

**STUDENTS HEAR
C. O. P. SPEECHES**
(Continued from page 1)

Obey Law a First Duty.
"Obedience to the law is and should be the primary duty of a citizen. The eighteenth amendment is as much a part of the fundamental law of the land as any other part of the constitution. I also am not satisfied with the present tariff law. I believe in the principles of a protective tariff. I think the present tariff should be modified in the interests of the agricultural sections of the country. Farming is the true basis of the prosperity of the country and no tariff that puts an unfair burden on either crop or live stock raising can be permanently retained."

Mr. Selleck declared that he favors a permanent world court. "I believe that the United States should enter the court under the conditions laid down by President Harding in February 1923 and as endorsed by President Coolidge in his first message to congress. The public generally has come to accept the fact that the restrictions and reservations proposed by the senate to the league of nations covenants were wise. I believe the United States should work to cooperate with the league along the lines laid down by the senate reservations, and the government should take steps to secure such cooperation recognizing that the great usefulness of the league of nations is by moral force and not by a threat of military power."

**VISITOR FROM TROPIC
GOES ON HUNGER STRIKE**
(Continued from page 1)

Luis could not get along with the frog. He refused to make friends with it. In fact, they were not even on speaking terms when the frog was removed by one of the instructors.

Not Even a Rat.

A large, healthy rat was next offered the snake. Perhaps Luis was not hungry (in spite of his fast) or perhaps he felt he was in a weakened condition, and not able to cope successfully with the animal. At any rate, he did not attempt to eat the rat.

Fearing that Luis might be afraid a mouse was put in his cage, but even this small animal did not arouse him to action.

Boa constrictors can go for mouths without eating and still remain alive, and Luis is still strong enough to look about. But the men of the zoology department are a little anxious for the health of the snake, and they propose to use force, and make Luis eat beefsteak.

They have not yet spoken to Luis about it.

**FRESHMEN HEARS TALK
BY PROFESSOR HYDE**
(Continued from page 1)

serious study of the subject by means of several experiments. The first of these she called "The bloodless operation with the hand," showing her audience how they might see an object through the palm of the hand, by rolling a sheet of paper into a tube, and holding it before one eye, with one hand in front of the other eye, and against the tube. Both eyes were to be left open and the result was that one apparently saw an object through a hole in the middle of the palm.

Fixating Experiment Shown.

In the next experiment two fingers were held at different distances from the eye, the farther a little higher than the other. By fixating the eye one or the other of the fingers, the image of the other finger appeared double.

Professor Hyde showed several charts that had been made by different members of her classes, showing their perceptions of color. None of the charts were arranged similarly, showing that the same colors appear different to different people.

Different optical illusions were presented. A black square on a white card, appeared larger than a white square on a black card, although they were really the same size. Lines of the same length were so drawn as to appear of different lengths. The blind spot, and color blindness were also discussed.

WILL party who took Gaberdine top-coat and cap by mistake at University party Saturday evening kindly return same to Nebraskan office and receive own in exchange. Arthur C. Lamp, 217 So. 17th.

A RARE OPPORTUNITY: Men and women make enormous profits. Article costs 5c, sells quickly for \$1.00. Can make \$15 daily. Send two 2-cent stamps for particulars. Address C. E. Mull, 123 1-2 E. Wash street, Iowa City, Iowa.

RENT-A-FORD—Show it yourself Munson Motor Co., phones B1550 and B1517, 1125 P Street.

Expose Unreliable Senses.
With the assistance of members of the class, Miss Hyde performed experiments on sensations of sound and of touch. The subject sat with eyes closed and Miss Hyde made a noise, a single tick, at different places near him. When the sound was immediately in front of or behind him its direction was often indistinguishable to him. In the sec-

ond of these experiments, several objects of different shape were pressed upon the back of the hand of the subjects, and he could seldom tell their shapes.

The last experiment was one of a series given to prospective munition workers during the war to determine the facility with which they were able to discriminate between objects quickly and accurately.

**Splendid Stocks of New
College Clothes Await
Your Choosing Before
You Go Home.**

From Stratford, we've received during the last few days the most distinctive clothes we've ever shown.

A host of new Powder Tints have just come in; beautifully tailored in the new two and three button English coats.

New English Foulards are in great demand.

Several new patterns in the "Jack" cap have just come in.

Stop in today and select the things you'll want.

STETSON HATS
Styled for young men

The ivy won't save any of us

THE ivy of tradition is a slender support. A man or a team or a college that clings to it, harking back to the glories of yesterday, is likely to be outstripped by some young but sturdy rival. That is a sermon we have taken home to ourselves.

The Western Electric Company is proud of its fifty-four years of history. But it is a great deal more concerned with the next fifty-four—and that is why we have been talking to the college men of America month after month now for four years.

The future of this business depends not so much on the physical equipment we have built up as on the mental equipment which men of your generation are building—on your habits of study and conduct, on your right choice of a profession and your proficiency in it. So we have made suggestions for your guidance, with the conviction that they can help you—and us.

Published in the interest of Electrical Development by an Institution that will be helped by whatever helps the Industry.

Number 36 of a series

A BIG willing companion for every note book

ACTUAL SIZE

You like to grasp a pen like this. It's big. It's husky. It looks strong, reliable, long-lived. And it is.

This new Wahl Signature Pen is a wonder for college work. It never needs prompting. You don't have to shake it. Touch that flexible point to paper and the ink starts with your thought.

The Wahl Comb Feed regulates the flow so perfectly that the ink never floods. The ink capacity is enormous.

And the everlasting nib—it's a marvel. It suits itself to any writing style. Just seems made for your hand. It is heavy 14-karat gold. Tipped with the hardest and finest grade of iridium that money can buy. Experts say this everlasting nib is the finest made.

Another big idea—clipped in pocket, purse, shirt-front, or notebook, the Wahl Signature Pen will not leak. The patented cap-construction assures this. The gold band you see around the cap prevents splitting.

There are two big sizes at \$7 and \$5—one for men, one for women. Ask for the Wahl Signature Pen. Other Wahl Pens from \$2.50 up.
