M. V. TELEGRAPHIC MEET TO BE HELD IN VALLEY TODAY

Yearlings Pitted Against All Teams in Conference for Annual Track Event.

HUSKERS IN GOOD SHAPE

Coach Schulte Has Good Material to Win in All Events—To Be Held at Three O'clock.

The freshman telegraphic Missouri Valley meet will be held throughout the valley today. The Cornhusker yearling track team will hold their meet today at the Fair Grounds or possibly Lincoln or Wesleyan track at three o'clock. Coach Schulte has been grooming his first-year men for the valley telegraphic meet for the past two months, and Cornhusker followers are confident that the Scarlet and Cream freshmen will win high honors in the meet this year. The Husker yearling track and field athletes won the valley telegraphic competition in 1921.

In the sprint races Coach Schulte has a world of material among the yearling tracksters. Hein, Wirsig, Locke, Rhodes, Sherick, Whipperman, Beerle and Issenhuth will run the century and 220-yard sprint races. Several of these speed artists have done 10-15 seconds in the century, and correspondingly fast time in the two-twenty.

Coach Schulte has Whipperman, Sherick and Bloodgood to run the quarter. Lewis, a freshman from Fairfield, has been showing up well in the tryouts in the half-mile race, and should be in the money in today's race. Butler also runs a good half. Zimmerman is Nebraska's best bet in the mile and two-mile runs.

The Cornhusker first-team is unusually strong in the hurdle races. Weir and Beerle step over the high hurdles in sixteen seconds or better, and should score points for Nebraska. Rhodes and Wirsig also run the high hurdles in fast time. The same athletes clear the low barriers in fast time.

In the field events Coach Schulte has Locke, Weir, Rhodes, and others in the shotput. Rhodes, Weir and Wirsig are expected to do creditable work in the altitude event, the pole vault. Rhodes and Weir are the premier freshmen performers in the broad jump, as both of these star athletes do well over 21 feet. Rhodes, Page and Weir will compete in the high jump. Ogen, Page, Pospisil and Armstrong will throw the discus. Simmons and Andrews will hurl the javelin.

INDIAN STUDENT DESCRIBES HOME CITY
(Continued from Page One).

central one being the largest and most beautiful one. In the garden around there are the sweet-scented Kakula, and the lovely Asokas surrounded by the vines of Jai and Jui. The water that sprouts from the fountains falls in the basin simply to beautify the moonlight and the sun lotuses in it. The whole of the garden is surrounded by a strong compound, with doors here and there.

"Among the places worth seeing in the city are the two palaces at Najabag and Maacarpura, the Courts, the Hospital, the market and the mansions of the rich."

CADETS RECEIVE RIFLE AND PISTOL TRAINING

Company I Holds Rifle Championship of Regiment—Girls' Team Organized This Year.

Rifle and pistol instruction and practice is conducted both indoors and outdoors. For indoor practice which is conducted in the gallery on the third floor of Nebraska hall, the Winchester .22 calibre rifle and the Colt .22 automatic pistol are used. Gallery practice with the rifle is required of all freshmen during the first semester and is also participated in by members of the other classes. Instruction in using the pistol is limited to students taking the advanced course. During November matches are held among teams representing each company of the regiment and among fraternity teams. In the first of these Company I won with a score of 866 over Company M, second, having a score of 863. Phi Tau Epsilon fraternity won the Interfraternity match with a score of 862, Acacia fraternity did the pushing with a score of 847.

During January, February and March matches were fired with college teams located in all parts of the country and a team entered in the Corps Area match. Capt. N. G. Kenny is the rifle captain for the present year.

The range for outdoor practice is located at Bennet and during the fall and spring practice with Springfield calibre .30 army rifle and the Colt calibre automatic pistol is held. The trip to and from the range is made by motor truck. All firing is at 200 yards in the prescribed positions: prone with sand bags, prone without sand bag, sitting, kneeling, and standing, and in addition, rapid fire in which a time limit of one minute is allowed for ten shots.

This year for the first time Nebraska had a girls' rifle team of which Miss Kathryn Krieg was elected captain. More than one hundred girls received instruction in the use of the rifle and from among the best shots teams were selected to fire inter-collegiate and interclass matches. The juniors proved themselves to be the best shots and won over the other classes with a safe margin.

SPLENDID SHOWING IS MADE BY R.O.T.C. UNIT

General Pershing Attends First Review and Inspection Held During This Semester.

Nebraska is justly proud of the splendid showing made by the R. O. T. C. Cadets of the State University, in their parades and reviews. Many spectators are always present.

The following is a brief summary of the ceremonies of the current school year

The first parade and review was held November 2, 1922.

The first review and inspection this semester was the one tendered General Pershing on April 6th.

On April 7, 1923, Major Sidney Erickson, professor of Military Science and Tactics of the University, issued the following memorandum:

"1. The following ceremonies will be held this spring. All cadets will attend unless properly excused.

Friday, April 13th, parade and review. In honor of the Honorary Colonel.

Tuesday, April 17th, parade and review. In honor of the Chancellor.

Wednesday, April 25th, parade and review. In honor of Representatives from Reserve Officers, American Legion, Veterans of Foreign Wars, and Spanish Veterans.

Thursday, May 3rd, parade and review. In honor of State G. A. R. convention.

Friday, May 11th, parade and review. In honor of Governor and Staff.

The scheduled parades and reviews for April 13, and May 3, were prevented by rain.

A bugle call, first call, is sounded at 4:50 p. m. on the day a parade is scheduled. The Cadet Corps assembles on the parade ground and "fall in" at the second bugle call, "Assembly," at 5 p. m. The Cadet band plays. The Regiment is then formed in line of masses, (Battalions in Line of Close Columns), the line extending the entire length of the drill field. The Cadet Officers have charge of and conduct the ceremonies.

It is an inspiring sight to see the Regiment form for parade and to pass in review. One is impressed with the

idea that the cadets are taught punctuality, physical training, how to stand erect with shoulders square, precise and soldierly movement, rhythm, command and leadership, and a respect for authority.

A man who succeeds in business must be able to command and direct the efforts of others. The Cadet Officers and non-commissioned Officers are getting that training along with their university courses, thus making the Military Department a very practical and most helpful department for the Cadets.

Taking orders by telephone is all right, but it is rather annoying to have your wife call you during office hours like that.

X = ?
Wanted—men to find the answer

THIS is written to the man who loves to seek the unknown quantity. He is the kind of laboratory worker who ventures into untried fields of experiment, rather than the man who tests materials.

Industry has need of both types, but of the former there is a more pressing demand.

College men may have been discouraged from pursuing pure research. In this highly practical age it may seem there is little room for work which does not have an immediate dollars and cents application. But such is not the case.

The pure research man is the pathfinder. Without him our fountain of knowledge would dry up. His findings in themselves may be uncommercial, but they establish a field for others to develop.

Volta worked out the crude voltaic pile—unimportant until other men improved and applied it. And so with Papin in the field of steam, or Lavoisier in chemistry.

Men of the inquiring slant of mind, stick to your last. In post graduate study, on the faculty, in the laboratory of some industrial organization, there will always be an "X" to baffle other men and call for the keenest thought of you blazers of the trail.
