THE NEW REGISTRATION.

The tiresome waits of former registrations have been eliminated this semester—if students will only take advantage of the new system in vogue for the first time. At first, it seems as if the students are not going to take advantage of this new easy method of getting the second semester started nicely and are going to wait until the last day for registration for enrollment. If this is done, there will be the long lines, and the dreary waits so dreaded in the past. Not only will the mental and physical of students suffer, but the pocketbook, as well, for the three dollar late registration fee will be charged against all those who are not completely ready for the second semester when it arrives. If you want to make it easy for yourself and for the faculty register TODAY!

THOSE RESOLUTIONS.

Each New Year brings with it a host of resolutions planned to better in many ways the individuals who make them. A great many of these are broken soon after they are made, and psychologists tell us that one is weakened by the breaking down of our temporarily inspired will power. Perhaps making and breaking resolutions does have some psychological effect, but nevertheless it shows a wholesomeness of mind and spirit, for if there had been no little dissatisfaction in the fallings and lack of accomplishments of the year just past there would be no inward examination. The resolutions show that there is a desire to do better, to live better, and to be better. As an indication of the mental attitude of the people whom you know, you can take the New Year resolutions as a good sign, for they represent a constructive spirit.

Contemporary Opinion

(Syracuse Daily Orange.)
ARE YOU BUSY AND LAZY.
(Woman's Staff.)

Is busy-ness proof against laziness? Is the college student not justified in spreading his interests thinly over many things when there is such a host of things that demand his attention? To face the problem squarely is to answer negatively. The purpose of a college student is, fundamentally to be a student.

Physically the student is not lazy. The man who had to follow in the foot-steps of one of us for a single day would be convinced of this fact by his very weariness. But does the thorough integrity of our daily routines extend into our mental lives? Frankly it does not. Activities, classes and social affairs lead us to a place where we have no time for serious work. We attempt to work but our minds wander into channels of lesser resistance. In brain mental hunger is unknown to the student; his only salvation is in rigorous self-discipline. Without discipline his mental life becomes a mere form. Laziness is the student's greatest peril. Mental inertia must be overcome if the undergraduate student is to be successful.

Cornhusker Queries.

Q. Who was the first professional coach of the football team?
A. Crawford, an old Michigan star, was the first professional coach of the team. This was in 1892 and the team passed the year without a defeat.
Q. What was the earliest regular publication on the campus?
A. The earliest regular publication was the Hesperian Student established about 1871 or 1872. The paper was managed entirely by the students, but received a little financial aid from the regents.

Q. How many students were registered, during the first year of the University?
A. During the first year 130 students were registered, all but 20 of whom were in the two sub-freshman years, called the Latin school.

Q. Who was the first woman to teach at the University of Nebraska?
A. Miss Ellen Smith was the first woman to hold a teaching position at the University.

Q. Was tennis ever an important sport at the University?
A. The tennis association of the University was organized in 1890. The tennis teams were never under the jurisdiction of the athletic department until 1912.

In Years Gone By.

Eighteen Years Ago Today.
The eleventh annual exhibition of the Nebraska art association opened. The collection consisted of over one hundred and thirty-five pictures, most of which were selected by Miss Cora E. Parker of New York, former instructor in art in the University.
Fifteen Years Ago Today.
With the departure of Former Chancellor E. Benjamin Andrews on New Year's day, Professor Samuel Avery became acting chancellor of the University of Nebraska. Chancellor Avery began his duties at once and was an occupant of the executive office in the administration building when the students returned from vacation.

Twelve Years Ago Today.
The following paragraph appeared in the Daily Nebraskan: "The feminine reporters of the Daily Nebraskan are in a quandry. They are conscientious workers, and wish to see the columns of the 'rag' brimming over with interesting news—but these January Sales! Even the most unfeeling man cannot blame the co-eds for spending hours in the purchase of a last summer's hat—for has not its price now fallen from \$5.00 to \$4.68?"
Nine Years Ago Today.
The Cornhusker basketball team left to battle the following day with the soldier quintette at Fort Dodge, Ia. The next night they expect to meet the basketball team of Hamlin College, at St. Paul, Minn., and then cross the river for a two game series with the Minnesota Gophers.

The Calendar.

Thursday, January 5.
Sigma Gamma Epsilon meeting, Museum.
Lutheran club meeting, 7 p. m., U 102.
Freshman commission dinner, 6 p. m., Ellen Smith hall.
Friday, January 6.
Delian society meeting, 8 p. m., Faculty hall.
Senior prom, Ball room, the Lincoln.
Farm House banquet, Garden room, the Lincoln.
Saturday, January 7.
French club, 6 p. m., Faculty hall.
Farm House fall party, Ball room, the Lincoln.
FRI
Freshman hop, Rosewilde party house.

University Notices.

