

WILL PRESENT FAMOUS DRAMA

University Players Will Appear in "The Devil's Disciple" by Bernard Shaw.

HERBERT YENNE WILL PLAY LEADING ROLE

"The Devil's Disciple," a melodrama in three acts written by Bernard Shaw, will be given by the University Players in the Temple theater Thursday, Friday, Saturday evenings and Saturday afternoon. Herbert Yenne will play the lead and will be supported by a strong cast.

"The Devil's Disciple," one of Shaw's earlier plays was first introduced to American audiences by Richard Mansfield. After a lapse of a quarter of a century, the wit of the play has not dulled. In his play, Mr. Shaw tries to prove that all good men are cowards and knaves, and only blackguards and ne'er-do-wells can be counted on to do the right thing. As a jester, Mr. Shaw has his place as an entertainer.

The play deals with a man who had been brought up in a Puritan community. He rebels at the restrictions placed upon him and runs away from home. He is then considered the "black sheep" of the family. At the death of his father he is left sole heir to the property and returns home to take his place in the community.

Shortly after he arrives, he is mistaken for a minister and is taken away to be hung. He shows his heroic qualities by accepting the masquerade. In the meantime, the minister has recruited an army and won in battle. With a hangman's rope about his neck, the Devil's Disciple jests with death while the fatal minutes speed by. At the crucial moment the minister returns to save the Disciple from being hung.

The action of the play is laid in New Hampshire in 1777. Mr. Shaw says that most of the incidents of the play are historically true as in most drama. The play will be costumed in the style worn during the Revolutionary war.

MAY STILL ENTER FRAT MEET TODAY

Drawings for Annual Wrestling Match Will Be Made at 5 O'clock.

Fraternities have one more day in which to enter the first annual interfraternity wrestling meet which will be held Wednesday, Thursday, and Friday of this week.

Entries must be turned in at Dr. R. G. Clapp's office by 5 o'clock this afternoon. Drawings will be made at that time.

A change in plans of the meet will allow more men to enter, it is believed. Former plans called for the matches in the evening, but the new schedule cards the preliminaries on Wednesday from 4 to 5 o'clock. Men will be required to weigh in for their matches at 11 o'clock each day. The classes will be as follows: 108, 115, 125, 135, 145, 158, 175-pound, and heavyweight.

Paine Is Elected to Graduate Scholarship

Leland S. Paine, graduate student in the department of geography, has received word of his election to a graduate scholarship in geography next year at the University of Wisconsin. He was chosen from a large number of applicants on a basis of comparative ratings. He will continue his graduate studies there, and assist in the department of geography. Economic geography is the particular branch in which he is chiefly interested.

"Fellowship, good behavior, respectability and ability to meet and know men—all these may be summed up in one word, fraternities," declared Danridge Spotswood of Virginia, who was recently the principal speaker at a banquet given in his honor at West Virginia University.

Announce Program for Weekly Vesper Service

Agnes Kessler, retiring president of the Y. W. C. A. will lead the devotional services and will speak at Vespers at 5 o'clock this evening in Ellen Smith Hall. Ida Flader will give a reading, "The Sign of the Cross." There will be special music by the choir. All University women are invited.

Curator Completes Classification Of Mineral Specimens in Museum

Classification of the five hundred distinct species in the mineral section on the third floor of the museum has been completed. Most of the work, representing a year's effort, has been done by F. G. Collins, assistant curator.

The collection includes mineral species from all over the world. The number of minerals which are common and easy to get does not far exceed 150. Out of the rest of the exhibit many of the stones have been secured by the field of collections of Prof. E. F. Schramm of the department of geology. Some have been bought. Others have been acquired as the result of exchanges with educational institutions from all parts of the world.

Outstandingly curious are the specimens of "petrified lightning," or fulgurite, long, brown zigzags of hardened sand. These are created when the lightning strikes the sand-hills and fuses the sand into hollow tubes, glazed within, forming manganese fulgurite. Only one or two examples are found in the state. That in the museum is broken into a number of pieces. It was removed from the earth intact in the long, irregular trail cut by the flash of lightning.

ALUMNUS IS CARTOONIST

Jefferson Machamer, '18, Holdrege, Is on Staff of Judge

Jefferson Machamer, '18, of Holdrege, is now one of the cartoonists on the staff of Judge. After leaving school Mr. Machamer went to Kansas City where he was employed on the Kansas City Star. He soon left for New York and worked for the Tribune in that city. It was on this paper that he did the work that has made him famous.

