VOL. XXV. NO. 126.

THE UNIVERSITY OF NEBRASKA, LINCOLN, NEBRASKA, FRIDAY, APRIL 16, 1926.

PRICE 5 CENTS.

## HUSKER TRACK TEAM IS READY FOR K.U. MEET

### Schulte's Men Top off Training With Light Workout Thursday

### NUMERAL MEET IS HELD

### Blue Team Captures Honors in Outdoor Competition; Strong Wind Cuts Time Down

Fifteen of Coach Schulte's cinder path athletes will attend the Kansas Relays to be held at Lawrence, Kansas, April 17. The team will leave tonight; some of the men will make the journey in cars and will leave here this afternoon at one o'clock. Most of the men went through a light workout yesterday afternoon; the relay team practiced a few starts and passed the baton. The weather has been very favorable for the Nebraska athletes but if the conditions are not too bad they are expected to give a good account of themselves at Kansas.

The 440 and 880 yard relay teams have a chance to cop first place in these events. With three men, Locke, Hein, and Dailey, still running, the prospects are bright. In the two mile relay Nebraska has four men who have been doing the half in less than two minutes. Kansas Aggies are hoped to win this event but the Cornhuskers will give them a good run.

### Zimmerman Is Ineligible

There will be no entry in the three thousand meter race as Paul Zimmerman, Nebraskas' best bet is not eligible. The discus, javelin, and high jump, have also been thrown into the discard as the material is not of sufficient caliber to make points.

Kuck, Emporia State Teachers College, Kansas, will probably break the record in the 16 pound shot. The present record is 51 feet and Kuck has bettered this mark in practice this spring.

The men making the trip and the events in which they will compete, with the exception of J. Comstock are:

440 and 880 yard Relay—Locke, Hein, Dailey, Davoport.

One Mile Relay—Beerle, Wyatt, Dailey, Davoport.

Two Mile Relay—Lewis, Ross, Roberts, Johnson.

Four Mile Relay—Ross, Searle, Roberts, Johnson.

5000—Kreimelmeier.

1000—Wirsig.

120 yard Hurdles—Weir.

100 yard Dash—Locke.

### Blues Win Numeral Meet

In the second numeral meet between the Red, White, and Blue teams, the Blues, captained by D. Donisthorpe, captured first place yesterday with a total of 68 2-3 points.

(Continued To Page Four)

## A.A.U.W. SPONSORS SENIOR GIRL'S TEA

### Topics Pertaining to Student Life and Organizations Will Be Read and Discussed

A tea will be given Saturday afternoon at 2:30 sponsored by the American Association of university women, to which all the senior girls are invited to attend. The subject to be discussed will be "Undergraduate Life." There will be a number of speakers, prominent to the students at the University, discussing the subject.

The program will be presided over by Miss Genevieve Clark, who will introduce the speakers. Those on the program will be, Ellenor Flaternersch, representing the Women's Athletic Association; Dorothy Carr, of the Big Sister Board; Cyrena Smith, representing the Y. W. C. A.; Frances McChesney, of the Associated Women Students; and Ellsworth DuTeau, who will speak on the men's organizations.

A paper, prepared by Douglas Orr, will be given on the "Trends of the Undergraduate Thought," and Katherine McWhinnie will speak on the social and selective organizations. The program will be concluded with a speech by Dr. Reinhart of the A. A. U. W.

Miss Nellie Compton and Miss Marguerite McPhee are to be the hostesses of the tea and will be assisted by Miss Louise Pound, Miss Laura Piper, Miss Alice Howell, Miss Clara Craig, Miss Emma Anderson, Miss Mabel Lee, Miss Elda Walker, and Miss Elizabeth Reese.

In the dining room there will be Miss Gettrude Moore, Miss Edna Hewitt, Miss Mary Keech, Miss Dorothy Pettis, Miss Margaret Hochdoerfer, Miss Zora Schupp, Miss Clara Wilson, and Miss Constance Syford.

## \$40,000 Morrill Gift To Be Used For Additional Museum Exhibits

### Definite Purchases Have Not Been Made But It Is Thought That a Varied Field of Exhibits Will Be Added to Museum

The \$40,000 gift to the University by C. H. Morrill of Stromsburg will be expended for new museum exhibits to be added to those already in the possession of the University, according to Mr. Collins of the University Museum.