Pershing Rifles.
The first meeting of the Pershing Rifles for this year will be held Thursday, January 5, at 7:30 p. m. in Nebraska hall. All members are urged to be there on time.
Commercial Club.
Meeting of the University commercial club, Thursday at 11 a. m. in 305 Social Science. Mr. W. L. Hall, an experienced financier and business man of Lincoln, will address the members.
Athletic Meeting.
Important meeting of College Athletic representatives, Thursday at 4 p. m. in the Athletic office.
R. O. T. C.
1. The gallery range will be open until January 15th to all men who have not as yet fired the prescribed course.
2. During January certain targets will be set aside for use of all men who desire to try out for the all-University teams.
Lutheran Club Meeting.
The Lutheran Club will meet at 7 o'clock Thursday evening in U hall 102 instead of S. S. 113 as announced in the Wednesday paper.
Committee Meeting.
All university party committee meeting, Friday, 5 o'clock, Ellen Smith hall.
University Night.
An organization on individual division of having a skit for university night must have the writeup in by Sunday, January 15. Get in touch with J. Wilbur Wolf, chairman. Telephone B-1506.

Industrial Research Club.
There will be a meeting of the executive committee of the Industrial Research Club today, 6 p. m., Grand hotel. Important.

Society.

SOCIETY
Announcement has been made of the engagement of Miss Ruth McDonald of Omaha, daughter of Mr. and Mrs. Henry S. McDonald, to Charles A. Fossum of New York City and Manila P. I. Miss McDonald is a graduate of the University of Nebraska and a member of Kappa Kappa Gamma. After completing her course at the university in Lincoln, Miss McDonald took post-graduate work at Columbia university, and during the war took the nurses training course at Vassar college. She has been in social settlement work in New York. At present she is in Manila, visiting at the home of Mr. and Mrs. C. M. Cotterman. Mr. Fossum is Manila manager of the American Iron Products company. After their marriage the bride and groom will make their home in Manila.

EXHAUST

After lamping "Tol'able David," in which Richard nearly prostrated, along with the audience, while he feuded so gracefully, we wonder why we thrill at the cinema. It must be wonderful to be a filmy star with filmy garments and enjoy a lot of publicity and notoriety. Mary Pebleford says she didn't spend even a little \$3,000 on her get-up and that aris is a nice quiet place once the de- of "Three Mustybeers." —Ormar.

At The Theaters.

Orpheum.
Corinne Tilton in her "Chameleon Revue" headlines the Orpheum bill this week. Miss Tilton is exceedingly clever in all her work and her scene in "Egypt" is a riot. The act is nicely staged and all the people dance well. Benny and Western are another big reason for the acts great success. Mrs. Gene Hughes and Co. in "Contented Peggy" went over big. Mrs. Hughes as the contented wife of the ex-ditch-digger was very funny. The act is almost on the same lines as "Bringing Up Father" and really ought to be called "Bringing up Mother." Ed Morton sings some clever songs in his usual pleasing manner. The Roos do a good trapeze act. Miss Gordone has a posing act that is entirely artistic. Probably the best received number was Joe Bennett and his dancing. As an eccentric dancer, Bennett has them all beat. Jim Toney and Ann Morgan in "You Know What I Mean" were a big hit. Toney has a good many new ones and not least among them is his fall. The bill as a whole is one of the best the Orpheum has had this season.

**AG. COLLEGE OPEN
HOUSES IS TODAY**

All Departments of Farm Campus Open To Visitors During Entire Day.

"Welcome" will be the greeting to every one on Thursday, January 5, when the agricultural engineering department will be hosts to the public and will throw open its doors and invite the public to inspect its building and equipment during the time when all laboratories and shops are in operation. All branches in the department will be on complete working orders during the afternoon from three to five and during the evening from seven to nine. Those who cannot attend during the afternoon will be given an opportunity to see the same operations and performances in the evening.

The agricultural engineering building is one of the latest additions to our "Greater University" and is situated on the agricultural college campus at the north end of the rectangle. It is the largest and best equipped building of its kind in the United States and for this reason has been getting students from various corners of the country who wish to obtain advanced training along agricultural engineering lines. The equipment is modern in every respect and is installed in such a way as to give the students a thoro and practical training.

The farm machinery branch has a working specimen of practically every modern farm implement that is being used on the farm and are so arranged on pulley wheels protruding thru the floor that the drive-wheels of the implement are turned and the working mechanism run exactly as the machine would operate in the field. For instance the bull wheel of a binder is set upon the drive pulley in the floor and altho the binder itself re-

mains stationery the sickle, elevators and handle mechanism are operating just as tho the binder were moving. The assembly of all this modern machinery alone is well worth one's while to see, but to view the field operations of every piece in a well lighted and heated room is something that should not be missed.

The gas engine branch is equipped with a model of the common engines used on the farm together with several automobile and tractor motors. These engines are so arranged in the laboratory that every detail from the carburetor and ignition to the valve operation can be studied effectively by the student.

A special laboratory is equipped to study and test magnetos and battery ignition systems that are used on most gas engines. Most of these engines will be in operation during the afternoon and evening by students and the details of every operation will be fully explained to any who are interested. Tests will be run on several types of motors to determine horse power, cylinder pressure, fuel, economy, etc.

