JUNIOR CLASS PLAY TONIGHT

Third-Year Students Will Show "The Invader" at Temple Theater Friday Evening.

ALL JUNIOR CAST

Vikings Have Tickets for Sale and Student Body Expected to Pack House.

The junior class will present its play, "The Invader," at the Temple theater tonight. The juniors have not staged a class play for several years and it is somewhat of a novelty for the third-year students to put on a show. The present generation of students will not remember any of the junior plays in the past and will certainly welcome the initiative of the juniors in their effort to give a show this year.

Wednesday night the show was given at the state penitentiary before an audience of about seven hundred people. A large number of students and visitors enjoyed the show besides the many inmates, guards and prison officials. A large number of cars drove out from the city to enjoy the junior show but many were turned away at the door because of the lack of room.

"It was a good show," Warden Fenton stated Thursday to a Nebraskan reporter who sought the attitude of the officials and prisoners on the play. "It ranks with 'It Pays to Advertise' and that was one of the best ever shown here. The prisoners all enjoyed it and believe it to be one of the best ever shown at the institution," the warden added in his recent commendation of the show, and Warden Fenton knows a good show.

"Practicing on Us?"

The prisoners also spoke enthusiastically regarding the show. "The fellows all liked it," said one of the inmates, "they thought it one of the best shows the students had given for some time. Of course there were one or two other good plays but 'The Invader' ranks with any that the University students have given and, to be truthful, is as good as any plays that have ever appeared here."

FOOD AND DRUG COURSE OFFERED NEXT SEMESTER

Pure Food Laws Have Caused Demand for Training Along this Line.

By Prof. J. B. Burt.

Beginning with the next semester, a course of study in food and drug analysis will be offered to the advanced students in the College of Pharmacy. This course is arranged primarily for juniors and seniors in pharmacy who are preparing to take up work in the various departments of the government, or in other fields where the analysis of food and drug products and preparations is involved. The effect of the enactment of the Federal Pure Food and Drug Act, together with the similar laws by the majority of the state legislatures, has been to create a demand for men trained in pharmaceutical chemistry and food analysis, both in the government service and in the employ of private enterprises.

Food and drug analysis should be preceded by or accompanied with the course in the micro-analysis of food and drugs, the two courses being considered as complementary to each other. Special stress will be placed upon the detection of adulteration, cases of misbranding and other violations of the pure food and drugs act. The drugs and preparations most likely to be adulterated will be investigated, together with representatives of the various types of food products, such as the carbohydrate foods, edible fats and oils, spices, flavoring agents, coffee, tea, cocoa and chocolate, milk and its allied products, etc.

COLLEGE OF PHARMACY ESTABLISHED IN 1915

The University, in the spring of 1908, organized the school of Pharmacy. The legislature in the spring of 1915 erected the College of Pharmacy. The purpose of the college is to give the best possible general and technical training in order that students may become responsible dispensers pharmaceutical manufacturers, food and drug inspectors and analysts. Further, the University desires to cooperate with the professional men of the state in their efforts to improve and maintain professional standards in the interest of the public health.

STUDENT HEALTH SERVICE ACTIVE PART OF SCHOOL

All First-Year Students Are Examined as Are Also Participating Athletes.

By Dr. A. H. Webb.

A University activity which is closely allied to the pharmacy department is that of the student health service. Pharmacy hall, room 204, is a busy place the whole day through. It is especially busy during the hours of attendance by the resident physicians; namely, 8 to 10 a. m. and 1 to 3 p. m.

A brief report of the service rendered in the student health department from September 15, 1920, to May 1, 1921, follows:

Female	559
Male	764
Total	1,323

tudents having complete physical examinations (without treatment).
Treatments given:
students 1,160 2,550 3,710
House calls to students 1 10 11
Sent to hospitals 2 5 7

Conduct Physical Examinations.

Physical examinations of all first-year students have been made. Numerous other examinations either at the request of the student himself, of the executive dean or other dean, military department, or athletic department, are made from time to time and such advice or treatment is given as lies within the ability of the staff. Examinations of all male students and all participants in team athletics include examination of urine at the student health laboratory. The services of Dr. Waite at the department of bacteriology are at the disposal of the department making some of the more elaborate laboratory facilities available to those in attendance. The College of Pharmacy provides the student health dispensary with all reagents, solutions, ointments, dressings and drugs used in the dispensary and in addition fill the greater part of the prescriptions written for students by the staff.