Nothing definite has been decided as to the particular nature of the exhibits but it is probable that the exhibits will extend over a larger and more varied field than those previously acquired through former gifts by Mr. Morrill. Specimens purchased here-to-fore have been fossils but in the new building Mr. Morrill is desirous of having an extended variety and if opportunity warrants the purchase of an expensive piece out of this class it is Mr. Morrill's wish that

such purchase be made.

Present Collection Not Sufficient  
Mr. Morrill stated that he felt that the present collection was not sufficient to fill the space of the new building and that he wished to see it in the nearest possible state of perfection while he was able to enjoy it.

A plaque will be placed near the entrance of the new building upon which will be the dedicatory note; both Mr. Morrill and Dr. Barbour's names will appear here.

Purchases will not be made at once but it is the aim of the committee in charge to have as much of the new material as possible at the completion of Morrill Hall.

## CHILD'S PLAY IS SATURDAY

### "Little Princess," Three-Act Performance, Will Be Given In Temple

### FERN HUBBARD DIRECTOR

The Children's Theater will present "The Little Princess," a three act play by Frances Burgess, in the Temple theater Saturday afternoon and evening, April 17th. The play is under the direction of Miss Fern Hubbard, an instructor in the Dramatic department.

The title character of the play is Sara Crewe, known as the "little princess." Her father is a wealthy captain in India. Sara has been placed in a Miss Minchin's Seminary. The play opens on her thirteenth birthday and Miss Minchin's giving a party in her honor. She has purchased many luxuriant gifts for the child in the hope that she will be fully repaid.

During the party a lawyer informs Miss Minchin that Captain Crewe is dead and Sara is left penniless. In order to save the name of the school, the "little princess" is allowed to remain at the scullery maid.

The next act is laid in the garret of the seminary. One of the incidents of the act is a dinner which Sara and a friend, who has brought the food, have planned. Just as they sit down to eat Miss Minchin visits the garret and Sara is sent to bed.

Next door to the seminary lives a Mr. Carrisford, who has just returned from India where he had formed the friendship of Captain Crewe. The remainder of the play centers upon the search made by Mr. Carrisford to locate the daughter of his friend.

Tickets will be sold at the door. Admission is twenty-five cents.

## Students Draw Up Education Report

CAMBRIDGE, Mass.—(By New Student News Service)—Following the lead of Dartmouth, Bowdoin and other colleges the undergraduates of Harvard University have through their student councils drawn up a report on education. The report calls the University too large and recommends that it be broken up into at least six smaller colleges, preferably of about 300 students each, and that the students of each be housed in dormitories by themselves.

## Prof. Rice Announces Awards To Be Given For Best Poems and Essays

### Class of 1898 Offers Fifty Dollars For Best Poem; and Vestsals the Second Prize; Essay Winner Will Also Receive Money

Prof. J. A. Rice of the department of Ancient Languages, announced on Wednesday that prizes given in the last two years for the best poems and essays, will again be offered to the students of the University of Nebraska.

The prizes offered to the students will be given for the best poems of the students written on any subject. The essays to be submitted in the contest must be, however, of a non-technical nature.

There will be two prizes offered for the best poems, a first and second. The first prize of fifty dollars will be offered by the class of 1898, the second prize of twenty-five dollars will be given by the Vestsals. In the previous years the second prize was offered anonymously. However, this year the amount will be given by the Vestsals.

### Class 1891 Offers Prize

In the contest for the best essay

## 1,000 ATTEND FEEDERS' DAY

### Fourteenth Annual Holding of Ag College Event Said Successful

### IOWA STATE DEAN TALKS

Nearly a thousand livestock men attended the fourteenth annual Feeders' Day at the College of Agriculture Thursday. This was a larger crowd than has ever attended a meeting of this kind at Lincoln and the crowd included many well-known men in the livestock industry of the middle west.

