

THE SUMMER NEBRASKAN

VOLUME XXI. No. 168.

LINCOLN, NEBRASKA, TUESDAY, JUNE 27, 1922.

PRICE FIVE CENTS.

"CORNHUSKER ROSE" is the Latest Song Hit

NEBRASKAN WRITES A POPULAR WALTZ

Most Representative Girl of University Will Adorn the Cover of New Piece

University of Nebraska winter and regular students may select the cover picture for the latest song hit. "The Cornhusker Rose," a popular waltz Nebraska sweetheart ballad, is now ready for the presses but no cover design has yet been selected. The most representative Cornhusker girl as chosen by means of a contest among Nebraska students will adorn the frontispiece of the new song. This is the first time that such a contest has ever been held and it is expected to create much interest.

Howard Adamson, composer of the new song, is "up a stump" to select the picture for the latest waltz hit. He feels that the song should be dedicated to the Cornhusker girl most representative of the university. This girl will be selected by popular choice of students and faculty. Toward this end Adamson is co-operating with The Summer Nebraskan in a contest to determine who shall be featured on the frontispiece.

This is not to be a beauty contest. The winner may be either a sorority or non-sorority girl, she may be a senior or a freshman, she may be the most beautiful girl in the university or she may not. The contest is to select a girl with personality, character, scholarship, who is active in school affairs. It is to be a regular choice. It is hoped that votes will not be influenced by any affiliations but that each voter will use his or her best judgment in voting.

Use Coupon Ballots

Coupon ballots for the purpose of voting are being run in the Summer Nebraskan, starting today for three issues. They will be numbered consecutively. No person may vote more than once a coupon but each person may send in a vote on each of the three coupons. The name of the voter must be placed on the ballot but every vote will be kept confidential. Only the members of the judging committee consisting of one student, one alumnus and one faculty member, will know the identity of the voters. The ballot returns will be handed to them as soon as received without being opened.

Each vote will count five points. The most an individual voter may contribute to his favorite girl will therefore be fifteen points. The contest will close on Saturday, July 8, and only those ballots which have been received by that day will be counted. Announcements of the winners will be made in the Tuesday following issue of the Nebraskan.

Extra copies of the Nebraskan containing ballots may be secured by applying to the manager. The copies sell for five cents each.

PROF. FRANKFURTER WRITES BOOK ON OIL

A new book on "Chemistry Petroleum", the manuscript of which has been sent to the publisher, was written recently by Professor Frankfurter. The book should be ready for distribution some time in August. It is a simplified chemical discussion of the origin, refining and testing of petroleum products. It was written primarily for the oil industry at the suggestion of the president of the Shaw Publishing Company and editor of the Oil News. It will also serve as a text book for students beginning the study of petroleum chemistry.

HAYES TO LECTURE AT THE UNIVERSITY

Lincoln Pastor to Give Addresses on Cultural and Spiritual Side of Life

After communicating with the members of the board of regents of the University of Nebraska, Chancellor Avery Saturday announced the appointment of Dr. S. Mills Hayes as lecturer in English, history and art. The appointment carries with it the rank of professorship and secures for the community such lectures and other public addresses as may be arranged from time to time. For the present at least Dr. Hayes will carry no routine class work or serve on committees. His time will be entirely his own except in so far as he may care to participate in university activities. No financial considerations are involved.

It is believed that Dr. Hayes' presence in university circles, his occasional addresses to the students and his counsel will do much towards building up the cultural and spiritual side of university life.

Though very busy with the duties of his large parish Dr. Hayes has for many years found some time for scholarly pursuits. He holds degrees from Harvard University of Wisconsin, Seabury Divinity school, University of Nebraska. His studies in the classics are well known and his illuminating and charming lectures on literary subjects are greatly appreciated by Lincoln people.

GO TO OTHER SCHOOLS ON HONOR APPOINTMENTS

Ralph Jacobson and Gerald Leuck, who will receive their M. A. degrees in July will enter other colleges in the fall. Mr. Jacobson has been appointed to a graduate assistantship in the University of Illinois where he will continue his work for the Ph. D. degree. Mr. Leuck has been appointed to a research fellowship in Northwestern university, where he will also continue work for his doctor's degree. He will be there two years.