The total number of prescriptions issued in the latter way thus far this school year is 3,196. Miss Redfern and her staff of assistants have been a great help in promoting the service of the student health department. The staff have appreciated this helpfulness and feel that here a good example is set to the young pharmacist with reference to the relationship between the pharmacist and the physician.

HONORARY SORORITY FOR PHARMACISTS

Beta chapter of Kappa Epsilon, national pharmaceutical sorority was recently established at the University of Nebraska. The purpose of the organization is to further interest in the pharmaceutical profession among women.

Previous to this time, the girls in the College of Pharmacy at Nebraska have had a local organization. Now that they have become a part of the national sorority, they feel that they have been given definite work to do in the college.

Charter members of Kappa Epsilon at Nebraska are Gertrude Gray, Hazel Hahn, Elsie Halewell, Gladys Easton, Sylvia Malik, Esther Lyman, Alice Barnes and Lucille De Camp.

HUSKER NINE DEFEATS SOONERS

Nebraska Plays One of the Best Games of the Season—Did Not Make an Error.

Nebraska copped the first game from Oklahoma, Wednesday, by defeating the Sooners, 1 to 0. Munger on the mound for Nebraska allowed two hits while the Huskers collected four safe bingles off of Davis' delivery.

Both teams played excellent ball throughout the contest, Nebraska not having a counter in the error column while Oklahoma counted two. The Huskers were able to put across the only run of the game in the seventh inning after Bailey beat the ball to first on Seitz' fumble and went to second on a wild heave by the Sooner keystone sack man, Thomsen sacrificed Bailey to third and McCrory lined one out over third base scoring Bailey for the only run of the game.

Thomsen, McCrory, Bekins and Anderson were the only Nebraska men to connect safely while Cotton and Ogilvie were the only Sooner men to hit safely. Bekins and Cox both had sixteen put outs at the initial sack. Pizer at second played a wonderful fielding game and handled eight hot ones without a slip.

Oklahoma Defeats Wesleyan.

The Sooners scored a decisive victory over the Nebraska Wesleyan nine at University Place yesterday, winning by a 16 to 9 score. The Sooners and Huskers will meet in the second game of their series this afternoon at the State Farm campus at 4 p. m. Coach Schissler will start either Peterson, Schoepel or Carman on the mound. The final game of the series will be played tomorrow afternoon at 3:30 p. m. Following is a summary of Wednesday's game:

Nebraska	ab	r	h	o	a	e
Pizer, 2b	3	0	1	8	0	0
Bailey, ss	3	1	0	2	0	0
Carr, 3b	3	0	0	2	0	0
Thomsen, cf	2	0	3	0	0	0
McCrory, lf	2	0	1	0	0	0
Bekins, lb	3	0	1	16	0	0
Poole, rf	3	0	0	1	0	0
Anderson, c	3	0	1	7	0	0
Munger, p	0	0	0	1	3	0
Totals	26	1	4	27	15	0
Oklahoma	ab	r	h	o	a	e
Haskell, cf	4	0	0	0	0	0
Hogan, 3b	4	0	0	1	2	0
Seitz, 2b	3	0	0	1	4	1
Cotton, rf	3	0	1	0	0	0
Cox, lb	3	0	0	16	0	0
Ogilvie, c	3	0	1	4	2	0
Talbot, ss	3	0	0	1	4	0
Marsh, lf	3	0	0	1	0	0
Davis, p	3	0	0	0	5	1
Totals	29	0	2	34	17	2

By innings:
Nebraska 0 0 0 0 0 0 0 0 x-1
Oklahoma 0 0 0 0 0 0 0 0 0-0
Stolen bases—Cotton, Bekins. Sacrifices hit—Thomsen. Struck out—By Davis, 4; by Munger, 6. Time of game, 1:10. Umpire—Roy Cowell.

SEMI-FINALS REACHED IN TENNIS TOURNAY

Four fraternity tennis teams have worked their way thru to the semi-finals in the University of Nebraska inter-fraternity tennis competition. The four fraternities to enter the next to last round are Sigma Phi Epsilon, Silver Lynx, Xi Psi Phi and Phi Kappa Psi.

The Sig Ep combination of Elliott and Russell have been going strong disposing of the Alpha Theta Chi and Phi Gamma Delta teams by liberal scores.

The Silver Lynx pair, McBride and Matthews won their way into the semi-finals Wednesday by defeating Acacia 6-1, 2-6, 6-2. The Silver Lynx and Xi Psi Phi teams will meet in the semi-finals.

