

MAY STILL GET GOOD TICKETS

200 More Good Seats May Be Purchased for "Tut Tut."

WILL BE PLACED ON SALE TODAY AT THE ORPHEUM

Two hundred more good tickets for the 1925 Kosmet Klub production, "Tut Tut," to be presented Friday night at the Orpheum Theater will be placed on sale at the Orpheum Theater at 10 o'clock this morning. The ticket sale which started Monday noon has been very good, but Kosmet members announced late Monday afternoon that there would still be some excellent seats obtainable this morning.

The cast of fifty has been working daily in preparation for the first presentation here Friday night and the showing in Omaha Saturday night.

Seats in the first eighteen rows on the main floor and the first three rows in the balcony are being sold for \$1.50. All other tickets are \$1.00.

The ticket sale in Omaha, which was also started Monday, is reported to be going well as in past years. Tickets in Omaha are being sold at the Brandeis Theater, where "Tut Tut" will play Saturday night. Students who wish to buy tickets for the Omaha performance may get them by seeing Robert Craig, business manager of the Kosmet Klub.

Plans for the Omaha trip have been completed. The cast will leave at 1:30 Saturday in a special car. A rehearsal at the Brandeis Theater will occupy the entire afternoon. Kosmet Klub alumni in Omaha will entertain the cast at a banquet and reception at the University Club.

After the show the cast will be entertained by the Phi Rho Sigma fraternity with a dance at the chapter house.

Work on the stage settings is now going on under the direction of Dwight Kirsch. This is the fourteenth annual production of the Klub.

FRESHMEN WIN BASEBALL TITLE

First Year Team Is Winner of Women's Indoor Ball Tourney.

The freshmen won the women's indoor baseball tournament by defeating the sophomores in a hotly contested game yesterday afternoon by the close score of 10 to 11. Both teams had defeated the upperclassmen by large scores in the preliminaries.

The freshmen took the lead in the first inning when Lohmeier knocked a home run with the bases loaded. This lead was overcome in the third when the sophomores, aided by a home run by West, rallied and tied the score. Both pitchers settled down and few runs were made until the last two innings, when both teams started slugging the ball. Otten placed the freshmen ahead when she cleaned the bases with a home run.

Kunel and Otten were the battery for the freshmen; Scafford and Hermank for the sophomores. West led the sophomores with four runs, while the freshmen were divided, with Lohmeier hitting a home run, Otten a home run, Modlin two runs, Shreppl two runs, and Schlytern two runs.

The championship freshmen team was composed of the following:

Victoria Kunel, pitcher; Irma Otten, catcher; Helen Schlytern, first base; Lucile Bauer, second base; Wilma Bell, third base; Blossom Benz, right short stop; Grace Modlin, left short stop; Lucile Schoepel, right field; Helen Lohmeier, center field; Geraldine Dunlap, left field; and substitutes, Helen Clark, Dorothy Pound and Marie Kuncher.

The construction of a million dollar lake four miles east of Boulder will make possible at the University of Colorado the introduction of a new sport, rowing. The lake will be two miles long and one mile wide.

Father O'Loughlin Is Vesper Speaker

Father P. L. O'Loughlin of the Cathedral will be the speaker at Vesper services this evening at 5 o'clock. Eloise MacAhan will be the leader for the evening and Katherine Calboath will play a violin solo. This will be the first service under the direction of the new Vesper committee. Father O'Loughlin will conclude the series of speakers chosen from each of the denominations.

Leader of Minneapolis Symphony Orchestra Has Had Strange Career

HENRI VERBRUGGHEN CONDUCTOR OF MINNEAPOLIS SYMPHONY ORCHESTRA

"Henri Verbrugghen looks like a Frenchman, talks like an Englishman, and acts like an American," is the way in which the conductor of the Minneapolis symphony orchestra which will play at the city auditorium Thursday afternoon and evening, has been described.

Marie Tiffany, soprano, will be soloist at the evening performance of the orchestra; Henry J. Williams, harpist, will play at the matinee. Tickets for both concerts are on sale at the Ross P. Curtice music store.

