HUSKER TRACK MEN IN CHICAGO MEET

Nebraska Squad of Eight Tracksters
Competes With Stars From 53
Schools Today

(Special to The Nebraskan)

CHICAGO, Neb., June 16.—The University of Nebraska squad of eight tracksters, who arrived here last night to engage in the national intercollegiate track and field championship Saturday, are all in the best of physical fettle. Coach Schulte arrived here a day ahead of his tracksters. The Nebraska athletes are rated as one of the high teams in the meet and are expected to place better than the sixth position which the quintet of Cornhuskers acquired in the 1921 meet.

Captain E. G. Smith who equalled the Missouri Valley record in the 100-yard dash and broke the Valley record for the 220-yard event, heads the Nebraska team. He is rated as among the leading dash men to compete in the big meet.

Captain-elect Kenneth Hawkins and Ted Smith are entered in the quarter mile and are expected to bid stroug for honors. Moulton will compete in the shot put and discuss throw. Herbert Gish will run the high and low hurdles.

"Hobb" Turner, winner of the running high jump in the Valley meet, will also make the trip. "Mud" Gardner will compete in the mile and 880-yard runs. E. V. Allen, another Missouri Valley medal holder, will run the mile and half-mile events. He is expected to place.

Thousand Athletes Entered

CHICAGO, June 16. Stagg field swarmed with athletes today for the preliminaries of the annual intercollegiate track and field championships to be held there under the auspices of the University of Chicago. The finals will be held Saturday.

With more than 1,000 athletes entered, including the greatest college stars of the country, an assault upon records that have stood for years is expected.

Illinois and California continues to stand out as probable rivals for top honors. The Californians won the intercollegiate meet and Illinois is the "Big Ten" champion. Each school will be represented by a well-balanced team interspersed with a formidable galaxy of stars. Nebraska, Missouri Valley track champions, are also given high rating. Captain Smith is regarded as one of the fastest 100-yard and 220-yard men in the country.

Pennsylvania, Notre Dame, Grinnell and other colleges have men entered that are considered certain point winners.

With blue law officials taking the sun out of Sunday and police, deputy sheriffs, constabulary and federal agents taking the moon out of the other six days, about all the average citizens sees is the stars. — Denver Times.

Who's Who in the Faculty

There is probably no member of the university family who does more to introduce the university to the people of the state than does A. A. Reed, head of the extension department. By means of close contact with all schools of the state and through a bulletin issued from this office, Mr. Reed keeps the "doings" of the university ever before the school people of the state. His work along this line is largely responsible for the overwhelming increase in the summer enrollment this year. Professor Reed also holds down a position as state inspector of accredited schools and through his work in this connection he has an opportunity to witness the workings of the entire Nebraska school system.

A. A. Reed is an alumnus of the University of Nebraska having received his bachelor of arts degree in 1898. He was awarded his master of arts degree in 1912. He has had wide experience in public school work, having served as a teacher in the rural schools, as ward principal at Beatrice,

village principal at Odell, county superintendent of Gage county, city superintendent at Crete, high school principal at Keokuk, Ia., and city superintendent at Superior.

Professor Reed joined the staff of the Nebraska faculty in 1907 when he was made state inspector of accredited schools and assistant professor of secondary education. In 1908 this department was organized as a part of Teachers college.

Professor Reed had charge of the bureau of recommendation of teachers until a short time ago when Teacher's college was reorganized. He took charge of this department in 1909 and conducted it most successfully for more than ten years.

Professor Reed has had charge of the extension department since 1911. He has had charge of the general supervision of the summer sessions since 1909. His efficient work has won for him hundreds of friends not only among educators of the state but among students of the university.

A. A. REED,
Head of the Extension Department

VOCATIONAL TEACHERS IN 3-DAY CONFERENCE

Thirty-five Instructors of Vocational
Agriculture Attended the
Meetings

A three-day conference of teachers of vocational agriculture in Smith Hughes schools was held at the state farm campus Monday, Tuesday and Wednesday of this week. Thirty-five instructors of agriculture in high schools attended the sessions. A number of those in attendance were regular agriculture instructors while many were graduates of the agricultural college who expect to teach next year.

State Supervisor J. H. Pearson was in charge of the meetings. He was assisted by Professors H. E. Bradford and C. C. Mentzer.

Carl Calvin, state supervisor of agricultural education in Illinois, gave a very interesting lecture.

ICELAND PARTY IS POSTPONED A WEEK

Y. W. C. A. Reception For Women
Students Will Be Held Next
Friday Evening

The Iceland Frolic, a party for the summer school women students which was scheduled for last night, has been postponed until next Friday evening at 7:45. This announcement was made Thursday morning following a story published in The Summer Nebraskan announcing that the affair would be held this week.

The party will be held at Ellen Smith hall next week if plans as now arranged work out. It is to be in the nature of a "get-acquainted" party for the women students and is the first of a series of events planned for the summer school by the association.

Every woman student in the summer school is urged to attend the party in order that she may become better acquainted with the other students in the school. This is the first time in the history of the university that there have been enough attending the summer sessions to make a party worthwhile. The more than 2,000 students attending this year, however, serves to indicate that many parties can be held successfully during the summer.

An interesting program of games, music, dancing and refreshments has been arranged for the Frolic. A large number of university women are expected to attend the party.

Human nature is something to train and refine; it can't be destroyed. Even the fool reformers ought to know that. —Houston Post.

TAKE A BACK SEAT RATHER THAN WORK

Educator Says Boys Allow Girls to
Shine in Classroom—Will Not
Reveal all They Know

CHICAGO, June 16.—Thruout high school and college, oftentimes even in the grammar grades, most of the boy students know more than they reveal and are capable of doing more than they actually do, according to Dr. Roy C. Flickinger, dean of the college of liberal arts at Northwestern university, who discusses the comparative mental abilities of the average girl and boy students in school and society, a journal of psychology.

"In the class room boys scorn the unreality of their tasks and rebel against being required to perform them," Dr. Flickinger, continued. "They are dazzled by the seeming superiority of the girls and nourish their self-respect by a disdainful refusal to participate wholeheartedly in the recitations rather than run the risk of being outdone.

"Their school record falls far short of indicating their real ability, which is revealed by the different conditions of latter years in graduate school or the business world."

Concerning the woman student, Dr. Flickinger, who has been teaching men and women students for twenty-three years said:

"I do not state that women have better memories than men and scientific tests show that there is little difference between the sexes in this respect, but women are more willing to employ what memories they have than are most men. When students pass from college into graduate school or business life, the men suddenly forge to the front. This happens, as I believe, because memory work, tho of course still important, occupies relatively a less commanding position.

"Since in all co-educational institutions there is a distinct tendency for women to outnumber the men in the liberal arts course, they can reasonably be expected, in the same ratio, to outnumber the men also in the award of honors.

"In South Dakota, it was found that senior men in the high schools of that state who were planning to attend college averaged somewhat lower in an intelligence test than the average score of all senior men, whereas senior girls who were going to college somewhat surpassed the average for all senior women.

"In schools of all grades memory work plays an exceedingly important role—and it is my observation that men are quick to rebel against large assignments of memory work and that most of them prefer to receive a gentleman's grade of C rather than submit to the demand of their instructors."

Reformers are people who take your money and give advice. The only thing we need to destroy our civilization is a few more reformers.—Columbia Record.