Professor H. J. Gramlich gave a review of the experimental work that has been carried on at the college during the past year. "The calves," said Professor Gramlich, "gained a trifle more on about 27 bushels of corn than the other cattle did on more than 40 bushels." "The gains of the younger stock were found to be cheaper." At the present time there is very little discrimination in the markets against the small heifers as compared to steers of a similar size. "The experiments have proved that the light heifers will actually outsell the steers," stated Professor Gramlich.

### Dean Curtis Is Talker

Dean C. F. Curtis of the Iowa State Agricultural College was present at the meeting and was called upon by Professor Gramlich for a short talk. Dean Curtis stated that the most serious problem of the farmer was what the consuming public wants and what it will pay. He also stated that he was favorably impressed with the experimental work that has been carried on by the Nebraska experiment station. He mentioned the inconsistency of public demand as being a big problem that farmers must always contend with. "The more we can improve the quality of a product without greatly increasing the production cost, the greater the demand will be for that product," he said.

"We are a meat-consuming nation and will continue to be such as the meat-consuming nations are the dominant nations of the world."

Mr. F. C. Stryker, Omaha, secretary of the South Omaha livestock exchange, spoke regarding livestock markets and told the reason for having the markets. "Livestock markets do not just happen," said Mr. Stryker. "They provide a place where livestock may be honestly bought and

## WEATHER FORECAST

Friday: Fair and warmer.

Weather Conditions.  
Clear cold weather continues in the middle Mississippi and lower Missouri valleys and the Southwest with freezing temperatures south to Oklahoma and frosts to central Texas. It is followed by falling pressure and much warmer weather in the Dakotas, Montana and western Canada. Light rain has fallen in the Gulf states and the northeastern states. Elsewhere the weather is fair.

THOMAS A. BLAIR, Meteorologist.

the prize will be given by the class of 1891, a prize of fifty dollars.

The idea of offering prizes to stimulate the writing of better essays was made real last year when a prize of fifty dollars was won by Ruth Moore.

The prizes for the best poems of (Continued To Page Three)

## DR. REINHARDT WILL SPEAK AT CONVOCATION

### "Candidates for Oblivion" Is Subject of Talk For This Morning

### HEAD OF MILLS COLLEGE

### Aurelia Reinhardt Is Prominent Educator and Author; Was Brought Here By A. A. U. W.

Dr. Aurelia Henry Reinhardt, president of Mills College, Oakland, California, will speak on "Candidates for Oblivion" at a convocation in the Temple Theater at 11 o'clock this morning. Dr. Reinhardt has been brought here for this address by members of the American Association of University Women in the University—she is president of the national organization.

Dr. Reinhardt graduated from the University of California in 1898, and received her doctor's degree in 1905 from Yale, and 1919 her LL. D. from California. Dr. Reinhardt is a prominent educator, and has been president of Mills College for two years, has taught English at the University of Idaho, was a scholar and fellow in English at the graduate school of Yale where "De Monarchia" or Dante Alibiers, now a college text-book was edited and translated by Dr. Reinhardt, and she has also had a fellowship at Oxford University where she edited and published "Epeoeene" or the "Silent Women" by Ben Jonson.

### Women's Position Changed

Dr. Reinhardt has said regarding the changed educational position of young women of today who are entering college: "As long as individualist ideals in our country and pioneer conditions held the American woman to the preoccupation of home she could acquire at home most of the training she could use in her domestic life. Women's schools were concerned with adding to this knowledge of art, physical grace and charm."

"But society is never static. Home and church, society and government, have altered with an altering civilization. Woman's occupations have altered and her education has more or less consciously adjusted itself. The war has clarified many things and among them the truth that the duty and privilege of the American woman in her home is enlarged to duty and privilege in her community and country."

## ENGINEERS EXPECT 7,000 HERE MAY 6

### Committee Making Special Preparations To Advertise Annual Engineers' Week at Nebraska

Special effort is being made in the preparations for Engineers' Week this year to attract people from out over the State, to the University for the event.

On the evening of May 6, the engineers will open all the buildings and laboratories for inspection by the public. It is expected that 7,000 people will make the trip through this section of the campus. Over 6,000 attended last year.

Engineers' Night will doubtlessly draw many people from cities close to Lincoln. Articles will be published in all the Lincoln and Omaha papers as well as papers in the smaller towns close to this city, in an effort to show the people of this state just what the Engineering College is and what the students studying engineering are doing.