Mr. Machamer is twenty-six years old and is recognized as one of the foremost cartoonists in the United States.

CHEMICAL SOCIETY TO ELECT MEMBERS

Phi Lambda Epsilon Will Hear Frankforter at Thursday Meeting.

New members to Rho Chapter, Phi Lambda Epsilon, honorary chemical fraternity, will be chosen at a meeting Thursday evening at 8 o'clock in the lecture room at the Chemistry building. C. J. Frankforter, assistant professor of chemistry, will talk on the manufacture and uses of explosives.

Members of the fraternity, which was established at Nebraska in 1922, are chosen from chemistry students with a high scholastic standing. The new men are elected by the active chapter in consultation with members of the faculty, who are associate members of the organization. The active chapter of Phi Lambda Epsilon numbers eight, and R. W. Maxwell is president. The new members will be picked from graduate students and others high in standing.

Mr. Frankforter stated that because the meeting was open to outsiders, his lecture would not be of a technical nature. He will deal with the manufacture of the more common explosives and their uses, both from a military and a commercial standpoint. Both types, high and low explosives, will be gone into fully. The lecture will be illustrated with sixty samples of explosives, and two reels of motion pictures, furnished by the Bureau of the Mines, and the Hercules Powder Company.

With an enrollment of 40,000, including the extension students, the University of California is the largest educational institution in the world.

New York University Will Sponsor Nine European Summer Study Groups

In spite of the age-old saying that a rolling stone gathers no moss, New York University intends to prove that just the opposite is true by sending nine European study groups out this summer. Migratory students will travel from Italy and Greece to as far north as Scandinavia.

They will browse around the famous galleries and art museums while in Europe, delve into economic condition, and "do the sights" of the famous landmarks on the continent. Language, economics, history, literature, economic and commercial geography, art and poetry are included in the curriculum. College credits are given in all the courses.

ning, and pridefully displayed in its most realistic attitude in the museum. Later, the curiosity was sent to a convention of geologists in the east. While describing the phenomenon, the lecturer allowed it to drop to the floor and break comparatively short pieces.

Another rare feature of the exhibit is the specimen of carnotite, or radium ore. A hydrocarbon substance named sutterite resembles ordinary clay, but burns like asphalt. It is shown in the form of small brown chunks, coming from Utah and northern Colorado, where it is associated with the oil shales and gilsonite deposits. It is not found in sufficient quantity, however, to justify extensive commercial use.

A fine mineral gem, the kunzite, has been contributed by Robert Whitman, Los Angeles mineralogist. This species gets its name from Tiffany gem expert Kunze. It is found in San Diego county, California.

One of the finest sets of fluorites in the possession of any museums comes from Cumberland, England. These are gem minerals of great clearness and luster, and are found in a number of bright colors, commonly yellow and purple.

NEBRASKA DEBATERS HOLD POST MORTEM

Discuss Matches with Iowa and South Dakota in Traditional Session.

The Nebraska-Iowa and the Nebraska-South Dakota debates on whether Congress should have the right to overrule decisions of the Supreme Court, were completely "hashed over" at the annual post mortem in University Hall 106 yesterday afternoon by members of the two teams and the faculty.

David Sher, '28, Ralph S. Brooks, '25, and Lloyd J. Marti, '27, members of the negative team, gave a complete account of the match at Vermillion.

H. H. Foster, of the Law College, took part in the discussion, which lasted an hour. Other members of the faculty and former Nebraska debaters were present at the meeting.

CALL FOR STADIUM PLEDGES APRIL 24

Statements Will Be Sent Out; Last Installment for 1922 Notes.

Stadium pledges come due again April 24, and statements will be sent out to everyone then. This is the last installment for those who pledged in 1922, and is the fourth for those signed the next year. Actual pledging was done earlier, but the pledges did not take effect until the contract for work was let April 24, 1922.

The last general statements were sent out on October 24, 1924, and the results were good. Other statements are sent to delinquents through the alumni office every month. The next general statement will be sent out in October, 1925.

Expect Dean Seavey Home from Ashville

Dean Warren A. Seavey, of the College of Laws, went to Ashville, N. C., a week ago to attend a conference of the American Institute on Agencies, is expected to return today. Dean Seavey is a member of the Institute.

