

## SENIOR GIRLS VOTE TODAY FOR A MAY QUEEN

### BIG FEATURES FOR ANNUAL ENGINEERS NIGHT THIS YEAR

Chairman Upton Announces Completion of Preparations For Yearly Celebration

ALL LABORATORIES AND SHOPS OPENED

Expert Attendance Record to Exceed Last Years 2000 Mark—All Departments Open

Dean Ferguson, of the Iowa State College (Ames) who is to speak to the Engineering students at their special convocation Thursday morning.

### DEAN FERGUSON NEBRASKA GRAD

Engineering College Dean Graduated From Husker Engineering College in 1903

"A prophet is not without honor in his own country," is a saying that has been disproven many times, and Dean Ferguson is another case in which this has been disproven; for not only is this his own country, but he is highly honored by both students and faculty.

His early schooling was at Dorchester and Crete, from where he came to Lincoln and graduated from the Engineering College in 1903. On receiving his degree he went to Schenectady when he took the General Electric Company's testing course, and then went into their transformer engineering department.

In September 1905, he went to Union University at Schenectady as instructor and later Professor of Electrical Engineering, working directly under and with the world famous Dr. Steinmetz. While here he did some part time work with the G. E. Co., in various departments.

In 1912 he was offered the position of Professor of Electrical Engineering and Chairmanship of the department, which position he accepted. While Dean Stout was in the army, Prof. Ferguson was made acting Dean, and on June 1, 1921, when Dean Stout was retired, succeeded to the position as Dean.

During the war, he had charge of the engineering portion of the instruction in the S. A. T. C.

He is the author of two text books in common use, one of which, "Elements of Electrical Transmission," published in 1911, immediately supplanted other texts in 30 or 35 schools. His latest work, "Electric Lighting" was published in 1920.

He is an active member of Sigma Xi; honorary member of Sigma Tau; fellow A. I. E. E.; member of Illuminating Engineering Society; Society for Promotion of Engineering Education and of the National Electric Light Association.

### AG MEN EXTEND BEST WISHES TO ENGINEERS

Just as the deadly calm comes before every storm so the publicity campaign of the Farmers aFirm will remain quiet throughout this week in all respect to Engineers Week, that great college event of part of the University, and through the columns of the Daily Nebraskan the Ags extend to the Engineers their best wishes of good fortune and success in their great undertaking.

### History Of Kosmet Club Shows Ten Years Activity On Campus

On May third, ten years will have passed since the first Kosmet Klub play was produced at the University of Nebraska. The history of the Klub since that date forms one of the interesting chapters in the records of organizations at this school. When the "Knights of the Nymphs" is presented at the Orpheum next Monday afternoon and evening, it will be the eighth performance sponsored by the men of the Klub.

For two years, the membership of the Klub was reduced to almost nothing due to the war, when most of the active men were in the service. Nevertheless, the Klub sponsored and was in direct charge of most of the war drives conducted on the campus during this time. Re-organization took place last spring when the play "The Most Prime Minister," raised the Klub to the high standard it has always maintained in the eyes of the student body.

Unknown to many people, the Kosmet Klub was probably the direct outcome of the first junior play given at Nebraska. The success of the play which was given during the winter of 1910-11, led to the belief that a successful honorary dramatic

organization for men of the upper classes could be formed here. The Klub was thus organized, similar to the organization of other like clubs such as the "Haresfoot" club at Wisconsin, "Mask and Wig" at Pennsylvania, and the "Black Friars" at Chicago.

Membership is limited to fifteen men, two-thirds of whom are from the two upper classes. The plan of the organization to produce each year an original musical comedy written and produced by students of the University or by parties connected with the institution has been closely adhered to. The high class nature of the Kosmet shows have made them exceedingly popular among the students and interest in the plays reached a maximum this spring when scores of men and co-eds appeared before the committee from the club to try out for positions in the 1922 play. Response to the ticket sale campaign which is being conducted on the campus this week in preparation for the show next Monday, indicates that the Klub will reach a new high point in quality and success, preparing the way for an even more successful decade than the ten years past.

### ANNUAL BANQUET FOR ENGINEERS SATURDAY

Prof. V. L. Hollister of Electrical Engineering Department and Other Speakers to Talk

The Engineers Banquet at the Lincoln Hotel, Saturday, April 29, is the culmination of the activities of Engineers week. A fine toast-list has been prepared and preparations are being made for a record-breaking crowd. Among the speakers are Prof. V. L. Hollister of the Electrical Engineering department and Mr. Walter S. Byrne, Sales Manager for the Nebraska Power Company of Omaha. Mr. Earl Campbell of Lincoln has been secured as toastmaster. Music will be furnished by the Engineers Orchestra under the capable leadership of Bertman Ellsworth.

The most important feature of the evening's entertainment will be the appearance of the "Sledge," the hard hitting scandal sheet, upon whose yellow pages the faults, mistakes and misdoings of members of the college will be exposed. No matter how well an engineer may think his overt act has been concealed or to what lengths he has gone to prevent the knowledge of his misdeeds from being spread abroad, the sledge will find him out. Its origin is a dark mystery, but its yellow fingers reach into every corner of the campus and ferret out the truth about all secret ambitions and misdeeds.

Tickets for the banquet can be obtained from any Engineers Week Committeeman. Get yours while they last.

### COLE TAKES CLASSES TO OMAHA TO STUDY

Professor Dana F. Cole of the Accounting Department will take his classes in Cost Accounting and Advanced Accounting in Omaha, Friday, April 28th. The day will be spent in making a study of Accounting as it is applied in the various business firms of Omaha.

