**Foxwell and Linder Take "Booster" Prize**

L. G. Foxwell, Lincoln, and Thomas Linder, Beatrice, have both received the first prize of \$25 offered by the Franklin Railway Supply Co., New York city, for papers written by

students at Nebraska describing the "Locomotive Booster."

Announcement of the contest was made by M. H. Roberts, vice president of the company, at the conclusion of a lecture accompanied by a motion picture on the "Locomotive Booster" delivered before the Nebraska branch of the American So-

ciety of Mechanical Engineers.

Dean O. J. Ferguson, Prof. W. L. DeBaufre, and Thomas Roop were judges of the papers.

The ultra-conservatives in England are beginning to fear their worst hopes won't be realized.

JAN. 2, 1940

**Order your 1940 calendar now.**

**NOW** is the time to plan your work for 1940. What you are doing then will depend a good deal on what you do today and after graduation—and the way you do it. Obviously, you improve your chances for a big job if you go where big jobs are and will be. That means fit yourself to take a place in some industry with a future.

Planning twenty or more years ahead is all in the day's work, among the telephone companies of America. The electrical generating and manufacturing companies likewise look far into the future.

To put a telephone in every home, to light the 16,000,000 houses that are not yet wired, to devise and promote many appliances for the comfort of man—all this will require decades of time and billions of capital. Chiefly it will need the brains of men.

It has long been said that electricity is in its infancy. That is still true. You are fortunate who can see this industry a little further along on its way to a glorious maturity.

Wherever people look to electricity for the comforts and conveniences of life today, the Western Electric Company offers a service as broad as the functions of electricity itself.