The Northwestern university glee club is to give a concert at the University of California.

STUDENTS GIVE ONE-ACT OPERA

University School of Music Presents "Cavalleri Rusticana" Monday Evening.

SICILIAN VILLAGE IS SCENE OF PRODUCTION

"Cavalleri Rusticana," one-act opera by Pietro Mascagni, was sung by students of the University School of Music last evening in the Orpheum theater.

The scene of the opera is laid in a Sicilian village on Sunday morning. Leads were taken by Fanie Wagner, as Santuzza, the betrayed sweetheart; Agnes Backstrom, as Lucia, mother of Turridu, the fickle young soldier (Wyatt Hunter); Lola, coquettish wife of Alfio, the village teamster (Jacob Friedli), Helen Cowan.

Madam Gutzmer, whose class in opera sponsored the production, served as stage director. Howard Kirkpatrick directed the chorus and C. A. Steckelberg the orchestra. Hart Jenks and Adrian Newens served as dramatic coaches. Fleda Graham was the accompanist.

Although Madam Gutzmer's class has studied several great operas during the term, this is probably the only one which it will produce. "Cavalleri Rusticana," composed in 1890, is the one great composition of the Italian musician Pietro Mascagni. Great brilliance and variety is displayed in the melody, and the widest extremes of joy, sorrow, contentment and passion, are given expression in the score.

Following were the other members of the cast:

Flower girls: Katherine Costin, Florence Bennett, Ruth Warner, Harriett Taylor, Edna Leininger.

Sopranos: Bernice Mallat, Faye Hulbert, Frances Jacques, Mrs. F. G. Campbell, Esther Novotny, Maude Bryant, Maurine Jenkins, Mrs. A. W. Nelson, Helen Hillie, Mary Truner.

Altos: Ruby Warner, Bessie Novotny, Mrs. E. T. Williams, Mabel Zimmerman, Margaret Mahaffey, Olive Bentz, Aline Oleson, Mamie Gebhart, Jessie Nichols, Felice Sternberg.

Tenors: Hobart Davis, Edward Ellingson, Albert Friedli, Ivan McCormack.

Baritone: John Mattox, Gale Fowler, William Newens, Ellif Oleson, Richard Lowe, Dietrich Dirks.

HIGH WILL SPEAK AT CONVOCATION

"What Shall We Think of Russia" Will Be Subject of Address.

E. Stanley High, author and newspaper correspondent, will talk at University convocation at 11 o'clock at the Temple on "What Shall We Think of Russia." Mr. High recently talked before the World Forum.

His "Revolt of Youth" and "China's Place in the Sun," two late books, have created favorable impressions. A third book will probably be off the press soon.

Mr. High attended Nebraska Wesleyan before he entered the World War. His parents live at University Place.

SIX ALUMNI WORK IN JAPAN

Engineering Graduates Represent Five Companies There.

The College of Engineering of the University of Nebraska has six alumni engaged in engineering work in Japan—four in Tokyo, one in Osaka, and one in Kobe—representing five different commercial organizations. These men are:

Kinju Akagi (Civ. '10, Elec. '11), electrical engineering department, Kawasaki Dock Yards Company, Kobe, Japan.

Stanley Bracken, (Elec. '12), representative of the Western Electric Company, at the Sumitomo Electric Wire & Cable Works, Ltd., 80 Okijima Minamino-cho, Nishi-Ku, Osaka, Japan.

Ivan F. Baker (Elec. '09) and Clarence A. Johnson (Elec. '06, E. E. '15), the former as manager and the latter as resident engineer for the Westinghouse International Company in Japan. Address: care of Takati & Company, Marunouchi, Tokyo, Japan.

William K. Fowler (A. B. '14, Elec. '15), representative of the International General Electric Company, Chiyoda-Kwan, Minami Denma-cho, Kyobashi-Ku, Tokyo, Japan.

Howard C. Kendall (ex-Elec. '03), engineering department of the American Trading Company, Box 26, Central P. O., Tokyo, Japan.

Wants Applications For Nebraskan Staff

Applications for appointment to the following positions on the editorial staff of The Daily Nebraskan for the second half of the semester will be received until noon, Wednesday, March 25: editor, managing editor, news editor, assistant news editor.

Application blanks may be got at the office of the chairman and of Secretary J. K. Selleck. M. M. FOGG, Chairman, Student Publication Board.

