking carriage and were driven about ten blocks through a crowded but clean and orderly street to the Y. M. C. A. The buildings ranged in height from two to six stories and appeared quite like those we were accustomed to see.

The one thing, however, which caused us to realize that we were in a foreign city was the odd costumes.

COUNCIL SETS DATE FOR A SPECIAL ELECTION

Tuesday, May 4th, was set by the Student Council as the day for the special election on the revised constitution of the Student Council and also the Honor Spirit. At a mass meeting of the students before the vacation a majority vote was given to the proposed amendments to the constitution. At that time the Honor Spirit was also discussed.

In Monday's issue of the Daily Nebraskan will be printed the proposed Honor Spirit, its provisions, and plan of procedure.

PRE-MEDIC DAY TO COME ON APRIL 23

Embryo Doc's Will Visit Omaha and Inspect Hospitals in Near Future.

Pre-Medic day will be April 23 this year, Dr. Lyman has announced. The Pre-Medic students will visit the College of Medicine in Omaha as they have done for the last six or seven years.

The program has not been definitely arranged, but will probably be similar to the programs of previous years. Usually the morning is spent watching operations at the University hospital. Lunch is taken at the College of Medicine. The afternoon is taken up with inspecting the laboratories until four o'clock when the students are free. In the evening the University Club usually entertains the Pre-Medics.

Pre-Medic day has been an annual event since the four-year course of medicine was established in the school at Omaha. Before that just the clinical work, which is the last two years of the course, was given at Omaha. Now, only the two years of pre-medical work is given at Lincoln. The two years of laboratory and the two years of clinics are given at Omaha.

One of the main purposes of Pre-Medic day is to maintain a spirit of unity between the Pre-Medics in Lincoln and the medical students at Omaha. This was held in connection with Omaha day the first year that the University observed Omaha day, but since then the two days have been separate. This plan is found more satisfactory.

ENGINEERS' EMPLOYMENT BUREAU IS ESTABLISHED

Prof. R. E. Davis, of the College of Engineering, has been appointed by the national headquarters as employment representative of the local student chapter of the American Association of Engineers. The national headquarters has arranged to supply him with an up to date list of the vacancies existing in all branches of engineering. He will also be in touch with the larger employers of engineers in Nebraska.

All student members of the organization who desire employment should register at Professor Davis' office in Room 104, Mechanic Arts Hall.

SLIDES TO ILLUSTRATE ESTES PARK CONFERENCE

The real beauty of Estes Park and the work of the College Y. M. C. A. Conference, which will be held there June 11-21, will be presented by slides to be shown Wednesday evening, April 19, by the University Y. M. C. A. The place at which these pictures will be shown has not been decided upon.

Men who have gone to the Park are enthusiastic in their praise of the conference and a number of men have signed to go this year. It is hoped that the delegation from Nebraska will number half a hundred this year. The slides will give an accurate picture of the ten days spent at the conference last summer.

The study of some foreign language is compulsory in all government schools of China. In most of them, English is the foreign language taught.

INSTALL KAPPA DELTA SATURDAY

New National Sorority at University Welcomed by Greek Letter Folk.

Visiting Members and Chapter Officials Here to Assist in Initiation.

Twenty-five active members of the Delta Omega sorority will be formally initiated into the Kappa Delta sorority Saturday morning at the home of Miss Helen Tuttle in Lincoln. Miss Sarah Blue of Union Springs, Alabama, national chapterian of the Kappa Delta sorority, Miss Grace Saberson, Des Moines, national officer, and Miss Mildred Schaafke, Wisconsin, province president, and a number of Kappa Delta members and alumni from nearby chapters are in the city to assist in the installation ceremonies.

The first degree of the installation took place Thursday afternoon. The second degree will be held Friday evening at the home of Mrs. Richardson and the third at the home of Miss Helen Tuttle, Saturday afternoon.

A number of parties have been arranged for the new members and visitors. Thursday evening Lucile Cline entertained the active members of the local chapter at her home. A luncheon will be held at the Lincoln hotel Friday noon for all members. After the formal initiation Saturday afternoon a reception will be held at the home of Miss Elsie Grainger. All women faculty members and wives of the Deans and representatives of the campus sororities have been invited to be present.

Miss Blue expects to remain in Lincoln to assist the chapter development.

GEOLOGY STUDENTS PLAT WEEPING WATER VALLEY

Limestone Outcroppings of Special Interest Since Indicative of Oil in State.

The members of the Geology class that took the trip to Weeping Water during spring vacation report that a fairly successful trip was made. They arrived at their destination on Wednesday evening and proceeded to take charge of the hotel at that place. They had their own cook and from all reports the "eats" were certainly excellent. It was said that one of the members, one morning at breakfast, came back for the fourth helping of "pancakes." From this it would seem that the trip was a failure from the standpoint of the commissary department.

Real work was begun early Thursday morning. Thursday and Friday were both good days and a good portion of the country was covered. Saturday proved their undoing, however, as it was snowing so hard that one could not see beyond two hundred yards. No work was done on Saturday. Sunday it had stopped snowing and a hike was made to a stone quarry about thirteen miles distant. No mapping was done on Sunday, and some were in favor of calling the trip off and coming home. They finally decided to stay and work was resumed Monday morning. A great deal was accomplished in spite of the snow, but not as much as if it had been clear, although seven or eight sections were covered.

This work under the conditions that prevailed during the present trip will be good for the fellows because it will give them an idea of what they might have to go through when they start working for an oil company.

About two days work in the laboratory are required to put the finishing touches to the maps, however, all of the practical work is completed. There is a possibility of returning for a couple of days in the near future to complete the maps, but nothing definite is known as to this.

