

REGISTRATION MAY PASS 7,000 MARK

(Continued from Page 1). schools and departments for which figures are not yet available, continuing in about the same ratio will put the University's total enrollment, that last year fell just short of 7,000 students far beyond that mark, according to estimates made from the registrar's figures. The enrollment in the summer school this year was more than double that of 1919.

Big Increase at Omaha. The College of Medicine at Omaha has shown a 15 per cent increase to date. Dean Cutter reported the following figures Saturday: Freshmen, 76; Sophomores, 68; Juniors, 24; Seniors, 52—a total of 220 advanced medics as against 190 in 1919 for the same days.

Registration in the Arts College has shown a marked increase in Freshmen entrants. Four new classes have been added to handle registrations for courses in English making a total of twenty-six classes in this one subject. Some of these classes have between sixty and seventy students

enrolled and additional sections may yet have to be added to take care of this increase in an efficient manner, according to Dean Philo M. Buck of the Arts and Science College. The course of the graduate college have also shown a gratifying increase, although the post-graduate registration will probably continue for the next thirty days.

The totals for the various colleges, particularly engineering, law and in agriculture have not yet been determined but it is known that these and the teacher's college have materially increased their 1919 records.

Dean Fordyce of the teacher's college notes a decided response to the new course offered in junior high school training for teachers who intend to specialize in this department of public school work in the seventh, eighth and ninth grades. The junior high school has just been established in the University college of education. Professor Earl Lantz, a specialist in this field has been called from his position as superintendent of schools at Ravenna, Neb., to take charge of this work. The work in these grades will be conducted for the benefit of school children coming into public schools in and near Lincoln.

Entrance examinations have been held this week at the office of the inspector of accredited schools for the students desiring to enter the University of Nebraska from non-accredited schools. A larger number than usual appeared this year.

The shortage of teachers in this section of the country is indicated by the 1,880 recommendations made to school boards by the bureau of professional service. Over 1,380 teachers have been placed through this department of the University.

CHURCHES HOLD "OPEN HOUSE" FRIDAY EVENING

Many of the Lincoln churches extended welcome to the University students in an informal manner on Friday evening. The newer students especially took the opportunity to form acquaintances with Lincoln people. The annual church receptions for all students in the University is scheduled for this Friday evening, September 24.

Among those churches which entertained Friday evening were First Congregational, First Baptist, East Lincoln Baptist, First Christian, East Lincoln Christian, St. Paul Methodist, Grace Methodist, Trinity Methodist, Emmanuel Methodist and Holy Trinity Episcopal.

SEASON ENDS FOR NEBRASKA SORORITIES

Freshmen! Wear Your Emerald Headgear Today on the Campus

Wear your green cap today, especially on the campus, if you are a member of the Freshman Class! The caps were sold during registration week and every Freshman is expected to don his headgear today.

For the benefit of those who for some reason or another have not yet secured their green covering, the caps will be sold this week at the College Book Store, facing the campus on R street, and at the Student Activities Office in the basement of Administration Hall. The price for this emblem of class spirit is one dollar as in the past three school years.

It is expected that the Freshman

this year will continue the custom of speaking to every man wearing the green cap. The "wearin' of the green" which started many years ago rather as a punishment to the new classmen has developed into the best way to acquaint the new students with one another. Freshmen organize in this way for the Olympics contest with the Sophomore class which comes later in the fall. This year with the Sophomore class larger than usual, the Freshmen will have to organize and know each other better than ever.

A large number of the caps have already been sold and as many more should be sold in the next few days.

DELTA ZETA AND XI PSI PHI BUY NEW HOMES

Organizations Purchase Houses at Beginning of School Year.

Delta Zeta has purchased a new house at 557 orth Sixteenth Street, and Xi Psi Phi has bought the property on the Northwest corner of Seventeenth and G streets.

The Nebraska Alumni Association of Xi Psi Phi, which is a dental professional society, purchased the house for the men which comprise the Psi Chapter of the fraternity at the University of Nebraska. Xi Psi Phi is limited in membership to students in the Dental College and is one of three national dental fraternities.

