Valley conference decided to hold the annual indoor track and field meet in Kansas City on March 25. There are nine schools in the conference and all will send full teams here for the meet, it was stated.

The awarding of the annual outdoor track meet was left undecided with the impression prevailing, that the date would be late in May, with Lawrence, Kansas, the probable location.

Other track meet dates decided upon at the conference were as follows: Drake relays at Des Moines, Iowa, April 23; Missouri vs. Oklahoma university at Norman, Okla., May 13; Missouri vs. Kansas at Columbia, Mo., May 20.

The other football schedules arranged at the conference are as follows:

- ...Missouri:
October 14—Ames at Ames.
November 4—Kansas Aggies at Columbia.
November 11—Oklahoma at Norman.
November 30—Kansas at Columbia.
Kansas Aggies:
October 14—Washington at St. Louis.
October 21—Oklahoma at Norman.
October 28—Kansas at Manhattan.
November 4—Missouri at Columbia.
November 11—Ames at Manhattan.
November 18—Drake at Manhattan.
Washington:
October 7—Rolla at St. Louis.
October 14—Kansas Aggies at St. Louis.
October 21—Drake at St. Louis.
October 28—Ames at Ames.
November 4—St. Louis at St. Louis.
November 11—Grinnell at Grinnell.
November 18—Missouri at St. Louis.
November 30—Oklahoma at St. Louis.
Oklahoma:
October 14—Oklahoma A. & M. at Stillwater.
October 21—Kansas Aggies at Norman.
October 28—Nebraska at Norman.
November 4—Kansas at Lawrence.
November 11—Missouri at Norman.
November 18—Ames at Ames.
November 25—Texas at Norman.
November 30—Washington at St. Louis.
Kansas:
October 14—Drake at Des Moines.
October 28—Kansas Aggies at Manhattan.
November 4—Oklahoma at Lawrence.
November 11—Nebraska at Lawrence.
November 30—Missouri at Columbia.
Drake:
October 14—Kansas at Des Moines.
October 21—Washington at St. Louis.
November 4—Ames at Des Moines.
November 25—Grinnell at Des Moines.
Ames:
October 14—Missouri at Ames.
October 21—Grinnell at Grinnell.
October 28—Washington at Ames.
November 4—Drake at Des Moines.
November 11—Kansas Aggies at Manhattan.
November 18—Oklahoma at Ames.
November 25—Nebraska at Lincoln.
Grinnell:
October 21—Ames at Grinnell.
November 4—Washington at Grinnell.
November 25—Drake at Des Moines.

SOIL CONSERVATION AND SURVEY DEPARTMENT UNDER-TAKES MANY ACTIVITIES AND STATE PROJECTS

There has grown up at the university during the past few years an extensive conservation and survey division which performs a number of duties for the state at large and offers graduate work in the instruction division of the university. The duties of the division, as defined by the statutes of the state, are grouped under research surveys, information bureau activities and publications. No part of the university is in closer touch with the people of the state than this division. The first floor and a part of the basement of Nebraska hall are well equipped for soil survey, geological survey, water survey, forest survey, the information bureau and for bulletin writing, etc., and to this place many citizens of Nebraska and other states make their pilgrimage every day. The division has published more than forty bulletins on Nebraska resources and industrials for general distribution.

Opportunity is here offered graduate students to work on special problems but only those students who are in a position to devote their time nearly exclusively to research are permitted to register. The industrials, soil, conservation, geographical and geological departments of the division afford opportunities for graduate work, the expense of which is met in whole or in part with state funds.

The state soil survey of the division completes from four to six counties a year and has finished to date more than forty of the ninety-three counties of the state. The field work, transfer work and bulletin writing are directed from the university office but the publication of the county reports is done by the United States bureau of soils at Washington. The field work is done by both state and federal men.

The geological survey studies the structure, topography and mineral resources of the state and carries on special investigations relating to geological problems, such as oil and gas possibilities of the state, the amount and distribution of building stone, the occurrence and testing of brick materials and the distribution of the various mineral resources.

The geographical department of the division, co-operating with the U. S. department of agriculture is making a careful investigation of the agricultural geography of Nebraska. The work covers land classifications and utilization, the distribution of crops and the relation of climatic elements to agriculture. The land classification has been completed in most of the eastern and central counties of the state.

The forest survey co-operates with the soil survey in the study of forest distribution and the utilization of trees. It describes these conditions by means of maps and bulletins. A member of the division, known as state forester assists in developing the forest resources and planning town and city parks.

The road materials survey work of the state is done in a department of this division but in co-operation with the department of public works at the capitol. Road building materials are studied in the field and tested in the laboratories of the university. More than 300 pages have been published on the road materials of Nebraska.

The survey of the state's resources and industries, includes a close investigation of the occurrence and distribution of the resources and of the operation, production and importance of the leading industries.

Two phases of conservation—prevention of gastage and efficient utilization—permeate the work of the division, but specific problems arise for investigation, such as those of the potash industry, prevention of soil erosion, use of fertilizer for certain soil types, correction of sour soils, utilization of rough lands, improvement of grazing in the sandhills, forestation of sandhills, correction of water supplies, increasing the efficiency of industrial operations, and town and city planning. This service is performed by specialists of the division and by members of the university faculty selected for the work in which they are especially qualified, their expenses being paid with state funds.

(Continued on Page Four.)

The Sheik.
The Lyric presented Rudolph Valentino and Agnes Ayres last week in the much talked of photo-play "The Sheik." The play was admirably presented with Valentino up to his standard. The scenes were beautiful, being set in the desert lands of Arabia. Miss Ayres did an especially good piece of work, as the young English girl stolen away in the middle of the sands by an educated Arab chieftan.

Christmas cards should be ordered now. George Bros., Stationers, 1215 N street.
First grade cowhide brief cases, 5 pockets, \$9.75. A big Xmas value. George Bros., 1213 N street.