CINCINNATI INTRODUCES NEW COURSES FOR WOMEN

Professional courses for women in Architecture, Chemistry, Commerce and Dietetics will begin in September at the University of Cincinnati under the direction of the College of Engineering and Commerce. The courses in Chemistry and Commerce will operate as five-year co-operative courses including practically the same subjects as the corresponding work for men, with the addition of more cultural work for the women. The courses will lead to the degrees of Chemical Engineer and Commercial Engineer.

BASKETBALL MEN MEET GRIDSTERS

Cagesters and Track Men Will Clash With Football Players in Game This Evening

A battle to decide the supremacy of football over basketball and track will be held tonight when the gridsters meet the track and basketball men in a baseball game. The game is the only one which will be played today.

The baseball class is leading the Twilight league with one win to its credit. The Summer Nebraskan trails with one defeat. The game tonight will place the teams in ties for first and last positions.

Twilight league baseball took a decided boom following the game between the baseball class and Summer Nebraskan teams last Thursday. The College Book Store has started organization of a team and several other groups are planning to gather nines. It is hoped that the league may be increased to eight teams.

The game Tuesday evening will start promptly at 6 o'clock. Forfeits are to be demanded in the future of any team which fails to have its full number on the field ready for action at 6 o'clock on the day of the game.

COACHES CAN RUN, PLAN TRACK MEET

Some coaches of Nebraska high schools can run. This startling discovery has been made by "Professor" Henry F. "Indian" Schulte during the course of his work in teaching his track class. And, what is more, they seem to enjoy it.

And so, to add zest to the performance, a track meet is to be held near the end of this term. The coaches will be divided into two teams as nearly balanced as is possible. They will have their own captains and everything.

Each captain will be allowed to pick any one else in summer school to use on his team, subject to approval of Coach Schulte.

TELLS OF Y. M. C. A. CAMP AT ESTES PARK

"Bob" Polk Gives Nebraskan Complete Account of Conference of College Men

At the request of the Summer Nebraskan "Bob" Polk Gives Nebraskan Complete Account of Conference of College Men who attended the Y. M. C. A. Rocky Mountain student conferences at Estes Park, has written the following accounts of the ten day conference.

"Each year at Estes Park there is a conference of men from college Y. M. C. A.'s for the purpose of discussing campus problems and hearing big men.

"The conference chairman this year was William E. Sweet, candidate for governor of Colorado. He is a prominent Denver banker and a leader in labor questions. He was an outstanding figure in the recent street car strike at Denver. Besides being chairman of the conference had a part in the vocational training plan. He presented the vocation of a christian business man.

"There was a well defined plan for vocational guidance headed by E. A. Worthley. Men prominent in many lines, such as business, the ministry, engineering, etc., gave talks and private interviews to the students. All the men were capable and their assistance invaluable.

"In special discussion groups, Y. M. C. A. methods were discussed and plans for work on the home campuses outlined. One group was made up of editors of college publications and member of student councils. The problems of the various schools such as the honor system, the point system and single tax were brought up and discussed.

"The needs of the world were brought out by Sherwood Eddy and speakers from India, China, Holland, and Czecho-Slovakia. In most countries the situation is appalling and the consensus of opinion was that the world is drifting into another war. The only relief for this situation was said to be found in Christ's way of living as outlined in Eddy's addresses at Nebraska last winter.

"The industrial problems of our own country were presented by labor leaders and Christian men interested in labor and by employers. In most cases the closed shop was advocated with a strong organization of labor which could obtain the eight hour day in all industries and a fair wage. This is contrast with the fourteen hour day of the U. S. Steel corporation and the limitation of work as in the mining industries.

"A very strong speaker on the general unrest and labor problems in particular was J. Stitt Wilson, former mayor of Berkeley, Calif., and a prominent leader. He made four points which he believed, if carried out,