Professional fraternities arrived at Nebraska much later than their social brothers, and it was not until December 15, 1905 that a chapter of Xi Psi Phi, at that time associated with the Lincoln Dental College was founded at Nebraska. In December, 1918, the incoln Dental College became a part of the University, and by the 1919 session of the Nebraska Legislature, a College of Dentistry was created.

OVER 600 ATTEND FIRST RECEPTION

(Continued from Page 1). way. There are many memories connected with some of the earlier receptions. The reception held about twenty-five years ago at which the lights went out and candles were used for illumination all evening, will always be remembered by those present.

Many of the out-of-town students saw for the first time the art gallery and became acquainted with the Library Building. The pictures collected by the Art Department were closely inspected by the guests and received much admiration. The necessity for a larger room where students may come together was felt Saturday evening.

FRESHMEN WILL UNDERGO KEEN PSYCHOLOGY TESTS

Famous Thorndyke Mentality Examinations Adopted at Nebraska University.

Upon request of the deans, Freshmen of the resident colleges will be put through the famous Thorndyke mentality tests by the staff of professors in the University Psychology Department. Many of the more important educational institutions use these tests. Columbia is a pioneer in this field. They are very similar to the examinations in psychology given in the U. S. army.

The apparatus for the Thorndyke tests arrived this week. The complete equipment weighs five hundred pounds and will be set up in the new psychological laboratory rooms in Social Science Hall.

Dr. Alexander's Comment. "The idea is eventually to economize the energies of both the University and the student," said Dr. H. B. Alexander, in whose department the work is being done under the immediate supervision of Dr. Winifred Hyde. "A careful analysis of records of these examinations will prove a mine of in valuable information to educators in Nebraska."

It is expected that the results of these tests will supply some very interesting material from which inferences upon some of the vital problems of education can be drawn, according to records produced elsewhere.

Phi Delta Chi, pharmaceutical fraternity, is located at 1237 R street this year.

LOST—One black leather purse, containing a watch and silver money. Notify student activities office.

CLARENCE SWANSON.

Another "bright star" of the Cornhusker grid team. And he has not yet reached his zenith!

Gayle Courtney Walker, '23, of Lincoln, paid the campus a visit from the air in an airplane of a local transportation company Saturday after-

NIGHT CLASSES BEGIN SOON FOR BUSINESS MEN

Problems of modern business will be taken up in a course to be offered this semester especially for the benefit of young men working in business offices.

The classes will be given the first four nights in the week commencing September 27. The College of Business Administration will sponsor the class, which will be taught by the

regular professors. The Credit Men's Association and the business men have strongly endorsed the idea.

One or all of the courses may be taken and the registration fee will be small according to the announcement. The courses offered are as follows: "Principles of Accounting and Income Tax," Monday evenings; "Credit and Collections," Tuesday evenings; "Advertising," Wednesday evenings; "Principles of Economics," Thursday evenings.

THE KREMLIN, MOSCOW Most of the famous buildings of the world are equipped with Otis Elevators THE KREMLIN is the citadel of Moscow. The walls of the triangular enclosure were built in the year that Columbus discovered America. Much of the history of Russia—a dark tale of intrigue, mystery and bloodshed—was enacted in the Kremlin buildings. The present Great Palace dates back only to Napoleon's day, for his soldiers burned the old palace. There are two Otis Automatic Push Button Elevators in the Great Palace. There is another Otis Elevator in the Nicholas Palace. This is significant of the world-wide scope of Otis activities. From the first crude hydraulic elevators to the modern miracle of automatic vertical transportation, Otis has led the way and even now is continually developing new and better methods and machinery. OTIS ELEVATOR COMPANY Offices in all Principal Cities of the World

At the Other End of the Wire A TWIST of the wrist and electricity lights cities and towns, turns the wheels of industry, or affords conveniences to millions of people. But let us follow the wire carrying this energy to its source and we find either a waterfall, a coal mine or an oil well. Much of the supply of fuel in this country is being used up rapidly while the power of water is running to waste. For the rivers and streams of this country could, if properly harnessed, develop enough electric power to save 300,000,000 tons of coal annually. By studying nature's forces—coal, oil and water—by applying them to machines, and finally by the perfection of apparatus to insure uninterrupted power service under varying conditions, the General Electric Company is serving to make electric power cheaper, more plentiful and reliable. GENERAL ELECTRIC COMPANY
