that a carefully written student re. ently was dominant in Lincoln.

If a report was desired from an Notre Dame board. to allow time for making such a re-

Meeting several times a week for discussion of material got by reading between meetings, this committee could present a creditable report in a semester. An extensive correspondence with other institutions could be delegated to a subcommittee. Material could be collected early in the semester and the committee got well under way in a short time.

The results of the committee's work would be summarized and submitted at the end of the semester. The University might undertake to publish them, with the similar report of the official faculty committee, so that the two could be considered together for the valuable features of each. The two reports could then be submitted to the Chancellor and the Board of Regents of the University, or to the proper faculty committee, for consideration with respect to the present Arts College. It seems likely that the results of such investigations would lead to the establishment of a definite ideal for the College as well us a set of practical proposals for the attainment of that ideal.

MOUNTAINS OF MOLEHILLS Knute Bockne and the athletic sutherities of the University of Notre

Dame have announced that they will not schedule a game with Nebraska for next year. No explanation is offered. The followers of football, however, will know that something is wrong whe old rivals find it impossible to agree on a suitable date.

We have no quarrel with Mr. Rockne if he does not wish to schedule Editorial Offices—University Hall 10.
