

SCHOOL TO VOTE FOR HONORARY COLONEL OCT. 3

Girl Elected From Junior and Senior Co-eds of the University.

VOTE ON ELECTION DAY
Co-eds Will Be Honor Guest at Military Ball Later in Year.

An honorary colonel for the R. O. T. C. regiment will be elected on class election day, October 3. The selection of the honorary colonel from among the junior and senior co-eds, will be by vote of the entire student body. There will be no previous nominations.

The name of the girl chosen will be kept secret until the night of the annual military ball, to be held early in December. This year the cadet officers plan a revival of the splendor and pomp of the old-style military balls. All cadet officers will attend in the full uniforms of the corps, and the military ceremonies and traditions will be observed. The feature of the ball will be the presentation of the honorary colonel. She will appear in the full uniform and insignia of a colonel in the regiment. She is to be honor guest at the ball, and will lead the grand march with the colonel.

Later in the season the entire cadet regiment will take part in a regimental parade and review as a tribute to the honorary colonel. This in itself is a great honor, accorded only to distinguished persons. With the addition of this event, election day promises to be one of great interest. On this day, the officers of the four classes are to be elected by the students. The campaign will be carried on starting Friday, September 29. On Tuesday the polls will be opened and the vote will be taken. At the same time, five members of each college on the campus will be chosen for membership on the stadium committee. These persons will conduct the campaign for the stadium soon to be erected.

Relative Heat Values of Corn Compared

(University Publicity Office.)
A comparison of the relative heat values of corn and coal is made in an article on the "Heat Value of Corn" by Prof. W. L. DeBaufre, chairman of the department of Mechanical Engineering in "Power" magazine for August 8. So many inquiries were received by the University last winter regarding the heat value of corn, when the price of coal mounted so high and the price of corn decreased, that an investigation was made in order to answer with reliable information. The article states that 50 bushels of corn on the cob or 63 bushels shelled will produce as much heat as one ton of bituminous coal. At present prices, corn would be a more expensive fuel than soft coal. Prof. T. A. Kieselback and Prof. T. H. Gooding of the Agronomy department, and Prof. F. W. Upson of the Chemistry department co-operated with Professor DeBaufre in the investigation.

Dean L. A. Sherman Moves to U. Hall

(University Publicity Office.)
Dean L. A. Sherman of the graduate college has moved his office from the Administration building to University Hall 101. His former office will be occupied by F. T. Dawson, dean of men.

Cramb To Succeed Simon As Junior On Publication Board

Harry Frye, president of the class of 1924 has announced the appointment of Norman L. Cramb to the Student publication board to fill the position left vacant by Paul Simon, the junior member of the board. Simon was elected to the publication board in the spring elections of last year. He is attending the Chicago Art School this year.

Dr. George P. Borrowman, formerly a professor of chemistry in the university of Nebraska, visited the campus for several days during the past week. The high school pupils of Pleasant Dale accompanied by their principal and superintendent, visited the museum Friday.

Grace Gannon '12 of Omaha visited at the Alpha O house Saturday.

Ag. College Professor Entertains Classes

Professor C. W. Smith of the Agricultural College entertained his two engineering classes at his home on Thursday evening of last week. Professor Smith stated that the idea of the occasion was to become better acquainted. Each of the boys told his name, the town from which he came and its notoriety. After a round of interesting games the boys were very delicately escorted into the paddling line which consisted of a shingle on which were pie, marshmallows and a candle. The boys then made merry over brimming glasses of delicious cider.

UNIVERSITY JOURNAL OUT FOR SEPTEMBER

College Publication Full of Interesting News Concerning Athletics.

The September number of The University Journal, just out, contains much interesting information and news of last year's work. On the cover is a picture from last year's Nebraska-Oklahoma game, with this year's football schedule below it.

