

BASEBALL VARSITY TO MAKE KANSAS JUNKET

(Continued from Page One)
The Varsity played practically errorless ball and hit the ball hard. Carr connected with one for a circuit drive. Carman started in the box for the Varsity and was very effective, pitching excellent ball in the pinches. Atkinson succeeded Carman and held

the second squad to two hits.
The Varsity leaves Wednesday morning at 7 o'clock for Manhattan, Kansas, where the Huskers will meet the Kansas Aggies in a two game series. Coach Schissler expects to take fourteen or fifteen men on the trip. The Cornhuskers will meet the Kansas University team on Friday and Saturday of this week at Lawrence.

Kansas has a fast diamond squad this season and have been winning their practice games with comparatively no effort. The Huskers will probably meet the ir stiffest opposition thus far this season when they meet the Jayhawkers at Lawrence. A big demonstration by the KuKlux Klan of the University of Kansas has been planned for Saturday's contest.

DR. BLANCHE NOTRON TO SPEAK AT VESPER

Dr. Blanche Notron, who has been working for the Near-East Relief fund, will speak at Vespers today. She has been decorated by the King of Greece and is the only woman to receive this honor. Her work has been in Greece and Syria.

CHRISTIAN SCIENCE LECTURE HELD SUNDAY AFTERNOON

(Continued from Page One)
thought above the belief that God's child is either an invalid or a sinner, or that he can be in bondage to any phase of evil.
The evils which seem to be a constituent part of human existence are no part of God's creation. Jesus healed both sin and disease in the same manner and taught his followers to do likewise. When his teachings are correctly interpreted and rightly applied, it is understood that the remedy for sin is the only effectual remedy for sickness.

Throughout the centuries the problem of evil has been a perplexing one and few persons have reached a satisfactory conclusion. Christian Science offers the only practical solution of this question when it declares that evil is neither person, place, nor thing. It possesses neither intelligence, power, nor reality. On this basis it is possible to demonstrate the nothingness of evil and thereby prove the eternal reality of good. The reality of good was the keynote of Jesus' teachings, and this understanding leaves no room or opportunity for the indulgence of evil.

No religious teacher of modern times reasoned along the same lines as did Mary Baker Eddy, the Discoverer and Founder of Christian Science; neither has there been any one who arrived at the same definite conclusions she has so clearly set forth in her writings.

Mrs. Eddy always expressed a kindly sympathy for the honest convictions of those who held to contrary opinions. She left others free to follow the leadings of truth as they understood truth, according to them the sacred rights and privileges she desired for herself. Her success as a writer, teacher, and leader is evidence of her fitness for the great work to which she was called. It is to her untiring efforts that the world is indebted for the unprecedented prosperity of our cause.

Mr. Gross was introduced by Kenneth McCandless, a member of the University society.

OMAHA DAY TO BE FULL OF INTEREST

(Continued from Page One)
Group 11.

Florence Water Works.
Lunch.
Fort Omaha Balloon School and Hydrogen Plant.
Group 12 and 13—Chemistry and Pharmacy.
