8:05 to 8:30 p. m. Spring vacation. This period will be silent.

Twenty Years Ago

What was to have been a song service at convocation, turned out to be a general jollification meeting. Professors made speeches and students gave yells, making it the most interesting convocation of the year. The gymnasium exhibition was one of the best of the year. The largest crowd of the year gathered in the Armory—every seat was occupied and people were standing. The exhibition was as much of a success financially, as \$100 was cleared, making enough that the gymnastic team could go to Madison, Wisconsin.

Captain Workizer decided upon the medals to be given at competitive drill. Besides the regular medals given to those winning in individual competition, he added a trumpet for the best in the squad. The varsity girls defeated the alumnae at basketball. Miss Pound and Mrs. Clapp gathered in all their proteges from over the state for the contest, but they were unable to conquer the Varsity girls. The score of the game was 21-19.

The Farm Library was moved into new quarters. Miss Compton completed the moving, and the library was established in the new building which was fitted especially for it. Dr. Clapp gathered the track men together in Memorial Hall to get the proper spirit to develop a team. The work was launched by a light work out in the gymnasium and a few stunts on the field. For the first time in the history of amateur entertainment in Lincoln, the performers completed every little detail of their program and

had leisure time before their program.
The University Forest Club held its regular fortnightly meeting. The club consisted of those students who took any courses of Professor Miller's in forestry.

Ten Years Ago

Miss Helen Burnett gave an address on Journalism at the women's vocational conference. She said for a life of excitement, a life to expand every day and have a hand in the writing of the daily history of the world, the newspaper business was the best of all. For a joy of labor it had a great reward, but there was no profession demanding so much training, and giving so little remuneration.

Frank Byerly, a well known photographer and naturalist, gave an illustrated lecture on the beauties of Estes Park. For over an hour he held the attention of the audience

with a set of color slides. The engineering students made plans for an Engineering Week beginning in April. It was to begin with the Engineer's hop on the first night, then there was a convocation, a special edition of The Nebraskan, a smoker, Engineer's night and a banquet. Although a small percentage of the senior class are members of fraternities, almost 50 per cent of the students elected to Phi Beta Kappa are Greek letter people. Five of the fourteen men and eleven of the twenty women students were members of fraternities.

Lifetime

With the midnight oil
It's quicker to bed, if the pen does its work infallibly. The smart pen for the American student is made of green, jade-green radite, an indestructible material of jewel-like beauty and has a nib that is guaranteed for a lifetime. But better dealers will sell you the "Lifetime" principally because it is always a dependable performer—and helps to save the midnight oil.
Price, \$8.75 Student's special, \$7.50 Others lower