The editorials lay much stress upon athletics and the new stadium. Mention is made of the new Princeton Memorial Skating Rink, and Cornhuskers are urged to be as loyal as the "Tigers." The new stadium is in sight, however, a total of \$117,126.75 having so far been subscribed. The need of the stadium, a new gymnasium, and new equipment is evident when we look at the Athletic track records of last year. In the National Collegiate Track and Field Meet held last June in which 29 schools were entered, Nebraska took seventeenth place. In co-ed athletics we fared a little better, taking second place in the National Telegraphic Meet, but we failed to get a representative on the American team that left for Paris in June. With decent equipment there is no doubt but that we could do much better.

Changes in administration are also noted, namely the appointment of Coach Fred T. Dawson as Dean of Men; the resignation of Neil T. Chadderton and appointment of J. K. Selbeck as agent of Student Activities; and the resignation of William Day and appointment of Paul McCaffrey as Y. M. C. A. secretary.

Figures for last year show an enrollment of 8,200 students for the whole year 1921-22 with 3,200 summer school students.

New gifts to the University consist in 32 Masterpieces of Beckwith, presented to the School of Fine Arts, and in a new flagstaff encircled by Marble set, presented by the Class of '21.

Pharmacy Society Elects Officers

(University Publicity Office.)
At the first meeting of the year, the Pharmaceutical Society, September 19, elected the following officers: President, John Frick, Havelock; vice president, Esther Lyman, Lincoln; secretary and treasurer, Frank Strubling, Fremont; and sergeant-at-arms, Hess Baker.

University Instructor Visits Many Schools on Recent Tour

Work and pleasure need not conflict, if one is as well traveled as Miss Laura Belle Pfeiffer, who visited the history departments of nine universities and colleges while on her vacation this summer.

The University of Washington at Seattle was Miss Pfeiffer's first stop. Here she found considerable building in progress, the new buildings being of a light brick similar to that used in our own new structures. At the entrance to the campus stands a large statue of George Washington, which is greatly treasured and is soon to be removed to a prominent hill-top.

At Tacoma she visited the high school stadium which is one of the largest in the United States. It is built on the water front and the spectators have a beautiful view of the blue Pacific as well as the contest, while the boating of the surf mingles with the cheers of the crowd ever urging the athletes onward.

DEAN FERGUSON ADDRESSES FIRST YEAR ENGINEERS

Dean of Engineering College Urge Fresh to Mix With Men of Other Colleges

FRESHMEN MUST WORK
Students Should Take Up One Line of Activity and Follow It Out.

"Don't forget that you are a student of the University of Nebraska as well as of the College of Engineering," warned Dean Ferguson in the first formal address of the year to freshmen, held Monday, at five in M. E. 206. "The advantages of a university over a pure technical school come from the contacts made with the other departments and their faculties; especially those of the Colleges of Arts and Sciences, Law, and Business Administration. Many contacts should be made through the students of these other colleges. Be active in the affairs of your class as well as in the departmental engineering societies and the combined society, American Association of Engineers. It is well to enter actively into the affairs of the A. A. E., the society responsible for the only engineering publication on the campus—The Blue Print—four issues of which are made each year.

"Do not, however, enter into every student activity that is brought to your notice, or your classroom work will surely suffer. There is a tendency to do too much, and you should limit yourself to those things that peculiarly appeal to you. Take part only where your work can be of the most advantage to yourself, your college, and the University," he continued.

"Opportunity will offer to take electives, from time to time, but do not confine yourself to electives in the College of Engineering. You can not take too much English. There are many courses in other colleges, that might appeal to you," he advised.

"No great difference between your course and that of any other engineer will appear to you the first year. This means that before entering specifically technical subjects you must have a good foundation in mathematics, physics, chemistry, mechanical drawing and English. This is a distinction from the trade school where you will not receive sufficient grounding to enable you to stand out in advanced work. We cannot give you the latest information concerning manufacturing processes and shop practice, but our hope is that you will find yourselves more resourceful after your studies here," he explained.

Mr. Ferguson will speak to the freshmen again next Monday. After that the lectures will be given by various faculty members, including some from the other colleges.

* Y. W. C. A. ELECTION

Nominees for Y. W. C. A. secretary are: Isabel Fouts and Lila Wyman. Election at Vesper.