Mr. Verbrugghen was born in Brussels, Belgium, the son of a manufacturer who wished him to become a doctor. The boy was so called to study violin, however, attracting the attention of the Belgian violinist Ysaeye, whose pupil he became. At the age of fourteen he made his debut in London. After five years, however, he felt the futility of his career and determined to become

a conductor, taking a minor position in a great orchestra in Wales. After playing in different orchestras in England and on the continent, he was finally offered the assistant conductorship of the Glasgow, Scotland, symphony orchestra.

The fame of Verbrugghen was heightened by his conducting of the London Symphony orchestra in the famous Beethoven Festival of 1914. He was recalled the following year to conduct the Beethoven-Brahms-Bach festival. Then came the call to head the State Conservatory in Sydney, Australia, and, finally, the leadership of the Minneapolis symphony orchestra.

"Minneapolis has had time to look over Mr. Verbrugghen," says an editor in the Minnesota Daily Star, "from the standpoint of a conductor, a soloist and a member of our community. It has put the seal of approval." (Continued on Page Three.)

APPOINT NEW R. O. T. C. HEAD

Lieutenant Colonel Frank F. Jewett Will Succeed Major Erickson.

NEW COMMANDER IS UNIVERSITY GRADUATE

Lieutenant Colonel Frank F. Jewett, United States Infantry, has been detailed as Professor of Military Science and Tactics at the University of Nebraska to follow Major Sidney Erickson, according to a report from the Military department yesterday. The appointment, made by the chief of infantry at Washington, D. C., with the approval of Chancellor Samuel Avery, will take effect July 1, 1925.

Lieutenant Colonel Jewett visited the University on Tuesday of last week to meet the Chancellor and inspect the campus. He is a graduate of the University of Minnesota, '01, and entered the army as a second lieutenant in February, 1902. At present he is at Fort Leavenworth,

Kansas, attending the General Staff School.

Major Erickson will leave immediately after commencement, when he will relinquish all connections with the University of Nebraska. The completion of this year will finish his fourth year, which is the maximum time limit at one school as ordered by the federal government. Major Erickson will spend the summer at Fort Snelling, and will then go to the Infantry School at Fort Banning, Georgia.

Smith College.—A branch of the college will be established in Paris next year, when 25 juniors will study at the Sorbonne. Students who attend must have completed all their college requirements and must have French as their major subject. The charges will be the same as they are on the home campus.

The University of Michigan has asked for the state appropriation of \$3,192,700. Legislators are visiting the campus before acting on the bill.

Accounting is one of the most popular fields for graduates in the Course in Commerce at the University of Wisconsin.

Expensive and Elaborate Scenes Made For Kosmet Production "Tut Tut"

The audience at the Kosmet Klub production "Tut Tut," Friday night at the Orpheum Theater will view the most elaborate and expensive stage settings ever attempted by the Kosmet Klub in its fourteen years of musical comedy production.

The six settings of the show will cost \$600, which exceeds by far any amount ever spent for scenic effects in previous years.

The most elaborate and expensive scene of the entire show will be a bazaar scene which includes tents, booths, a masque, and a balconied street. This scene alone will cost the Klub \$250.

Dwight Kirsch, an instructor in the Fine Arts College, has designed and executed the unusual scenic effects. Robert Secular is the Kosmet Klub representative in charge of the scenes. Work is now well under way.

The production calls for a tomb scene—the tomb of the ancient Pharaoh Tutankhamen—which will be one of the most unique effects ever pro-

duced in the city. It will include the ancient Egyptian hieroglyphics on the wall. Kosmet members have called this the "big" scene.

The first scene is the country estate of Mrs. Wetheris. The second is on board the ship "Acrobatic" in which realistic waves will be depicted.

The third scene, "Port Said," includes a dim street-light effect. This difficult illumination is being worked out under the director of Mr. Kirsch. The fourth scene is the bazaar scene in Cairo which has been made correct in every detail after a careful research on the part of Mr. Kirsch and large expenditures on the part of the Klub.

King Tutankhamen's tomb will be shown in the fifth scene in all of its splendor and riches. The sixth scene returns to Cairo, but will be different from the fourth scene in many details.

This year's production calls for an unusual amount of research and study due to the effects which are necessary.

BALL TEAM TO MEET MISSOURI

Fifteen Men Included in Squad Which Left Yesterday For Columbia.