### ENGINEERS TO GIVE DANCE FRIDAY NIGHT

The climax of Friday's activities will be staged at the Rosewilde Party House in the form of the Engineer's Annual Dance.

A big treat is in store for the Engineers and all who attend are assured a splendid evening of entertainment. Watson's six piece orchestra has been engaged.

Big dance at the Chamber of Commerce May the 5th. Get your dates early.—Adv.

### BOG SCOUT TRAINING COURSE ENDS TONIGHT

The nine weeks training course for the boy scout leaders came to a close Tuesday evening with an outdoor Mulligan stew given by the Lincoln Council to all men who attended the course. The training included tying knots, first aid application, signalling, hiking, games, story telling, cooking, knowledge of trees, birds, stars, organizing, the fundamentals of scout character building and citizenship training. A group of men gathered around the camp fire of the boy scouts and watched Ray Zimmer, Ward Betzer, E. M. Sam and W. A. Evans, who were passing their cooking tests under O. T. Rompke, scout master, prepare a Mulligan stew.

The men who took the nine weeks training course now have definite positions in scout work. Diplomas will be awarded by the University Extension Department.

### NEW SPHINX MEMBERS INITIATED THURSDAY

Fifty-Four Chosen to Membership in Sophomore Honorary Society—Banquet Sunday

The new members of the Iron Sphinx, the honorary sophomore men's organization, were initiated into the secrets of the Sphinx Thursday evening, April 20th. The fifty-four new members, together with the old Sphinx whose places they were taking for the coming year, gathered together Sunday night at the Garden room of the Lincoln Hotel for the Annual banquet for the institution of the new members.

Promptly at six o'clock Thursday evening the candidates were arraigned before the active chapter at Twelfth and High streets for the regular initiation. Action began promptly upon the hour and the new Sphinx were put through a regular set of war drills to prove their capability of being Iron Sphinx.

At six-thirty Sunday night the Sphinx gathered at the Lincoln for the annual banquet. The function was well prepared and the occasion took on a rather serious air. Prospects for the activities of the Sphinx for the next year were reviewed with much interest and ways for the betterment of the Sophomore class activities were discussed. A five-course dinner preceded the Toast list.

Rex Smith acted as Toastmaster of the evening and he introduced the following men to Toasts:

- I. E. J. Evans.
- R. Addison Sutton.
- O. C. B. Hall.
- N. Giles Henkle.
- Sphinx, Rev. D. R. Leland.

The Reverend D. R. Leland spoke briefly, emphasizing the importance of the class organizations made necessary by the lack of a large enough gathering place for the students of the university. He reviewed the activities.

### PROGRAM IN OMAHA BY UNIVERSITY STUDENTS

A group of about twenty-five University students, upon invitation of the Omaha high schools, presented a group of musical skits for the high school students there yesterday. The performance was staged three times, the first at 8 a. m. at the Rialto for Central high school students, showing to 3,000. It was staged again at 10 for South high school, and at 2 p. m. for Commerce.

The party was under the management of Phyllis Unthank, and received only their expenses for their trip.

### ENGINEERS FIELD DAY CARNIVAL TO BE BIG AFFAIR

Monstrous Parade and Demonstration Starts Festivities Early Friday Morning

BEAUTIFUL FLOATS ARE PREPARED FOR PARADE

Valuable Drawing Set Donated by "Red" Long to be Prize For Athletic Contests

The zero hour is 8:45! Every loyal Engineer out for the best Field Day yet!

For at precisely 8:45 o'clock on Friday morning, April 20, the Engineers will inaugurate the biggest and best Field Day of them all. Starting with the monstrous parade which is scheduled to leave the M. E. building at that hour, the day will be one long event of surprises and enjoyable features.

The parade itself will be the shining star, with its Sousa's Band, beautiful floats and mile-long procession of loyal Engineers. All departments will be represented; the M. E.'s will show the people what makes the world go round; and E. E.'s will show the many arts of their profession; the C. E.'s will give forth the information that they intend to take life easy after getting pushed out of school; the Arch. E.'s will take great pride in showing their addition to the world of art, the new Nebraska Capitol; the Ag. E.'s will show a few appliances which can be used to make the farmer's life easier; while the Chem. E.'s will show the importance of chemistry to the world. Then, of course, the A. A. E.'s will demand their rightful place in the sun.

After passing around the campus, the parade will satisfy the curiosity of the great public by passing down O street to 15th. The trucks will proceed back to school while the mob of embryo engineers will go to the Ag. College field to participate in the many other important events of the day. Immediately after arrival, the inter-class baseball tournament will start and from hot dope from the inside, some very interesting games are on schedule. Immediately following the final ball game, luncheon will be served at the Farm Cafeteria.

After luncheon, the contest for Red Long's prize will begin. This prize is a \$50 set of drawing instruments and will be given to the man scoring highest in the total number of events. The events are boxing, track, (100-yd dash and broad jump) baseball, level race and baseball throw. To be eligible for the grand prize, contestants must enter at least three-out of the five events and will be scored according to the showing he makes. Impartial judges will be on hand to see that every man receives a just and fair trial.

In the line-up of these events, the boxing matches will come first in the afternoon. Contestants will be matched according to weight and two 2 minute rounds will be held. They will be considered as sparring matches and judging will be on points only.

The next event will be the hundred yard dash. Contestants will start on the gun and will be scored in the order they cross the finish line. Immediately after this the baseball throw will be held, a regulation baseball used. Contestants will be allowed an unlimited run, but must not cross.