INCLUDE MONEY TO IMPROVE R STREET

Would Resurface Paving and Install New Lighting System Along Campus.

The State Senate finance committee voted to include an appropriation of about \$17,500 for widening and resurfacing the paving and installing new street lights along R street where it borders the campus in the general appropriation bill for this work at its session yesterday.

A system of lighting along the street similar to that used in the downtown districts is proposed. The committee agreed that the lighting system now in use was too dim and in view of the fact that many students are obliged to come to the University during the evenings, a better system was needed badly.

The street work and the installation of lights, if the bill is passed, will be on R street from Tenth to Fourteenth streets. The amount appropriated is the regular share of the State in street work, the rest of the cost being borne by the property owners along the street affected.

DISTRIBUTE MARCH ISSUE OF MAGAZINE

Nebraska Blue Print, Engineering Publication, Is Published.

The Nebraska Blue Print, publication of the College of Engineering, for the month of March is now ready for distribution. The cover bears a picture of historic University Hall and the grounds to the south of it. The feature article of the issue is written by C. H. Murray of the American Rolling Mill Company on the topic "Simplifying the Selection of a Career."

An article on "Lightning" written by F. W. Peck, Jr., of the General Electric Company also appears in the March number. Another feature of the issue is a discussion of "Decimal Point Determination in Slide Rule Operation" by Prof. James T. Rood of the University of Wisconsin.

The "Hall of Fame" department nominates C. R. Richards, president of Lehigh University, for its membership. "The Dean's Corner," editorial comment and numerous smaller articles complete the issue.

UNIVERSITY OF COLORADO

That not over 20 per cent of the college students have the mental capacity to make Phi Beta Kappa, is the belief of the faculty of the university. They would discourage the idea of every student having that honorary fraternity as his goal.

CORNELL UNIVERSITY — Because of scholastic deficiencies, 257 students were dropped from the school at the end of the semester. Most of these were dropped from the engineering school. The average number dropped in the last five years at the end of the first term is 255.

Oregon University dormitories have arranged a special diet table for overweight girls.

Students at Syracuse University Cut Thousands of Classes Yearly

Compile Figures Pertaining to Absences During First Semester.

Thirty-seven thousand, two hundred and fifty-three "cuts" were taken by students at Syracuse University, New York, during the first semester of the year according to figures announced by the absence committee of the institution, last week.

The average student at Syracuse, according to these statistics took nine absences from classes during the semester—an increase of 36 per cent over last year. The majority of the absences were excused, however.

Russel Will Give Math Club Address

Prof. M. E. Russel of the physics department will address the regular meeting of the Math Club tomorrow evening at 7:30 in the lecture room of Brace Laboratory. The topic for the speech is "Cameras and Camera Lenses." Prof. W. C. Brenke will present a mathematical crossword puzzle which he has designed for solution by members of the club.

BEGIN OUTSIDE TRACK TRYOUTS

Husker Athletes Who Will Meet Stanford Will Be Chosen in Trials Today.

TRACKSTERS PREPARE FOR CALIFORNIA TRIP

The first outdoor tryouts of the year, and the final tryouts for the first Husker outdoor meet with Lehigh-Stanford University on April 4, at Palo Alto, California, will be held this afternoon on the cinder track inside the Nebraska Memorial stadium, if weather conditions are auspicious. Failing that, the tryouts will be staged on the indoor track under the east stand.

The tryouts will begin at 3:15 o'clock with the mile run, followed at fifteen minute intervals by the hurdle, dashes, half-mile run, low hurdles, 440-yard dash, and the two-mile. Field events will be staged while the track events are being run off.

The initial Husker outdoor track meet with the California university is on Saturday, April 4. The Nebraska team, consisting of about twenty members will leave March 31 travelling direct to Palo Alto, California, to meet Stanford. The return trip will be by way of the southern route, a dual meet having been arranged with the University of New Mexico at Albuquerque.

Varsity track men have been busy the last week or so getting ahead in their studies so as not to fall behind after the trip, which will take about a week's time, part of it being included in the regular spring vacation.

Captain Crites, quarter-miler, who was unable to compete in the last meet on account of a pulled tendon, will probably be in shape for the California meet, and if not that, for the New Mexico meet.