TIGERS ARE EXPECTED TO BE EASY FOR HUSKERS

This week's schedule:
Tuesday—Nebraska at Missouri.
Wednesday—Nebraska at Missouri.
Thursday—Nebraska at St. Louis University.
Friday—Nebraska at Washington University.
Saturday—Nebraska at Washington University.

Fifteen baseball men left at 4:00 p. m. yesterday for Missouri. The Huskers will reach Columbia early this morning and will play the first Valley encounter this afternoon against the University of Missouri.

Coach W. G. Kline and the Huskers took the Burlington to Omaha and the Wabash from Omaha directly to Columbia. They will play Missouri this afternoon and Wednesday, leaving the Missouri town Wednesday evening.

Thursday's game will stack the Nebraska men against St. Louis University in a non-conference contest, and Washington University will be the opponent in a pair of conference games Friday and Saturday. The team will return to Lincoln Sunday.

Coach Kline is taking four pitchers on the trip. Beryl Lang and "Choppy" Rhodes are the letter hurlers and Irvin Domeier and Joe Edwards will be on the mound some time during the week as new men. Lang will probably pitch the opening game today.

The other end of the battery will be held up by Ewell Lang and Earl Jardine. Lang is a letter man and brother of Beryl Lang. He will catch his brother today.

One extra infielder and one extra outfielder will complete the list. Kline's fast infield, Volz, Captain Janda, Andresen, and Gradville, will have a utility man in Tommy Thompson, a sophomore who has been showing up well in practice. Thompson usually plays around the second sack.

"Mutt" Volz, basketball captain and baseball letter man of last year, will hold down first base and Ray Janda will lead his men from the keystone bag. Roy Andresen, basketball letter man, is on deck for the shortstop position and Frank Gradville signs his name at the hot corner.

Nebraska will have an all-letter man outfield Clark Smaha should get into most of the games. He was second high hitter during the games at St. Mary's, Kansas.

The Missouri Tigers should be comparatively easy for Nebraska. The Columbia bat-swingers have lost to Oklahoma and dropped a brace of games to Kansas Aggies last week.

MC MULLEN WILL ADDRESS CLUB

Charles Shepard Will Also Speak on Banquet Program.

Charles M. Shepard, Grand Chaplain of the Grand Lodge of Nebraska, and Governor Adam McMullen will be the principal speakers at the annual banquet of the University Square and Compass Club to be held at the Scottish Rite Temple.

The toastmaster for the banquet will be Frank Johnson, president of the club and music will be furnished by students from the University School of Music.

Prof. Roy E. Cochran and Prof. R. H. Wolcott are in charge of ticket sales for the faculty members and Willard Dover is handling the student sales campaign. The tickets are seventy-five cents and may be obtained from any member of the club.

The committee on the proposed honor system at Harvard, rejected unanimously the adoption of the system. The committee advanced four objections to the system as it would be applied at Harvard; size of the University, loosely knit organization of the school, lack of any strong feeling against the present system of proctors, and the changing nature of the examinations.

Columbia University.—A questionnaire answered by seniors shows that half the class admitted a taste for liquor. Less than half had scruples against marrying for money. Joseph Conrad and Antole France were the favorite authors.

CHOOSE WORLD FORUM SPEAKER

Dr. S. Mills Hayes Will Speak on "The American Mind."

Dr. S. Mills Hayes, former minister of the Holy Trinity Episcopal Church here, will be the speaker at the regular meeting of the World Forum Wednesday at 12 o'clock at the Grand Hotel. He will talk on "The American Mind."

Dr. Hayes is a lecturer in English, history, and art at the University of Nebraska with the rank of professor. He holds L. L. B., L. H. D. and D. D. degrees. He attended the Harvard law school before he came to Lincoln, where he received his first degree.

HAMILTON WILL LECTURE HERE

Famous Dramatic Critic Addresses Convocation Friday.

Clayton Hamilton, one of America's most distinguished dramatic critics, will lecture at the regular University convocation Friday morning at 11 o'clock at the Temple Theater, on "Richard Brinsley Sheridan and His Influence on the Theater."

For several years Mr. Hamilton has been associated with Professor Brander Matthews of Columbia University, New York City, and during this time has become widely known as a dramatic critic. During his trip through the country in advance of the revival of Sheridan's play, "The Rivals, in which Mrs. Fiske and a brilliant cast play, he has been talking on Old English Comedy, the stage in the day of Sheridan and generally, the dramatic art of the eighteenth century.