Military Department Insists on Freshmen Wearing Green Caps

(University Publicity Office.)
To establish at Nebraska the green cap tradition for freshmen, which is a field tradition among eastern universities and which has been established in several middle-west universities, is the purpose of co-operative plans by the departments of athletics and of military science and tactics. The military department, under Acting Commander Major Sidney Erickson, is insisting upon the first-year men wearing their green caps when they report for drill and is co-operating with the athletic department in emphasizing and developing the university spirit. Drill periods are cut short a few minutes to permit the candidates for appointment as cheerleaders to lead the cadets in cheering. This serves a dual purpose: It helps in picking the best cheerleaders and it teaches the new students the university cheers and songs.

Gamma Phi Beta announces the pledging of Willie Maud Powell of Winterset, Iowa.

(Continued on page 3)

Former Hi-Y Men Invited To Party

All former Hi-Y men who are freshmen in the University are invited to a dinner to be given at the Y. M. C. A. Thursday evening at 6 o'clock. L. C. Oberlies of the state board of control will be the principal speaker. Raymond Eller, chairman of the committee on new students, will preside.

Letters have been sent to all members whose addresses were on file at the Y. M. C. A., but many were not obtainable. "We want every freshman on the campus who belonged to the Hi-Y to attend, invited P. W. McCaffrey, General Secretary of the University Y. M. C. A.

FRESHMEN WOMEN HOLD CONVOCATION

Many Organizations Pledge Perfect Attendance for First-Year Girls' Gathering.

Twenty-nine of the sorority houses, dormitories and rooming houses visited by the members of the Moratorium Monday evening, have pledged the perfect attendance of their freshmen at the freshmen women's convocation to be held Thursday morning at 11 o'clock in the Temple theater. Campus activities and how to become engaged in them will be the theme of the convocation. Speakers representing the activities in which women are eligible for participation will provide the greater part of the program. Other matters of special interest will be taken up. Freshmen women will be excused from classes and all other women are invited to attend.

The list of houses which will be represented by 100 per cent of their freshmen is as follows:

- Achoth.
- Alpha Chi Omega.
- Alpha Delta Pi.
- Alpha Omicron Pi.
- Alpha Phi.
- Alpha Xi Delta.
- Chi Omega.
- Delta Delta Delta.
- Delta Gamma.
- Delta Zeta.
- Gamma Phi Beta.
- Delta Psi.
- Kappa Alpha Theta.
- Kappa Kappa Gamma.
- Phi Mu.

University Glee Club Elects New Members

As a result of the tryout for the University of Nebraska glee club held Monday night, the following members were selected to fill the vacancies of the club:

- Hugh Poore.
- J. Ward Wray.
- Lloyd Robinson.
- Richard McCann.
- Raymond Lewis.
- Arthur Latta.
- Archie Jones.
- Joseph Dollberg.
- Everett Johnson.
- Allen Kiburz.
- Robert E. Slattery.
- J. F. Schuyler.
- Erwin A. Jones.
- Aldrich Hanicka.
- Ray Ellier.

The first regular rehearsal will be held Wednesday, September 27, at Temple theater, 7 o'clock p. m.

Professor DeBaufre Accepts Appointment

(University Publicity Office.)
Prof. W. L. DeBaufre, chairman of the Mechanical Engineering department, has accepted an appointment from Director H. Foster Bain of the United States Bureau of Mines to serve on a committee to investigate the use of oxygen in metallurgical work. The study will be along two lines: The production of oxygen in such amounts and at a cost that will permit its use in metallurgical operations; and the use of oxygen to increase the efficiency of metallurgical operations to produce metals at a lower cost, and to permit the use of lower grade ores.

Family of Owls Captured by Professor Dawson at Waverly

About five weeks ago, Professor W. Dawson of the department of entomology received word that there was a family of barn owls nesting in a barn near Waverly. The farmer had the erroneous idea that the owls were eating his chickens and desired to be rid of them. Barn owls seldom or never eat chickens. An investigator at the Smithsonian Institute at Washington, D. C., shows the diet of two barn owls during a certain length of time. They ate 1144 field mice, 452 house mice, 124 common rats, 64 shrews, 1 bat, 1 mole, 1 rabbit and 36 birds such as song sparrows. Nevertheless the notion gave Professor Dawson a chance to get some birds on which to make an interesting study.