Blacksmith Shop.

The blacksmith shop contains forty-two full sized and complete forges which will all be operating together during the afternoon and evening. The student here is given practical training on constructing and repairing minor machinery parts. Every stage of each operation will be shown by the students operating the forges and all details will be gladly explained. Most farms are now equipped with a small forge in the corner of the work shop and the instruction gotten by the student here carefully fits him to use it in a way that is bound to save money to the farmer.

Students are given expert training in the use of wood in one of the most up-to-date carpenter shops that could be equipped. Work benches with a complete set of carpenter tools are provided for each student. Machinery such as planers, band saws, circular saws, mortise and tennon machines, etc., are at the disposal of the students so that a desk or table can be completely made in the shop without the help of outside machinery. The student is indeed fortunate who is able to take work here. Special attention is given to repair work that is likely to be encountered on the acreage farm and the student is shown the best and most practical way to fix it. Lathes are installed for the more advanced students who desire to make something more ornamental than that which is given in the elementary course.

Farm Equipment.

As opportunity to see a farm lighting plant in operation will be given in the electrical laboratory where several of the best known systems will be running. The single unit as well as the two unit systems will be shown and also the method of using the storage battery in this connection. Competent students will gladly explain all details to interested visitors and will show the best method of operating each system.

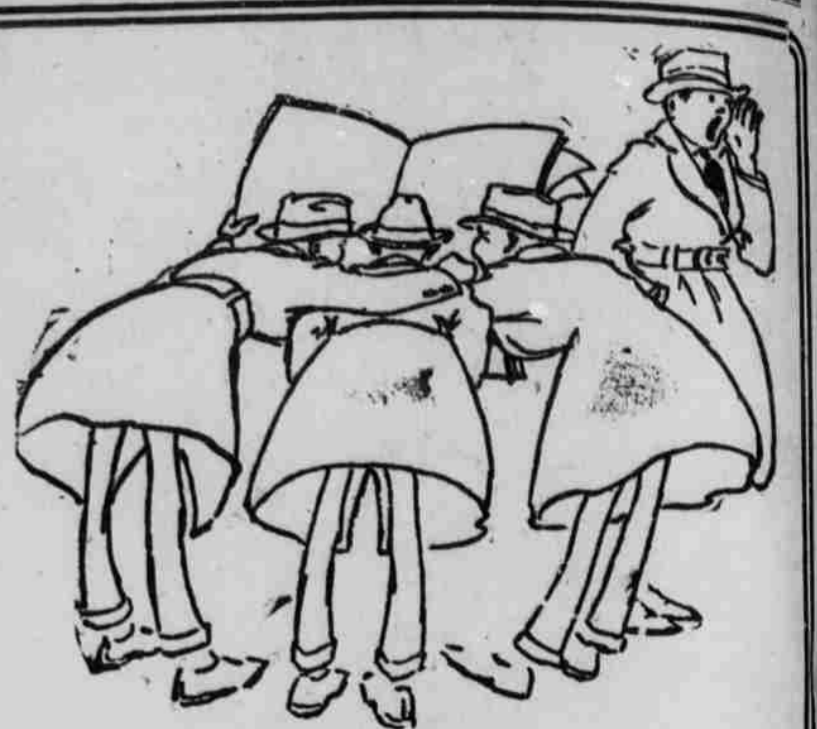

Irrigation and drainage problems are solved in the hydraulic laboratory which will have in operation several types of pumps as well as different methods of measuring the flow of water thru the open ditch. The equipment is complete in every way and the student is taught how to master the problems of irrigating or draining his own land.

The tractor testing equipment, the same that has been used in testing more than eighty tractors, is situated in a building by itself in the rear of the main building. The opportunity of seeing a tractor under test, of seeing exactly what was done to those eighty tractors when they passed thru this plant should not be overlooked by any one. The interest shown thruout the United States and other countries in the Nebraska tractor tests is so great that there is serious talk of accepting the results as standard thruout this country. So don't miss the opportunity of seeing the testing equipment and a tractor really under test.

All those branches of the department will be running full blast and every courtesy will be shown by the students and instructors to the visitors in an endeavor to show them thru this modern building and explain the operation of various laboratory exercises. Guides will be provided by the department and the inspection taken in by groups of visitors if they so desire. Tell your friends about this big occasion and come yourself and see the best agricultural engineering building in the United States.

WANT ADS.

LOST—GOLD WRIST WATCH, Between social science and McKinley school. Call L-8085. Reward.
WANTED—THREE GOOD BASKETBALL players. Call L-7748 at 6 p. m.

Hey, Fellows!
Magee's Ad says they're selling Manhattan Shirts mighty cheap also
Neck ties at 1-2 price
Underwear at 1-5 off
Caps at 1-5 off
Better get busy and buy your needs.

MAGEE'S
Quality Clothes

STUDENTS!

Where do you lunch after class? Luncheons served in combinations from 11:00 a. m. to 7:00 p. m.