All the departments will have displays and machinery in operation; guides will be provided for explaining the different operations and apparatus on exhibit. Programs for the evening will also be distributed. These things are being done in order that the people living in Lincoln and throughout the state may become more familiar with the Engineering College of this University.

## ELLISON ELECTED HEAD OF Y.M.C.A.

### Olson and Hunt Are Other Officers of Organization; Larson Will Go To Summer Meeting

The election of the Y. M. C. A. officers for the following year were held yesterday, resulting in J. M. Ellison being elected president; Carl Olson, vice-president; and Joe Hunt; secretary. Eldred Larson was selected to represent the "Y" at the inter-collegiate meet this summer.

Ellison, the new president, has been on the "Y" cabinet for the past two years. Olson and Hunt are both members of the Freshman Council, Hunt being the chairman this year. Larson the intercollegiate representative, was chairman of that council last year.

## "Alumnus" Gives Detailed Plans of Nebraska's Fifth Annual Round-Up

### Starts On Ivy Day With Crowning Of May Queen, Tapping of Innocents And Mortar Boards, Ivy Day Oratorical, and Interfraternity Sing

The Nebraska Alumnus, issued on Thursday, gives plans of the fifth annual Round-up, which will be staged on the University campus May 27, 28, and 29. After referring to the traditions behind this big celebration, the article goes on to give a few of the plans for the 1926 affair. The Round-up of 1926 will start on Thursday, Ivy Day, when the traditional planting of Ivy, the crowning of the May Queen, the tapping of the Innocents and Mortarboards, the interfraternity sing, inaugurated two years ago, and the speech of the Ivy Day orator, Alexander McKie, senior law, will hold the attention of students and alumni.

### University Party Friday

Friday will be a full day, starting with the finals of the interfraternity

baseball tournament in the morning, and culminating in the big all-University party at night. Sandwiched in between these events will be the alumni council meeting in the morning, and the annual "compet" of the R. O. T. C. in the afternoon.

The big event on Saturday is the class and general reunion, the classes of 1879, 1880, 1881, 1882, 1898, 1899, 1900, 1901, 1917, 1918, 1919, and 1920 holding special reunions. The Saturday luncheon will be followed by a short business meeting, at which the new officers of the Alumni Association will be announced. The ballots will be sent out soon, and will be returned by mail by May 25.

In the afternoon the Round-up committee will entertain the alumni who return, and the members of the class of 1926. The three-day affair will reach a grand climax in the presentation of the comedy "Aren't We All" by the University Players Saturday night.

## TENNIS MEET TO END TODAY

### Survivors of the Competition Will Make Up Husker Net Team

### PLAY WESLEYAN ON 17TH

First-round play in the University elimination tennis tournament was completed yesterday. The pairings for the second round will be posted today and all matches will be played off this afternoon.

A tennis meet will be held with Nebraska Wesleyan Saturday, April 17. The Nebraska team will be made up of eight men, who will be selected from the winners of the second-round play today.

First-round play in the freshman tournament will start Wednesday. Freshmen must sign up in the athletic office before Tuesday.

### First Round Results

MacLeod defeated Phillips, 6-4, 6-0.  
Hattori defeated Kuns, 6-4, 3-6, 7-5.  
Straka forfeited to Watkins.  
Sunderland defeated Meyers, 6-1, 2-6, 6-3.  
Hunt defeated Franco, 6-4, 6-0.  
Smith defeated Adeva, 6-4, 6-0.  
Hayes defeated Mnaske, 6-2, 6-0.

## NOVELLO TRIO IN MUSICAL PROGRAM

### University Organization Presents Concert at Thursday Morning Convocation

The Novello Trio, consisting of Frances Morley, pianist; Grace Morley, violinist; and Miriam Little, cellist, gave a concert Thursday morning at convocation at the Temple theater. The program will be repeated Sunday afternoon at 4 o'clock at the University Art Gallery.

