

CYCLONE TEAM ON WAY HOME

Large Crowds Expected to Greet Victors Over California Bruins

Ames, Iowa, Nov. 30.—Special: The largest crowd that has ever welcomed a Cyclone team back to Iowa State is expected to be on hand Thursday morning when the victorious Cardinal and Gold team, fresh from its first intersectional battle, returns to Ames from Los Angeles. The Iowa State walkway victory over the California team is one of the few instances in grid history when a team from the East or Midwest has defeated a Pacific coast team on its own battle grounds.

That the Cyclones scored 22 first downs to the Bruins' seven in the 20-to-0 victory gives some idea of Iowa State's strength Saturday. In the third quarter the Cyclones toted the ball for eight first downs while the Californians made only one.

The first touchdown for Iowa State was the result of an uninterrupted 81-yard march for the Bruin goal in the second quarter, Miller lugging the ball the last two yards. The last touchdown came after Weiss Cyclone quarterback intercepted one of Fleming's long passes.

30,000 Watch Game
Although three days of continuous rains marred the day and the field, 30,000 coast fans braved the weather to watch the Cyclones from Iowa perform. Among the Iowa State alumni who watched the game were Shawhan, Paige, Stewart and Higgins. Cyclone athletes of years past, "Flaming Joe" Fleming, great coast halfback, and his running mate, La-Bucherie, failing to gain either through the Iowa State line or around the ends.

The success of the Cardinal and Gold in their first intersectional clash has renewed the rumor that Iowa State will perform in the East next year, possibly against Colgate.

SHORT POULTRY COURSE OFFERED

Instruction Will be Given at College of Agriculture; Emphasis to be on Feeding Problem

A poultry short course will be offered at the College of Agriculture January 11 to 14. A registration fee of one dollar per person will be the only charge.

This year special emphasis will be placed on the feeding problem. How more eggs may be gathered and more pounds of poultry may be sold for each dollar's worth of feed, will be one of the main topics of discussion. Other subjects of interest will be newer knowledge on culling and breeding, hatching and brooding, keeping the poultry flock in health, and the marketing of poultry products.

The instruction will be given by lectures, demonstrations and a study of houses, birds and equipment in use at the College of Agriculture Poultry Plant.

A five reel motion picture showing the different phases of poultry production on the Pacific coast will be given in the student activities building Wednesday evening, January 12. This picture will give people residing in Lincoln and in Lancaster county a chance to get some worth while instruction in one night.

Class Hears Lecture By State Secretary

Dwight F. Dalbey, Secretary of the State Department of Finance, will lecture to the class in public finance this morning on the work of his department. Special attention will be given to the work of preparing the Governor's budget for presentation to the legislature.

Our Guns Would Shoot Around Moon, Affirms Dr. Fred E. Wright

Washington, Nov. 30. (By Science Service)—If men from the earth were ever able to reach the moon, by the methods of Jules Verne or H. G. Wells, they could engage in warfare in a way unprecedented on the earth, for the ordinary 75-millimeter field gun would shoot three times as far there as did the German long range gun that bombarded Paris during the war. Though the range of the 75 is about 13,000 yards on the earth, on the moon this would be about 250 miles, Dr. Fred E. Wright, petrologist of the Geophysical Laboratory of the Carnegie Institution of Washington, said in a recent lecture at the Institution.

With the long range gun that bombarded Paris from a point about seventy miles away, and had a muzzle velocity of about a mile a second, the lunar gunner could fire nearly halfway around the moon, nearly 3400 miles. If the gun were pointed directly upward, its shell would reach a height of a thousand miles above the lunar surface.

Dr. Wright has made these studies of the diminished force of gravity and lack of an atmosphere on the moon's surface in connection with the work of a Carnegie Institution committee of astronomers, mathematicians, and geologists who are collabor-

ating in an effort to learn more about the earth's satellite.