The Xi Psi Phi team of Skallberg and McLeod also rate strong. They have won both of their matches by a liberal margin.

The Phi Kappa Psi pair, Crawford and Altken are strong and will give the Sig Eps a close rub when they meet in the semi-finals. The Phi Psi team defeated the Phi Kappa Chi pair in the second round play.

CHANCELLOR AVERY DEFENDS PHARMACISTS

Profession of Pharmacy Should Include a Broad Training and Not Narrowly Commercial.

Chancellor Avery, Prof. J. B. Burt and H. H. Antles addressed a special convocation in the general lecture room of Pharmacy hall, Thursday morning at 11 o'clock. These talks served as the opening attraction to a week which will be devoted to pharmacy activities.

Chancellor Avery began by remarking that he felt very much at home in the old chemical laboratory where he had worked as a student, professor and head of department, mentioning further the fact that in the old lecture room where he spoke probably 5,000 students at one time or another had been under his instruction.

Following this he gave a short resume of some of the arguments against collegiate pharmacists, the growth of the manufacturing interests and the thought on the part of some that this had made the trained pharmacist unnecessary. He answered these arguments by showing the intense importance of the subject, how a mistake not only might cause human life to wink out or disease to be prolonged, but also that uncertainty on the part of the public mind in regard to pharmacists was a serious disadvantage. He mentioned cases that had come under his personal observation of where poorly trained pharmacists had substituted poisons for remedies due to similarities in names or symbols, and expressed himself strongly in favor of having the pharmacists broadly trained with a chemical, botanical and bacteriological background so that they could do their work properly.

Pleads for Trained Men.

The final plea for the trained men was his use in elevating the intelligence of the community and an understanding of the world at large as well as understanding of the thing at hand. The pharmacist should be one of the group in every village who leads in the intelligent life, who associates with the best trained people in the community and thereby raises the intelligence standard of the community. All of these things according to the speaker are valid arguments as to why the pharmacist should be a well trained man with a professional spirit, prosperous in business, but not narrowly commercial, having in his professional consciousness something more than the main desire to make money. The student should regard himself as one training for successful service and not one trying to fit himself to hold down a paying job.

A. T. O. HAND PHI DELTS 6-1 DEFEAT

The Alpha Tau Omega baseball team defeated the Phi Delta Theta nine in the semi-finals of the inter-fraternity tournament yesterday by a 6 to 1 count. The D. U. and Delta Chi teams will meet today to decide who shall play the A. T. O. men in the final. The finals will be played next week some time.

LUCILLE CROFT TO GIVE SENIOR RECITAL SATURDAY

Lucille Croft, student with Mrs. Will Owen Jones in the University School of Music and student in the school of Fine Arts of the University, will give her senior recital Saturday evening in the Temple theater. Mrs. Jones will play the orchestral parts on second piano.

The program follows:

Beethoven	Sonata, Op. 25
	Andante with variations
	Scherzo
	Funeral March
	Allegro
D'Albert	Allemande
	Gavotte and Minuet
Chopin	Two Preludes
	C minor and A flat major
Schumann	Romance, F sharp major
Granados	A la Cuban
Grainger	Country Garden
MacDowell	Concerto, D minor
	Larghetto Calmato

MISS CLAIRE McKINNON ELECTED TO MORTARBOARD

The election of Miss Claire McKinnon as an honorary member of Mortarboard was not announced when the list of newly-elected active members was published Wednesday. Miss Margaret Fedde, who was elected to honorary membership a year ago, masked Miss McKinnon Wednesday after the masking of the junior girls Miss McKinnon, who is general secretary of the University Y. W. C. A. and will leave this summer to do Y. W. C. A. work in Japan, has been closely associated with the girls of the University for the past two years.

PHARMACISTS' SOCIETY PROMOTES ACTIVITIES

Brings Students into Contact with Leading Men and Has Charge of Elections.

The Pharmaceutical society is an undergraduate organization, the object of which is to bring the students into contact with the leading professional men of the state and elsewhere, and to promote the social life of the students. Membership is open to all students in the College of Pharmacy.

Officers for the first semester 1920-21 were Robert Hardt, president; Ted Smith, vice-president; J. Barrett, secretary-treasurer; Frances Cowger, sergeant-at-arms. For the second semester, 1921, the following were chosen: Joseph Hultman, president; Bernard Neville, vice-president; J. Barrett, secretary-treasurer; Frances Cowger, sergeant-at-arms.

