School of Chemical Engineering Practice

INDIVIDUAL and practical training at five industrial plants are important features of the Graduate Course in Chemical En-

Boston, Mass., and Buffalo, N.Y.; in plants producing sulphite and soda pulp, paper, caustic soda, chlorine, heavy acids and salts, sugar, coke, gas, steel and other chemical products.

The more important operations of Chemical Engineering, as typified by the above processes, are studied systematically by

tests and experiments on actual plant apparatus, thus fixing in the student's mind the principles of Chemical Engineering and correlating these principles with practice.

The work is non-remunerative and independent of plant control, the whole attention of the students being directed to

Registration is limited, as students study and experiment in small groups and receive individual instruction.

Admission requires adequate preparation in chemistry and engineering. Able students can complete the requirements for the Master of Science degree in one and a half years.

Representatives of thirty colleges and universities now at-tend the School of Chemical Engineering Practice.

Another Masculine Touch In The

Suspender Skirt

If the young college girl wants to be decidedly new she will wear a Suspender Skirt with a brightly embroidered peasant blouse. There is something very piquant about the entire costume and on a slim figure the slightly flaring skirt patch pockets and mannish straps over the shoulder gives a quaint little dressed-up-like-a-boy appearance. The ones Rudge & Guenzel's are showing are both plaid and plain though always very bright.

First Lieutenants - R. G. Shellenbarger, Erwin E. Perso, Darrel R. Weaver, George Gulmyer, Roscoe D. Tutty.

DOING BETTER Second Lieutenants - Gerald Davis, Hartley B. Mann, Richard A. Robinson, Donald F. Sampson, Floyd Markswomen Fire Best Score R. Stryker.
