

STUDENT CONFERENCE WILL START DEC. 26

Meeting of University Students Will be at Caroline Country Club, Hartsdale, New York

"The Economic Basis of Our Education" is the subject of a student Christmas conference for officers of student government organizations, editors of college publications, and presidents of discussion clubs, to be held under the auspices of the National Student Reform, December 26 to 29 at the Caroline Country club, Hartsdale, New York.

The Daily Nebraska and Miss Erma Appleby, secretary of the University Y. W. C. A. organization, have received letters from the National Student Forum inviting them to send representatives to the conference. A maximum of three delegates from each of the Universities invited to attend will be allowed, since only fifty students can be accommodated at the country club.

The discussion will be open and conducted by the students. The first meeting is Tuesday evening, December 26. "The College and University, the Ideal and the Actual," is the topic for this session. It is designed to call forth answers to the question "What is the function of the colleges and Universities in contemporary society?" Upton Sinclair's new book on colleges, "The Goose-Step," which has not yet been released, will be specially reported by a student.

"The Economic Basis of Institutions of Higher Learning," is set for discussion at the Wednesday meeting. "What are the human costs of these? How are the colleges and Univer-

sities as social institutions maintained? Who pays for them? Who are benefited by them? What are the ultimate sources of endowment?" are some of the questions to be taken up in these sessions.

"The Student and the World in Which He Lives," will be talked over at the Thursday morning and evening sessions. "What kind of interest should students take in contemporary events while in college? Have college graduates peculiar social responsibilities?" are the questions quoted on the bulletin sent out by the Forum Members of the Student Friendship Student Delegation from Europe will explain the ideals and activities of the European youth movement in their respective countries.

"The Youth Movement and the American Student" will be taken up at the Friday meeting. Contributions will be made by such groups as student government associations, Y. W. C. A., Y. M. C. A., and the National Student Forum.

Engineering Dance Postponed Because Of Heat Shortage

Failure of the heat supply of the Knights of Columbus hall, forced a cancellation of the Engineers' dance arranged there for Saturday, December 19.

No notice of the failure reached those in charge of the affair until almost the last minute, said one committee member. Enough tickets had been sold in advance to insure a financial success, but unless the Knights of Columbus make good the money paid out for music, decorations, and advertising, there will be a large deficit, according to the chairman of the A. A. E. committee.

The dance is now postponed for at least a month with no especially appropriate evenings in sight. Accordingly, the A. A. E. has arranged to refund the money for all tickets sold, Wednesday morning from 9 to 12 o'clock in the A. A. E. office in Room 105, Electrical Engineering building.

Bazaar To Be Opened Again This Afternoon At Ellen Smith Hall

The Y. W. C. A. bazaar will be open again Tuesday afternoon from 2 until 6, for the benefit of belated Christmas shoppers. Prices will be, as the advertisers say, "cut in half." The bazaar is under the direction of the Conference Committee. The articles to be sold are donated by the girls of the University, and the

proceeds go to defray the expenses of the University of Nebraska delegates to the Y. W. C. A. national convention, held at Estes Park, Colorado, in the month of August.

Handkerchiefs, aprons, and small home-made gifts, are on sale at Ellen Smith hall this afternoon at low prices. For that person, whoever she may be, for whom you have been unable to find the "right thing," you will surely find some suitable dainty little trifle there.

CHRISTIAN SCIENCE TALK GIVEN SUNDAY (Continued from Page 1)

is closer than breathing and nearer than hands and feet.

If there is anyone here who doubts this, "I would say to him, Try and see: for Christian Science does not ask you to believe these things, but to prove them! Unlike any other religion I know of, it does not ask you merely to believe anything, but shows you how to prove its every statement every step of the way. Its whole appeal is based on proof and demonstration. There is something stimulating, something encouraging in the very fact of being told that we can prove things for ourselves. It kindles hope, it arouses energy, it awakens the spirit of dominion, which was God's gift to the man He created. The Bible says that God gave man dominion over all the earth! How many of us are conscious of that dominion? And if not, why not? It is God's will for us. Think for a moment what it really means to have dominion over all the earth! It means the overcoming of everything that torments or limits or restricts you. It means the conquest of that sin doth so easily beset you. It means to be the master of your circumstances, the master of your body. It

means salvation from fear and from disease. It means that you can be a law to yourself of health and harmony and prosperity. It means to lift up your face to heaven, unafraid and unashamed.

Now Christian Science has come to teach us this dominion. Christian Scientists are beginning to learn this dominion. They are beginning to know that God's will is good; because rich blessings have begun to come into their lives, as they have registered the belief that misfortune must come to them in fulfillment of God's will and as they have clung to the fact that His will is fulfilled in goodness only.

That Arkansas man who wot a dog license instead of a marriage license probably felt that he was going to lead a dogs' life, anyway.

Newspapers Praised And Criticized by the Oberlies Class

Newspapers came in for their share of praise and grilling of the Oberlies men's class at the Lindell hotel. The subject for discussion was "Is the Modern Press Worthy of Its Influence?" Mr. Oberlies had copies of Lincoln papers for reference.

Reporters' trustworthiness in holding matter imparted to them confidentially and refusal of many papers were mentioned among the good points. It was suggested that the public's taste for the sensational has developed the "scathead" type of news depicting crime and disaster, while handicapping editors in using more constructive news matter.

It was asserted by the speakers that the newspaper business is a commer-

cial proposition and that often the policy is dictated from the business office, which is influenced by big advertisers. Several speakers declared the press has improved greatly in the past twenty years.

Next Sunday the class will discuss "Is There a For-Sure Santa Claus?"

WARM, comfortable rooms, with phone. Waverly Place, 13th and L Sts.

Eclipse of the sun

THIS is the month when the sun is outshone, and we mortals draw greater warmth and sustenance from that homely provender—mince pie.

It is the warmth of the holiday spirit, which causes human hearts to glow when temperatures are lowest. Mother's cooking—the family united—Christmas trees and crackling logs—what would this world be without them?

In promoting the family good cheer the college man's part is such that modesty often blinds him to it. It would hardly occur to the glee club man to sing over the songs of Alma Mater for the still Dearer One at home.

The football man would scarcely suspect that his younger brother is dying to have him drop-kick for the "fellers".

The Prom leader would not presume to think that among those sisters who have been waiting to share his agility at fox-trot may be his own sister.

And in general, college men would scorn to believe that any conversational prowess they might possess on books, professors or campus activities could possibly interest a certain Gentleman Who Foots the Bills.

But just try it, all of you. The welcome you get will warm the cockles of your heart.

This suggestion, amid sighs as they look back across the years, is the best way a bunch of old grads here know of wishing you "Merry Christmas".