The society has charge of all elections and college affairs. Because there are more students enrolled in the College of Pharmacy this year than ever before, the membership of the organization has been greatly increased.

Publish a Year Book.

The publication of the Year Book of the College of Pharmacy is one of the interesting customs carried out by the society. Pharmacy week, which formerly occurred the first week in May, of each year, was not observed last year on account of the absence of Dean Lyman and Dr. Schneider, who were representatives from the College of Pharmacy, University of Nebraska to the Pharmacopoeia convention held in Washington, D. C. at this time. Although the week was not formally observed, one of the accustomed events of this week, was held later, the annual banquet at the Lincoln which was enjoyed very much by all. In place of any special convocation or talks by prominent men in our profession, from out over the state, we listened in seminar to excellent reports on the proceedings of the U. S. P. convention.

UNION LITERARY ELECTS OFFICERS

The Union Literary society held its election of officers for the next semester, Tuesday evening. The following were elected: President, Robert Eastwood; vice-president, Mary Best; secretary, Lucy Galloway; treasurer, Paul Peterson; sergeant at arms, Hayward Getty; critic, Jack Virtue; historian, Anna Jensen; editor, T. A. Weir.

STUDENT BRANCH A. S. M. E. ELECTS NEW OFFICERS

The University branch of the American Society of Mechanical Engineers elected the following officers Tuesday evening: president, T. A. Weir, vice-president, Raymond Oiler, secretary, Kenneth Kratz; treasurer, Arnold Boettcher; corresponding secretary, Gayle Pickwell.

The business meeting was followed by a program. Miss Hazel Decker, who is to do entertaining and character work on the lyceum circuit this summer, gave several readings. John Hickman, who is training for the lyceum circuit in Canada this summer, gave a violin solo. William Foxwell spoke on the design of airplanes. The serving of refreshments concluded the program.

PHARMACY NIGHT IS CELEBRATED

Give Useful Favors to Visitors—Exhibit Consisted of Drugs and Their Preparation.

DEMONSTRATE PROCESSES

Student Health Department Conducts a Series of Public Demonstrations.

Pharmacy night, observed for the first time at the University as part of Pharmacy week, was held Thursday evening in Pharmacy hall. Strings of colored lights, which extended from the front entrance of the structure to the gates of the campus, were signs of welcome to visitors who attended the exhibition during the evening.

As the visitors entered the hall, the women were given cold cream, face cream and hand lotion as favors, and the men were given tooth paste and massage cream.

Crude Drug Exhibit.

The main corridor of Pharmacy hall contained an exhibit of crude drugs and their preparations. The large main laboratory on the first floor contained students at work making suppositories, emulsions, liniments, cosmetics of all kinds, pills, troches, tinctures, etc.

In the analytical department in the side laboratory, students were assaying drugs and engaged in alkaloidal work. In the dispensary the actual work of filling and dispensing prescriptions was carried on.

On the second floor of the hall, the Student Health department conducted a series of demonstrations. A number of home nursing demonstrations were also given. Microscopic work and an exhibit of bacteriological equipment were carried on in the next laboratory.

ARMY DOES NOT RECOGNIZE PHARMACIST IN WARTIME

Physician, Dentist and Veterinarian is Commissioned When He Enlists.

By Dean R. A. Lyman.

The dean of every college of the University is frequently imperturbed to express his opinion of the importance of the work which his college represents. This is not always easy to do without seeming to advertise one's work unduly. It is fortunate that occasionally some member of another profession speaks in the interest of a related profession. This year I prefer to let a medical man, an editorial writer, in the Journal of the American Medical association, speak in concerning the importance of pharmacy. The following statement appeared in the time of war, in the June 16, 1917, number of the above mentioned journal:

"Physicians, dentists and veterinarians are officially recognized by the government as men of special training, whose technical knowledge can be of use to the nation in time of war. Provision is made so that men in these professions can be enrolled as commissioned officers, and their skill most efficiently used by the army. The pharmacist, however, as a pharmacist is utterly ignored. If he enlists, he does so as a private. So far as official recognition of it is concerned, the science and art of pharmacy might not exist for the army. Today, as never before, victory in war goes to the nation that most effectively conserves the health of its fighting men. The physician is now of such military importance that the medical profession will be called upon to make no inconsiderable sacrifice. It will materially lighten the arduous duties and responsibilities of the physician to have in the army trained pharmacists who will be able to give intelligent co-operation. But it is imposing to great a strain on the patriotism of those whose special knowledge is obviously a large asset