The Stanford track team this year is one of the strong coast aggregations, and the two schools will be about equally matched, with slight advantage on the side of the California school. Nebraska's weakness in the field events, is a factor favoring Stanford, although Krimmelmeyer's placing in the shot put in the Valley meet at Kansas City, and Wisconsin's showing in the pole vault, have raised Nebraska hopes. The Nebraska strength will be in the track events, hurdles, dashes, and middle distance runs.

New big ten standings were posted yesterday for the javelin throw. Westontal heads the list with a heave of 166 feet. Johnson is third at 160 feet and ten inches. In the discus, Scot stands alone with 120 feet to his credit.

The schedule for the tryouts this afternoon is:

- 3:15—Mile run.
- 3:30—12 high hurdles.
- 3:45—100-yard dash.
- 4:00—880-yard run.
- 4:15—Low hurdles.
- 4:30—440-yard dash.
- 4:45—220-yard dash.
- 5:00—Two-mile run.

Field events, pole vault, shot put, and discus at 3:15. Broad jump, high jump, and javelin at 4:00.

UNIVERSITY OF CHICAGO

The University of Chicago has given its football financial estimate. Receipts reached \$500,000, with a possible profit of \$200,000. More than 245,000 fans saw the last year's games.

AMEND BILL FOR APPROPRIATIONS

Senate Includes \$750,000 for University Buildings in General Expenses.

SET ASIDE \$240,000 FOR STATE NORMAL SCHOOLS

An appropriation of \$750,000 for buildings for the University was included in the amendments to the general appropriation bill for State expenses by the Senate financial committee before it adjourned yesterday noon. \$240,000 for the state normal schools for building purposes was also included in the appropriation, which will total approximately \$26,000,000.

The committee has thus cut out the University and normal school levies for ten years and substituted a flat appropriation of the amount which it is estimated would have been raised by the proposed levy of one-eighth mill for the University and one-twenty-fifth mill for the normal schools.

The bill will be sent back to the House following its amendment. It will probably be referred to a conference committee, where revision of many items included in the bill will probably take place.

SIGMA LAMBDA INITIATES FIVE

Professional Arts Sorority Holds Annual Banquet Saturday Evening.

Sigma Lambda, national professional arts sorority, initiated five women at its annual initiation held Saturday evening at the Lincoln Hotel. The new members are: Henrietta Dirks, '28, Lincoln, Miriam Reynolds, '28, Creston, Iowa, Gladys McDonald, '28, Lincoln, Helen Bachmer, '27, Lincoln and Ernestine McNeill, '28, Lincoln.

The annual banquet preceded the initiation. The room was decorated in snapdragons, the sorority flower and flame and pekin blue, the colors of the sorority. Seventeen members attended the banquet.

Beta Chapter of Sigma Lambda was installed in 1923. The sorority was organized at the University of Wisconsin in 1922 where it was installed as Alpha chapter. The active members of Sigma Lambda at Nebraska are: Louise Austin, Charlotte Endberg, Olivia Van Anda, Irma Guhl, Olive Kier, Dorothea Dawson, Mrs. Aileen Acton, Koren Jensen, Jessie Ullstrom, Marie McGeer, Emma Schuller, and Viola Looseback.

Y. W. C. A. Staff Will Hold Dinner Tonight

The association year of the Y. W. C. A. will be closed after Vespers this evening with a staff dinner at Ellen Smith Hall. Reservations should be made with chairman and from Miss Erma Appleby, Y. W. C. A. secretary. Fifty cents is the charge for a plate.

Doris Trotter, vice-president of Y. W. C. A. for the past year, will preside over the business meeting and discussion. The poster and finance staffs will be in charge of arrangements.

Second Edition Will Be Ready Thursday

The second edition of "Nebraska the Beautiful," bulletin published by the Conservation and Survey division of the University under the supervision of the director, Dr. G. E. Condra, will be off the press Thursday. Approximately a thousand requests for the bulletin are yet to be filled.

Freshmen at the University of California are busy scrubbing the red paint off of the large "C" which is on a hall back of the campus. The original color is golden, and it is the duty of the freshman class to keep the color immaculate during the school year.

Psychology Is Subject Of Lecture by Dr. Hyde

The freshman lecture Monday evening was given by Dr. Winifred F. Hyde, professor of psychology, who talked on the general subject of "Psychology." Miss Hyde will give the same lecture to students of the second section of the class this morning at 9 o'clock.

Women law students at the University of Iowa maintain higher scholastic averages than the men.
