WORTH-WHILE ADVERTISING.

In two weeks the final commencement rites will be celebrated with almost a whole week of festivities. There will be some very worth-while affairs and an effort is being made to bring back as many alumni as possible. Last spring the semi-centennial brought hundreds of ex-Nebraskans to the University and created a better spirit among the alumni. Why not duplicate that again this year?

June 4 and 5 are the dates set for the May Festival when the Minneapolis Symphony Orchestra will give two concerts and the University Chorus, assisted by the orchestra will render the "Requiem Mass" for the soldier dead. June 5 is also Alumni Day when reunions of all the classes will be held. June 6 is to be Baccalaureate Sunday and Monday, June 7, Commencement Day. In addition to these scheduled events, there will be numerous private and organization entertainments.

Write home now students, and do a little advertising. If you know of anyone who has been considering coming to Lincoln for that week, put on the last straw by a personal invitation. One of the first things that is thought of in connection with Yale, Princeton, Harvard and all the large eastern schools is the wonderful loyalty of their graduates. Thousands of them flock back to the old campus every year for the gala week and they there join together and plan new ways to back up their Alma Mater's glory. The University of Nebraska is a mere infant in comparison with those colleges but we are not lacking in spirit in this state. We should pull together to build up that same deep feeling for our school. Nebraska's graduates will be pleased to come back to their own school and listen to the "Requiem Mass"; Nebraska's graduates will jump at the opportunity to hear the famous Minneapolis Symphony. All they need is a little reminder, and will you be Nebraska's advertising agent?

We are pleased to announce the appointment of Provost J. T. Lees as chairman of the Student Publications Board. The resignation of Dean Stout was regrettable for he had acted as a very wise and efficient head of this Board. By the appointment of Dr. Lees we are assured that this same wise policy of control will be continued because of his deep interest in student and faculty affairs of the University.

WHAT'S THE MATTER WITH AMERICA THESE DAYS?

- Too many diamonds, not enough alarm clocks.
- Too many silk shirts, not enough blue flannel ones.
- Too many pointed-toed shoes and not enough square-toed ones.
- Too many serge suits and not enough overalls.
- Too much decollete and not enough aprons.
- Too many satin upholstered limousines and not enough cows.
- Too many consumers and not enough producers.
- Too much oil stock and not enough savings accounts.
- Too much envy of the results of hard work and too little desire to emulate it.
- Too many desiring short cuts to wealth and too few willing to pay the price.
- Too much of the spirit "get while the getting is good" and not enough of the old-fashioned Christianity.
- Too much discontent that vents itself in mere complaining and too little real effort to remedy conditions.
- Too much class consciousness and too little common democracy and love of humanity.—Exchange.
- And, finally, we might add too much marching in overalls and not enough working in them.

AVERY NAMES RESEARCH COMMITTEE

Purpose to Foster Co-Operation Between Different Departments.

Chancellor Avery has appointed a University Research Committee at the request of the National Research Council. The personnel of the committee is as follows: Chairman, Prof. Fred W. Upton, professor of Chemistry; Lennis Van Es, professor of Animal Pathology; O. J. Ferguson, professor of Electrical Engineering; R. J. Pool, professor of Botany; Hutton Webster, professor of Social Anthropology; H. H. Marvin, professor of Physics.

The purpose is to assist in developing and co-ordinating research between different departments. This committee has recently been asked by the National Council to prepare a census of research workers of the University and to make a survey of the various lines of research which are being carried on in the University. By aid of this research council it will also be possible to co-ordinate research which is being pursued along similar or identical lines in distant institutions. Thus a man in California and Nebraska working on a similar problem can co-operate with one another.