The following numbers were presented:

Saints Saens. Trio in A Major, Op. 18  
Allegro vivace  
Andante  
Scherzo  
Allegro  
Wagner-Wilhelmj ..... Romance  
Mendelssohn ..... Scherzo from Trio In D Minor Op. 49  
Parker ..... Suite Op. 35  
Prelude  
Finale

## Need of New University Library Pointed Out by Gilbert H. Doane

### Reading Rooms, Study Corners, and Lounges Would Be Feature of New Building; Should Accommodate One-Tenth of Student Body

"Our great need is a new library building," declares Gilbert H. Doane, University librarian, and as proof of this he points to the five-hundred book shelves, holding more than two thousand volumes, which are now in storage, and the fact that reading rooms at the library hold only three-hundred students when it should hold at least a tenth of the entire student body, which is seven hundred.

"We will receive five hundred books from Italy in a short time," he stated, "and we will not be able to open the collection because we will have no place to put them. We cannot get at any of the books we have in storage, least of all, think of buying new ones, because we have no room for them."

"We have a well rounded library on the whole, but there are some very large gaps in the lists which should be filled immediately. It is a pretty good working library, but

## CROWDS ATTEND PHARMACISTS' ANNUAL SHOW

### Pharmacy Building Is Thrown Open for Inspection Last Night

### STUDENTS HAVE DISPLAYS

### Explain Working of Drugs; Conduct Physiology Experiments and Make Cosmetics

Hundreds of people took advantage of the annual open house of the College of Pharmacy last night. The display was opened to the public at 7:30 and by 8 o'clock the building was crowded with spectators.

On entering the building each person was presented with a souvenir sample of Cornhusker shampoo, manufactured by the students of the college. The visitor was next directed to the basement where experiments were conducted dealing in physiology. One of the experiments was conducted with a lung-testing machine and each person desiring was given the opportunity to test his lung capacity. Students explained the action of different drugs on lung action.

### Heart Action Was Shown

Connected with this were several experiments showing the action of the heart and the effects of stimulants on its action. Frogs were used in most of these experiments. The action of an electric current on muscle action was brought out by another exhibit.

The visitor was next shown the methods of preparing different face powders and creams. This exhibit was very popular, especially with the feminine portion of the crowd.

The third floor came next in the tour of the building. Here was stationed the college orchestra which was a center of attraction. Nearby were exhibits of a great number of raw drugs and the place where they are grown. Another exhibit showed the hair of different animals under the microscope. The methods of home nursing were brought out by a series of exhibits.

### Illustrated Lecture Given

In another room an illustrated lecture was given by a student dealing with the college and its aims.

The main floor contained the analytical laboratory. By experiments the students brought out how it is possible to detect adulteration of foods and drugs. The students showed how it was possible to tell the difference between butter and oleomargarine. In another experiment the caffeine from coffee was extracted and shown to the visitors. In another laboratory various medicines were prepared.

## NORTHERN LIGHTS CAUSE COMMOTION

### Wednesday Night Display Unusually Brilliant; Results of Action By Sun Particles

"The aurora borealis of the northern lights are not unusual while they may be said to be infrequent in this territory," said Thomas A. Blair, weather observer for Lincoln. "They are frequently seen farther north and are common in northern Minnesota and along the Canadian line." The most remarkable feature of the display seen Wednesday night was its great brilliancy.

From about 8:30 p. m. until 10:40 p. m., this bright light resembling a great band of white smoke extending from the northwest to a little south of the east remained in view and caused much commotion.

This streak of light across the sky is caused by the electrified particles which are thrown off by the sun. These particles are attracted by the earth and are discharged, upon reaching the earth's atmosphere more than one hundred miles above the earth. They excite the upper air, and cause it to glow, and to reflect brightly the light of the northern lights.

The phenomenon occurs about once a year and is generally followed by special activities of the sun, particularly when there are a great number of sun spots on the surface of the sun. This display is witnessed more often in the north because the source of the reflection is centered at the magnetic pole rather than at the geographical pole. This year it was seen all over Nebraska and as far as reported in both Wyoming and Iowa.

The display in Lincoln while described as very beautiful (being a great white band stretching from one side of the horizon to the other lighted up every few seconds by flashes of colored light,) caused considerable apprehension in the minds of some people. Newspaper officers received many telephone calls asking what the phenomenon might be. Because of its resemblance to a shaft of light it was thought by many to be a giant search light.

(Continued To Page Two.)