Conditions Vastly Different
"The geologist, accustomed as he is to working with conditions as they exist on the earth's surface, finds himself in a different kind of a world when he studies the moon," said Dr. Wright. "The force of gravity to which he is accustomed, being so much less, many phenomena would be different. For example, volcanoes on the earth throw rocks only a short distance, so that they often fall back into the crater from which they came. But moon volcanoes would throw such material much farther. The result would be that the inside floor of the volcanic craters would be lower than the outer surface, just opposite of the earthly volcanic conditions. Also the craters would be much larger than any on the earth. Telescopic observation shows that both of these conditions actually occur. Another point of marked difference is the lack of erosion forms on the moon. While so many of the earthly surface features are the result of weathering by wind and water, the moon is without atmosphere and moisture and these forms are absent."

Dr. Wright has also been investigating the force of gravity of the earth and is developing a new form of apparatus for measuring its density.

CYCLONE RINGMEN CONTINUE PRACTICE

Negotiations for Bouts Under Way With Several Schools; Veteran Men in Most Divisions

Ames, Iowa, Nov. 30.—Special: With veteran boxers in every division except the bantamweight and heavyweight classes, ring prospects at Iowa State seem on the upgrade. Thirty Cyclone leather-pushers are working out daily under the tutelage of Captain George Kendall of Boone, veteran middleweight, who will have charge of the Cyclone ringmen until the football team returns from the California pilgrimage. As was the case last year the

heavyweight class will be Iowa State's biggest worry this winter, as there is a dearth of big men in camp. Casey, Ole Anderson or Holloway Smith will have a chance at the job. All three men are members of the football team and weigh 190 pounds or better.

No Bouts Booked Yet
Although no bouts will be definitely booked until the meeting of the Athletic Council in another week, the athletic department has been dicker-ing with several schools. Negotiations are under way for a bout with the Navy at Annapolis, two meets with Notre Dame, one at South Bend and the other at Ames, two meets with the Kansas Aggies, one at Ames and the other at Manhattan, one meet with Minnesota and one with Creighton, although nothing definite will be decided for another week. The Ath-

letics and the Wildcats have been old ring foes of the Cyclones for several years, while Minnesota, the Navy and Creighton have never met Iowa State in the ring.

Freshmen Neglect Rifle Range Work

Capt. Louis W. Eggers, in charge of the rifle range in the basement of Mechanical Engineering Building, reports that freshman R. O. T. C. students are too slow in doing their required rifle shooting. Each freshman must shoot in the standing, kneeling and prone positions for his grade in marksmanship.

Failure of a freshman to do his required rifle range work will result in his being incomplete in his military science course. The marksmanship grade of each freshman is based equally on his grade on the range and on his theoretical knowledge of the rifle and its use.

The Wisconsin indoor relay races, established in 1906, are the oldest in the world.

Benefit Show Will Aid Near East Relief Fund

A midnight benefit performance of "Bardleys the Magnificent" starring John Gilbert will be given Friday, December 3 at the Lincoln Theater at 11 o'clock to help the Near East Relief.

Late permission may be obtained from house mothers and landladies, and university students are urged to attend.

Romance, adventure, and thrills feature in the movie taken from the novel by Rafael Sabatini. As an additional attraction, Helene Scholder will play the cello.

Offer Course in Girl Scouting at Oklahoma

Norman, Okla., Nov. 30.—Special: A two-weeks course in girl scouting for the purpose of preparing girls for work as camp councilors and leaders of girls' summer camps is to be given at the University of Oklahoma by Pauline Wherry, Dallas, Tex.,

regional director of the Girl Scouts, beginning Monday, November 29. Practical camp work, camping, and cooking will be taught at a number of hikes and camps which will be held during the period.

Roberts to Address Engineers' Societies

Dr. E. B. Roberts representing the Westinghouse Electric and Manufacturing Company will be here Wednesday and Thursday to talk with any seniors of the College of Engineering who may wish to go with his company. His headquarters during his visit will be in the Electrical Engineering Building. Dr. Roberts will address the combined meeting of the A. I. E. E. and the A. S. C. E. on Wednesday evening in the Mechanical Engineering building.

College Graduates Tour Country

Eight Harvard and Yale undergraduates and graduates have completed their fourth season in their automobile-theater which tours New England each summer. Three Ford cars and two nondescript runabouts carrying the stage gear and the cast of jitney players from Maine to Connecticut.
