Indications are that what's under the freshman's green cap isn't the only thing on the campus that rattles. It's a stable government if it can stir up enough patriotism to hide the deficit.

station, from where they were broadcast over a 500 mile radius.

Occasionally the operator of the board would get a few plays behind the telegrapher, and the blanks would pile up. One of the blanks was mislaid in the fourth quarter, and the phone man for the radio station grabbed it up before it had been shown on the graph. Unfortunately this blank contained the record of a touchdown; the next blank also held the record of a touchdown. The loss was not discovered until a check was made on the scores. One of the men rushed out to recover the missing blank. In order to even up the score, the operator of the board then had to show the spectacular seventy-yard run which never happened.

When the Nebraska touchdown was made, the men behind the board had a difficult time in restraining their enthusiasm so that the crowd would not learn of the event until it was made plain on the board.

That the crowd was not large enough to pay expenses of bringing the board to Nebraska was the announcement made by "Bob" Russell of the N club between the halves. He stated that unless those in attendance were willing to get additional men out at the next showing, the club would not be able to have the board at the remaining two out-of-town games. When asked whether or not they were willing to bring in a bigger crowd at the next showing, the men responded with a tremendous "Yes!" Russell then stated that the club would contract for the graph.

"Every school in the Western Conference will have one of these boards this year," stated Russell, "and every school but one in the Missouri Valley Conference will have one. At the last out-of-town game at Ohio State a crowd of 8,000 viewed the graph. Nebraska should be able to do a swell."

**The Point that has Youth Eternal**

No style of writing can distort it—no years of use can wear it away

**PARKER DUOFOLD** might well be called the Fountain Pen of Youth. Not that its Over-size ink-sac is everlasting—it is not. Yet should it wear out a few years hence it will take but five minutes to replace it.

But the point—the most vital part of a pen—this Duofold point will far outlast the generation that writes with it.

No need to decline to lend your room-mate this pen, for it never once loses its original shape. It's as smooth as a polished jewel bearing—hence it needs no "breaking in."

Try this super-smooth Parker beside any pen on earth regardless of price. There's a lure in its fit and balanced swing. It urges your hand to its work—it gives your mind free rein!

So don't ever buy an unruly pen—don't use one—such pens distract and discourage. They're the reason Parker created the Duofold. All good pen counters have it.