Mr. Hamilton will also speak at the Temple Theater at a Fine Arts convocation at 3 o'clock Friday on "Dramatic Arts of the Eighteenth Century."

STUDENTS MUST FILE BY FRIDAY

Eighteen Positions Are Open on Publication Board and Council.

All students who wish to file for the positions on the Publication Board or the Student Council may do so at the Student Activities office in the Armory this week until Friday at 5 o'clock. There are eighteen positions to be filled.

There are two qualifications for nomination. The student must be a member of the specified college and class, and he must have made an average of 75 per cent the preceding semester. The names of the applicants will not be announced until after the time limit for filing application.

Election will be held Tuesday, April 28. The polls will be located in the southwest basement room of the Administration Building.

STUDENT GIVES RECITAL

Hobart Davis Presented Varied Program at Temple Theater

Hobart Davis, senior student in the University School of Music, with Maude Fender Gutzmer, gave his Senior Recital last night at the Temple Theater.

The program: Scarlatti—Se Florindo e fedele Pergolesi—Nina. Tosti—L'ultima Canzone. Schubert—Das Wandern. Schubert—Ihr Bild. Rubenstein—Der Asra. Coleridge—Taylor—Cnaway, Awake, Beloved from "Hiawatha's Wedding Feast." Hageman—Charity. Glen—Twilight. Tirindelli—Absent. Tirindelli—Spring-time. Chadwick—The Voice of Philomel. Fleda Graham at the piano.

Cochran Will Speak At Freshman Lecture

Roy E. Cochran, associate professor of the department of American History, will address the Freshman Lecture class this morning on "The External Phases of American History." He was forced to substitute for another lecturer, who was taken suddenly ill.

PLACES OPEN IN Y. W. CAMP

Applications For Positions May Be Had at Miss Appleby's Office

Some unexpected vacancies in the Y. W. C. A. summer camps at Lake Okoboji in Iowa, Lake Maqua in New York and Other Y. W. C. A. camps at various places over the country, provide openings for University students who wish to apply. These vacancies range from positions of waiting on tables to assisting in recreational projects. Applications for these positions may be secured at Miss Irma Appleby's office and should be filled out and handed in immediately.

LANDWER SPEAKS TO PHI SIGMA

"History of Anatomy" Is Subject of Address Given Thursday.

Milton Landwer, instructor of anatomy at the University of Nebraska, gave an address on the "History of Anatomy" Thursday evening before Phi Sigma, honorary biological society.

Mr. Landwer pointed out that ancient civilizations had some knowledge of anatomy. The Greeks showed a knowledge of anatomy in their sculpturing and the Egyptians left records indicating an understanding of the human body. The Romans developed surgery as a result of their numerous wars, and surgery gave them some knowledge of anatomy. India has a book of the fifth century describing over one hundred surgical instruments, some of which were fine enough to cut a hair. Anesthetics were unknown at the time, so rapidity in operation was necessary.

Mr. Landwer spoke briefly of Galen and Vesalius and their contributions to modern anatomy. Probably the greatest handicap to the development of anatomy as a science was a lack of anatomical material. Early anatomists were forced to get their material as the Pre-Medics now get their cats for experiments.

Cochran to Speak at Whittier Junior High

Roy E. Cochran, associate professor of American History, will talk at a convocation at Whittier Junior High School Wednesday at one o'clock on the "Good Old Times that Never Were."

COMPANIES WORK OUT PROBLEM

Military Maneuvers Completed Last Week Will Count in Scoring.

All companies of the Nebraska R. O. T. C. unit took part in the competitive problem held last week. The problem consisted of battle-field maneuvers, and was held on the flats north of the city, extending from 9th to 14th Streets.

Each company completed the problem during the regular drill period. The problem itself lasted two hours, the first hour of the three-hour drill period being spent in instruction and securing the equipment necessary.

Light packs and trench helmets were issued to the men. After marching to the flats, a battle line was formed at 9th Street. From this point the line was advanced according to signals given from field headquarters denoting fire superiority, until it reached 14th Street, where the problem was completed by charging the enemy.