The family consisted of two old birds and six little ones. During the process of capture they set up a hissing that would put a dozen steam engines to shame. When brought to the plant industry building, the family was placed in an open box on the porch in the hope that the old ones would come and go as they pleased so that the method and material for feeding the little ones could be studied. But the older ones became dissatisfied with this system and left. Then the feeding of the young ones became a real problem. Meat seemed to be the only food for which they had the voracious appetites of

W. A. A. Sends Out Annual Letter.

Dear Freshman Friend:
You have probably seen girls to the campus wearing "N" sweaters, and thought they belonged, perhaps, to some athletic men friends of theirs. If you have thought this you are wrong, for each of these girls earned her own sweater, by hard work in sports.

You, too, have seen the W. A. A. bulletin board in the gymnasium, scattered with all kinds of notices, such as "Sign here for Hike"; "Do you play Soccer?"; "Tennis Tourney Net Week", and many other appeals to girls who love sports. Did you ever wish you might walk right up and sign them all?

The Women's Athletic Association awards an "N" sweater to every girl making 1,200 points in sports during her school career. The Women's Athletic Association also wants every girl in school out for one sport, at least. Those notices and appeals on the board are for you as much as for any one. The next time you see a hike posted that looks good to you, sign it and get out and meet some new girls. Or get into the first sport of the season (soccer) and learn the game. Your chance on the class team is a good one if you are willing to work.

This is the system by which points are awarded: Members on first class teams of the following sports, 100 points: Soccer, hockey, basketball, baseball. Fifty points additional to members on class teams in same sports. Twenty points for members of second class teams in track and swimming. (As much as 100 points may be made in tennis and swimming, each, according to individual merit.) Twenty-five points a semester may be made for hiking forty miles. New Rule: Fifty points may be made for hiking each semester. For each additional ten miles exceeding the 40 miles 5 extra points will be awarded. Points may also be made in aesthetic dancing.

So you see the athletic girl may easily win her letter during school, and every girl may earn membership in the liveliest girls' organization on the campus. Sign the enclosed card and get acquainted with athletic women at Nebraska.

Liverpool Professor Pays Miss Pound Fine Compliment

(University Publicity Office.)

The summer number of the British philological periodical, the "Modern Language Review," published at Cambridge, has as the initial article in its reviewing columns a highly complimentary discussion of Prof. Louise Pound's "Poetic Origins and the Ballad," from the pen of Allen Mawer of the University of Liverpool. Professor Mawer writes: "Miss Pound makes an important contribution in a series of incisive, pointed and well-informed chapters she endeavors to demolish one by one the main positions of the romantic critics, while in another chapter she advances in highly tentative fashion her own views as to the literary history of the ballad." Professor Pound's next book, "American Ballads and Songs," is now in press. It is to be issued soon by Scribner's.

University Glee Club Elects New Members

As a result of the tryout for the University of Nebraska glee club held Monday night, the following members were selected to fill the vacancies of the club:

- Hugh Poore.
- J. Ward Wray.

- Ray Ellier.

The first regular rehearsal will be held Wednesday, September 27, at Temple theater, 7 o'clock p. m.

PROF. SENNING GIVES LECTURE BY RADIO

University Instructor Has Educational Talk Broadcasted Friday Evening at Star.

Professor John P. Senning of the political science department, delivered a lecture by radio, at the invitation of the Lincoln Daily Star, at the radio station of the Star Friday evening, September 22. In the course of the discussion, Professor Senning brought out that the success of any democracy is dependent upon an intelligent public opinion. Every citizen who participates in the selection of candidates for office and the determination of policies should be well informed as to the qualification of those who are running for office and also upon campaign issues. The vote registered in any election should express a judgment that has been arrived at after an impartial consideration of all the factors involved. Otherwise an election is meaningless and a farce. The decision of the voter, if it shall mean anything, must express a conviction as to the real merit of candidates and as to the policy that will promote the best interest of the community. The highest prerequisite of public opinion is an impartial political education.

