Ohio Uni. Is Praised By Stephen Leacock

"It seems to me perfectly marvelous the way public support is elicited at the State University of Ohio, situated in the City of Columbus, where an immense stadium, the gift of graduates and citizens of Columbus towers to the sky with a seating capacity of 65,000 and room for an additional 10,000," said Dr. Stephen Leacock, who has just returned from Cincinnati and Columbus, Ohio. In the former city, he was the special speaker at the annual teachers' convention. He was deeply impressed by the progressive spirit shown at the Ohio State University, of which institution he was certain many McGill students had never even heard. "Everybody in Columbus," he stated, "looks upon himself as a university man, no matter if he has never attended the college in question."—The McGill Daily.

Washington Freshmen Show Wide Knowledge

There is very little about modern or ancient personages, places or characters that Washington's freshmen do not know, as revealed by answers to a questionnaire recently given the English composition class by W. R. Gundlach. "Who was William George?" Why, he is "Lloyd George's little brother," ran one of the answers. Equally startling is the fact that Mustapha Kemal Pasha is head of the Japanese navy; "Oliver Twist" is a kind of tobacco and Mozart a brand of cigars. Other samples of freshman intelligence are: Iago, "Japanese rice;" Sir Roger De Coverly, "An old fashioned square dance;" Becky Sharp, "a

music writer"; Heifitz, "name of a cow"; Demosthenes, "Russian writer"; Dardenelles, "name of a song," and Ronald Amundsen, "painter."—University of Washington Press Bulletin.

Engineering College To Publish Magazine at California School

Resolutions permitting the College of Engineering to publish a monthly magazine, the "California Engineer," were passed at a meeting of the Publications Council recently. The first issue of the publication, which is expected to appear the beginning of next semester, will contain articles which are said to be of great value to engineering students as well as to the campus public.—University of California Press Bulletin.

Elected by a Large Majority!

An advertising medium reaching five thousand students daily could have no serious opposition in the voting to learn the "peoples' choice" of methods of obtaining satisfying advertising.
