 You can get all five degrees in the
Classic Duofold Pens
And All Points Guaranteed for 25-Years' Wear
 FOR what kind of writing do you use a pen? How do you hold it?
 And what style of writing is entirely natural to your hand?
 Close figure work or fine memoranda, for example, call for a fine
 or an extra-fine point. But the medium point, the broad, or the stub
 —these give one's penmanship a personality and character that
 make mighty valuable impressions in a letter or a signature.
 These are reasons why, in the classic Duofold Pens, Geo. S.
 Parker gives the world the whole five degrees of points that the
 five degrees of writing require.
 Points you can lend without a tremor, for no style of writing can
 distort them. Points that are tipped with super-smooth Iridium, for
 which we pay a premium of 200%. Points that we guarantee, if
 not misused, for 25 years' WEAR.
 And every point set in a shapely, hand-balanced barrel that feels
 so inspiring you hate to lay it down.
 Any good pen counter will sell you this beauty on 30 days' ap-
 proval. Flashing black or black-tipped lacquer-red, the color that's
 handsomer than gold and makes this a hard pen to mislay.