Freshman Commission Holds First Meeting

The Freshman Commission of last year will hold its first meeting in the form of a get-together dinner Thursday evening at 6 o'clock in Ellen Smith Hall. The most important business will be the nomination of girls for the new commission. Each member is permitted to name three girls, and the commission will be chosen from the joint nominations of the old commission and the Y. W. C. A. cabinet. There are twenty-five members.

Family of Owls Captured by Professor Dawson at Waverly

About five weeks ago, Professor W. Dawson of the department of entomology received word that there was a family of barn owls nesting in a barn near Waverly. The farmer had the erroneous idea that the owls were eating his chickens and desired to be rid of them. Barn owls seldom or never eat chickens. An investigator at the Smithsonian Institute at Washington, D. C., shows the diet of two barn owls during a certain length of time. Vesper Choir Will Meet On Thursday

A meeting of the new members of the Vesper Choir will be held Thursday afternoon at 5 o'clock in Ellen Smith Hall. The list of new members follows:

- Luella Armstrong, Josephine Bishop, Norma Carpenter, Elva Carter, Grace Daves, Ruth Haleerly, Ella Hardin, Myrella Hill, Louise Miller, Leola Ickman, Marjorie Stangland, Josephine Shrammek, Vivian Robertson, Edith Gramlich, Flo Sherman, Alberta Van Kleeck, Ethel Voss, Barbara Wiggens, Dorothy Thomas, Rosanna Williams, Verne Unthank, Evelyn Unthank.

New Head Appointed for Trade School

The Dental Trade school in the basement of University Hall is now under the supervision of Dr. B. C. Wildman, who succeeds Mr. W. E. Egle, who is now associated with Dr. R. L. Hooper.

AWGWAN STARTS CAMPAIGN FOR SUBSCRIPTIONS

Beautiful Prizes for Dormitories and Sororities Getting Most Subscriptions.

TRIP TO KANSAS FOR MEN

First Issue of University Comic Will Make Appearance Next Month.

Awgwan, the comic monthly publication of the University of Nebraska, will make its initial appearance on the campus for year 1922-23 during this week. The subscription campaign will begin Wednesday morning, Sept. 27 and 28, and promises to develop into one of the hottest selling campaigns in the history of the school. A prize to the dormitory or sorority selling the most subscriptions and to the three men selling the largest number will add zest to the canvass.

As a prize to the dormitory or sorority selling the most subscriptions, a beautiful hall clock will be given. The clock is on display in the windows of the College Book store. Complete in every detail and handsomely finished, the clock is expected to promote keen competition among the co-eds of the University.

The men have not been forgotten in the campaign and the awards held out to them for their individual efforts are well worth the time and labor expended by them. To the three men selling the largest number of subscriptions to Awgwan a free trip to the Kansas-Nebraska football game at Lawrence, Kas., November 11, will be given, and no one can ask for a more suitable prize than the one here held out. The Awgwan staff is to be congratulated on the choice of offers.

Dormitories and sororities which intend to compete are asked to choose or elect chairmen who will deal with the Awgwan manager and have charge of the subscription books, which may be obtained from Charles Adams.

Throughout the country Awgwan enjoys an enviable reputation as a comic magazine and it is today rated among the best in its particular line of work. Established in 1911, it has today grown into a publication whose appearance is hailed with delight by a large number of readers.

The first issue this year will surpass all previous efforts, according to the staff. Containing thirty-two pages between the covers, the edition withheld no effort to make the book anything but the best that can be offered. The art work is said to be of the highest grade, and some of the best University talent along humorous lines has been engaged to supply the reader with merry jest and comic story.

The staff has placed the subscription price for the nine issues at \$1.00 and a minimum of 1,500 subscriptions has been set as the goal for the campaign. Upon paying the subscription price to any of the solicitors, a receipt for the amount will be given. The subscriber may then take the receipt to the booth, situated between U hall and the Armory and receive the first copy of the magazine.

The students of the University are urged by the editor to remember the campaign and to be ready to subscribe for this publication.