MISS HEPPNER TO GIVE TEA FOR KAPPA DELTAS

Miss Heppner will give a tea on Friday afternoon, at which the members of Kappa Delta, the new sorority, will be guests of honor. Pi Chapter of Kappa Delta is being installed at Nebraska this week, and it is Miss Heppner's desire to present both the new members, and the national representatives who are here, to the University at this tea. All University students and the members of the faculty are invited. The tea takes place from three-thirty to five-thirty in Woman's Hall.

DEVEREUX PLAYERS TO APPEAR TODAY

Famous New York Company Will Present Series of Classic Dramas at Temple.

The University Players present the Devereux Players of New York City today and Saturday at the Temple Theater in a series of famous dramas of the legitimate stage. Obuck's "Retribution" will be the initial offering this evening at 8:30, and at a 3:00 o'clock Saturday matinee, "Romancers," by Rostand, will be presented. The Company will close its engagement with "The Thief," Saturday evening. This latter play is the production which Dorothy Donnelly made famous on the stage and screen.

The University Players, under the direction of Prof. H. Alice Howell, and managed by W. M. Herbert, presents these plays to keep alive the spoken drama in Lincoln. These players are reputed to be of unusual merit. Mr. Devereux was one of the chief members of the Sothorn and Marlowe Company for several years. For the past seven years he has, under his direction, produced a large number of plays of note. He brings with him a company of artists of national reputation, including Zineta Graf.

Miss Graf possesses extreme youth, classic beauty, great charm and rare intelligence.

Mr. Devereux is producing drama in a competent, refined and dignified manner, thereby encouraging and developing higher standards of education and enlightenment and awakening a broader interest in the stage as an institution of thought as well as recreation.

TICKET SALE FOR UNI NIGHT NEXT TUESDAY

Beginning April 13, tickets for the University Night to be held April 17 at the High School auditorium will be on sale at the University Y. M. C. A., Temple Building. The faculty will be allowed to make their reservations before the student body and may purchase their tickets from eight to eleven o'clock Tuesday, April 13.

The committee promises that this will be the peppiest, classiest, and most original production ever presented to the University public, followed by the spiciest, bitingest, and most thrilling sensation of the year—"The Evening Sun."

BARBOUR TO LECTURE ON "WAR MINERALS" FRIDAY

The fourth number in the series of popular lectures to be offered the University by the Chemistry Club will occur Friday, April 9, at 5:00 p. m., when Prof. E. H. Barbour will speak on the subject of "War Minerals." This will be given in the general lecture room of Chemistry Hall. Professor Barbour was a member of the National War Minerals Council so that he can give some first class information. "War Minerals" is a term applied to those minerals which were formerly imported but when the war precluded the use of ships for this importation, these "War Minerals" had to be discovered at home.

"We claim that about the busiest person in the world is a woman who has discovered a pimple on her face."
—Holcad.

BALL ARTISTS RESUME WORK

Thirty Huskers Practice on Heavy M Street Field After Week's Rest.

TRACK MEN WORK HARD

Owing to a heavy field, the Husker baseball candidates were not put through a very strenuous workout Thursday afternoon at the M street lot. The infielders and battery men were permitted to loosen up their pet wings by tossing the pill around, while the outfielders limbered up by running down long drives to the fence.

The men returned from vacation in good shape and the "charlie horses" and glass arms developed earlier in the game have practically vanished from the squad. The pitching staff has not as yet been permitted to cut loose in full swing with its assortment of twisters. Coach Schissler's hurling staff looks good with Pickett, Kline, Peterson, Smith, Williams, McCrory and Lamb waxing into shape. About thirty men turning out daily for the team and as yet no one has his position clinched. The squad should be larger and some of the willow swingers who are straying about idle should don a uniform and trot out to M street and demonstrate their wares before the mentor.

Track Men Work Hard

Coach Schulte is working hard with his track men to round them into mid-season form to down the Indians who will blow into town in another week to attempt to add the Cornhusker scalp to their belt. Finney and Wright are counted on to bring home the bunting in the hurdles, while Graf is expected to annex premier honors in the long distances. McMahon and Owens are hitting their stride and should throw dust in the Indians' eyes in the short and middle distances. The tryouts of this weekend should show up some good calibre men to back up these stars and help take the bacon into the Husker camp.

The recent snappy weather has been very suitable for the spring gridiron men and they have been going through light workouts regularly. No scrimmages nor rough points of the game have been gone through so as not to run the chance of maiming the material for next season.

SILVER SERPENTS WILL GIVE ANNUAL CIRCUS

Armory to be Scene of "Faker" Presentations Saturday Afternoon.

"The Big Circus," the greatest of its kind, will be given by the Silver Serpents in the large room of the Armory, Saturday afternoon, between the hours of two-thirty and five o'clock, for all Sophomore and Junior girls. This amusing fete was first started last year and it is guaranteed that this year's production will far excel that of the past. It is promised that the Junior and Sophomore girls are excellent performers and will surpass any seen at the Circuses in childhood days.

The big parade will be the first act staged. Come and see the clowns, the tame elephants, the laughing monkeys, the caged lions, and the famous trick pony, which can count, and many other wonders of the world, which will be in the parade.

Many unusual and novelty side shows will also be there. Among them are the "bearded lady," the "cooties," from Flanders and the "sword-swallower." Don't fail to miss the Knock-down-negro-dolls and win a sack of peanuts. The lady who walks the tight rope, will be there too, and the snake charmer who plays with the most poisonous reptiles. Girls! come and have your fortune told by the lady who reads your palm and gives you a picture of your future husband.

An admission of ten cents will be charged to cover expenses.
