PROFESSOR DEMING

SPEAKS TO FROSH
(Continued From Page One.)
matter of fact much of the knowledge of the ancients is at the basis of our modern chemical knowledge.
"According to our best observations and authorities," said Professor Deming, "all matter is composed of atoms. Atoms combine together and make molecules. To give an idea of the size of an atom, Professor Deming said that a speck of dust weighing one-five hundred thousandth of an ounce contained as many atoms as there are cubic inches in three thousand cubic miles of stone.
"The air is composed of many molecules, which though not compact are nevertheless present. Half a thimble full of air contains as many molecules as there are drops of water in the Great Lakes.

Electrons Smallest Particles.
"In all atoms are found electrons, the smallest particle of matter known. It takes eighteen hundred electrons to make an atom. They are negatively charged and will respond to positive force. An Englishman by the name of Thompson did much to explain the action of electrons. The discovery and use of the knowledge of electrons has made possible such inventions as the X-ray, and wireless telephone. In an atom there is a positive force in the center surrounded by negative electrons.
Professor Deming demonstrated with some instruments how electrons will respond to a positive force.

TWELVE INITIATED BY DELIAN SOCIETY

The Delians held their first initiation, Friday night, Nov. 18, at the Agricultural college. Twelve people, five boys and seven girls, were subjected to the nerve straining and patience trying ordeal. The evening's horrors were culminated by a grand "feed," consisting of candied apples, doughnuts, stick candy, and bottled milk.

Those taken into membership were:
Frank Cyr
Eulelle Overman
Geneva Wheeler
Russel Chambers
Gladys Lux
Arthur Larson
Robert Ingles
Cecile Thompson
Minnie Johnson
Gladys Wolfe
John Carlson
Esther Scott

WILL BE AWARDED THE SCHWABACHER TROPHY

BERKELEY, Calif., Nov. 23.—The university will officially be awarded the Schwabacher football trophy at the at the meeting of the Pacific coast conference, December 10. The cup was donated by Ernest Schwabacher of Seattle and will remain in possession of the university winning the coast championship for the ensuing year. The awarding of the cup will be perpetual.

RECITAL GIVEN BY MISS MURIEL JONES

Miss Muriel Jones, a faculty member of the pianoforte department of the school of music gave a pleasing recital Monday night in the Temple theater. The skill and rare ability of the musician was clearly shown and the audience pronounced the musicale as extraordinary. The Program follows:
Grieg—Holberg Suite, Prelude, Saracandi, Gavotte and Musette air, Rigandon.
Debussy, Locoata, Reflects dans l'eau.
Scott, Sphinx.
Grainger, Knight and Shepherd's Daughter.
Scott, Lotus Land.
Waltz by Tschalkowsky.
Brockway, Armenian Wedding March.
Scott, Garden or Soul Sympathy.
Dett, Juba Dance.
Grainger, Paraphrase on Flower

FORMER REGENT CHARLES H. MORRILL VISITS CITY

Hon. Chas. H. Morrill, for twelve years president of the board of regents of the University of Nebraska, and director of the Lincoln Land Co. and other similar organizations, has been visiting in Lincoln with his daughter Miss Minnie Morrill, a former student in the University of Nebraska. In the past ten days Mr. Morrill has given a number of luncheons for his friends. On the 26th he gave a luncheon at the chamber of commerce for about twenty-five members of the faculty, who were active in the University during his regency. Mr. Morrill is the most liberal contributor to the University up to the present time and the Morrill Geological expeditions sent out annually by the University of Nebraska, are financed by him.

FERGUSON ATTENDS NEW ORLEANS MEET

Dean is Present at Engineering Section of Land Grant Association.

Dean Ferguson of the college of engineering returned recently from New Orleans where he attended the meetings of the land grant association, November 8 to 10, in which the engineering section discussed methods of improving teaching and problems connected with the administration of an engineering college. Charles R. Richards, former dean of engineering at Nebraska, now dean of engineering at the University of Illinois, was the chairman of the section.

Especial emphasis was laid on the need for engineering experiment stations organized to help develop the engineering colleges in the same way that the agricultural experiment stations aid agricultural teaching. A considerable number of such experiment stations are in existence now, and Kansas state agricultural college, Iowa state college, Illinois university and Penn State are considered representative institutions. Illinois, especially, does a large amount of work along these lines.

APPOINT COMMITTEE FOR INVESTIGATION

BERKELEY, Calif., Nov. 30.—Owing to the high cost of room and board at private rooming houses here, a committee has been appointed to examine the living condition of the university students. It will act in conjunction with the dormitory committee, which is formulating plans for the erection of several dormitories. At present there are none at the University of California, so non-organization, students are forced to pay exorbitant prices, in many cases, for rooms and board.

MUSEUM RECEIVES GREAT HORNED OWL

Mr. Harvey F. McDougal, University of Nebraska, 1925, captured and brought to the University Museum an excellent specimen of the great horned owl, which has been mounted by Mr. J. T. Zimmer. It will form a part of a group. The bird measures 4 feet, 7 inches from tip to tip of its wings.