The problem will count fifteen points in the annual compet, which will be held next month. The companies were graded upon the manner of approach, methods used in the solution of the problem, and discipline during the advance. According to the Military Science Department, the grades made will probably be withheld until the final compet is finished.

R. O. T. C. WILL PARADE

Companies Will Pass in Review Before Deans of College

A Regimental parade and review will be given by the University R. O. T. C. corps on Friday, April 24, for the deans of the various colleges, according to orders from Major Sidney Erickson's office yesterday.

The first call will be at 5 o'clock and the final assembly will be called for 5:10. All cadets are required to attend unless excused by their instructors. This is the second of a series of parades on various occasions to be held throughout the coming year.

ENGINEERS WILL HEAR EXERCISE

Oil and Gas Power Week Is Nationally Conducted Affair.

WELL KNOWN ENGINEERS WILL ADDRESS MEETINGS

Students of engineering may attend the exercises of the National Oil and Gas Power Week, April 20-25, sponsored here by the Engineers Club of Lincoln, the American Society of Mechanical Engineers, the American Chemical Society, the Society of American Engineers, and the student branches of the A. S. M. E. and other national engineering organizations.

Observation of the week will consist of a dinner at 6:30 Saturday at the Grand Hotel, followed at 8 o'clock in Mechanical Engineering 206, by a group of speeches touching upon oil and gas power. Assistant Prof. C. J. Frankforter, department of chemistry, will speak on "The Chemistry of Gas and Oil Engine Fuels," "Lubrication" will be the subject of J. Duguid, engineer of tests, Galena-Signal Oil Company. The evening will terminate in meetings of the A. S. M. E., A. C. S., S. A. E., Engineers Club, and the student branches.

Engineers of one or more cities in every state in the Union are observing Oil and Gas Power Week. It is promoted nationally by the following organizations: American Chemical Society of Mechanical Engineers, American Petroleum Institute, American Institute of Mining and Metallurgical Engineers, Society of Automotive Engineers, American Society of Naval Engineers, American Engineering Council, National Electric Light Association, National Association of Stationary Engineers, American Institute of Chemical Engineers, American Society of Refrigerating Engineers, Society of Naval Architects and Marine Engineers, American Society of Marine Designers, American Society for Staid Treating, National Safety Council, U. S. Bureau of Standards, U. S. Bureau of Mines, U. S. Geological Survey, and by local technical societies and clubs, chemical and engineering schools and colleges, and local sections of national bodies.

The national committee in charge of Oil and Gas Power Week consists of: W. F. Durand, chairman, president of the American Society of Mechanical Engineers; James F. Norris, president, American Chemical Society; J. Edgar Pew, president, American Petroleum Institute; Charles E. Luecke; W. Trinks; L. H. Morrison; W. E. Bullock, corresponding secretary.

Use of oil and gas for power purposes is universal. Conservatively, three hundred and forty-five millions of horsepower in internal-combustion engines are installed in the seventeen million automobiles, motor trucks, and tractors used in the United States, exclusive of the total horsepower installed in stationary oil and gas engines, Diesel engines, natural gas engines, producer-gas engines, etc. This makes the total horsepower in internal-combustion prime movers far in excess of the total rated capacity of all the steam and water units.

Domestic production of oil, now nearly three-fourths of a billion barrels a year, has been increasing fast. It took forty-one years and four months to produce the first billion barrels, but only one year and five months were needed to bring the eighth billion to the surface. Yet the demand has kept pace with the output. In all but two years since 1911, domestic consumption, plus exports, has exceeded production by thirteen to ninety-six million barrels. Imports, chiefly from Mexico, have covered the deficit and helped to build up storage stocks.

A prize of \$100 has been offered by the national committee for the best contribution towards the conservation of oil and gas for power purposes, either in the form of a paper presented at one of the meetings throughout the country, or a written discussion of a paper, or of an original essay not exceeding 5,000 words, by anyone attending any of the oil and gas power meetings. Contributions should be in the hands of the national committee not later than June 1. The prize will be awarded by August 1. Communications regarding the competition should be sent to William E. Bullock, corresponding secretary, 29 West 39th St., New York City.

Extension Division Will Hold Luncheon

The regular monthly luncheon held by the University Extension Division for its faculty and employees, will be held this noon at the Grand Hotel. Dr. Hattie Plum Williams will be the speaker at this meeting.
