### Finance Office Integral Part Of University

(Continued from Page One.)  
the state government at the capitol are carried on through this office. It also has charge of all financial relationships with the federal government.  
The finance secretary also supervises the expenditures for student activities. He is responsible for auditing all tickets taken in at all athletic events. As soon as a game is over, the tickets are brought to the office, counted, checked, and filed away in steel boxes in case of arguments where the visiting team has a percentage split of the gate receipts. Control of the ticket taking is vested in the finance secretary. This function furnishes a protecting check, both to students and to the University.  
**Office Very Efficient**  
The office is a strictly financial office. And it is probably the most efficient in the state. It is checked every six months by certified public accountants. This is the only state department which has a certified check of its books and records made every six months. This check is an all-around protection. It protects the office from errors and criticism, protects the University, the state, and as a result, the people. It is all part of the basic aim of the University to serve the people of the state. Efficiency in performing its duties, which are necessary for the carrying on of the work of the University, and careful checking of the work done, are the contributions of the finance secretary's office to the University ideal of service.

### Ag Professor Declares Germs To Be Helpful

Not only are the great majority of bacteria harmless, but many kinds are extremely helpful to man, declared Prof. P. A. Downs of the department of dairy husbandry in an address on "Helpful and Harmless Bacteria" which was broadcast over KFAB from the University radio yesterday.  
"The great mass of bacteria are continually passing down the complex animals and plants that have been built up from the air, water, and soil," Professor Downs said. "If it were not for these bacteria the worn out animal bodies and the dead plant forms would remain on the surface in the way of progress. As it is, the bacteria and other small life tear it down, making it available for plant life again. The plant grows, the animal eats the plant, and eventually dies and returns to the soil. Thus the cycle is continuous through the aid of the invisible bacteria."  
Professor Downs also spoke of the use of bacteria in industry, especially in the manufacture of dairy products. He explained that the characteristic flavors of butter and the various kinds of cheese are due to the bacteria in them.

### MUSEUM SECURES NEW SPECIMENS

Rose Quartz from Black Hills and Osprey Killed Near Lincoln Are New Displays  
A large specimen of rose quartz from the Black Hills was received by the Museum Monday. This specimen is a large block about two feet by one and one-half by one. Rose quartz is gem material found only in the region of the Black Hills. Much of it is sent to China where it is cut into beads, statuettes and various ornaments. It is carved in a way similar to the carving of jade.  
A very fine osprey, a bird which preys on fish, was killed on the farm of Carl Adair northwest of Lincoln and was also brought to the Museum recently. It was mounted and was put on display Tuesday morning. With the other osprey which the Museum already had, the specimen makes an interesting display.

### FRESHMEN WOMEN ASKED TO MEETING

All Those Interested in Y. W. C. A. Work Invited to Freshmen Commission Thursday  
All Freshmen women interested in Y. W. C. A. are invited to attend the first Freshmen Commission meeting of the year Thursday evening December 2, in Ellen Smith Hall. Any university woman who attends the first meeting will automatically become a member of this Freshmen organization.  
Freshmen Commission has been a branch of the Y. W. C. A. program for eight years. It trains women for work in the organization and enables them to hold executive positions in it. It will meet every Thursday evening throughout the school year. Discussions on campus problems, religious themes, and matters of present day interest will be led by the President Elizabeth Tracy.

**Yale Gets \$1,000,000 Gift**  
One million dollars has been given to Yale University by two anonymous donors for the erection of the art museum. The new building will stand opposite the present art school on High Street. It will be of stone, in a modified Italian gothic style, harmonizing with the other Yale buildings in the vicinity.  
Blue cords, ranger hats, and blue blazers trimmed with white will distinguish the seniors from other students at Brigham Young University.

### DINNER HELD FOR FRESHMEN WOMEN

**Big Sister Organization To Be Host of First Year Women At Armory Today**  
The Big Sister Board will entertain freshmen women and especially Little Sisters at dinner from 6 to 8 o'clock in the Armory on Thursday evening. Dinner will be served at 6 o'clock after which a program will be presented and games will be played.  
Kate Goldstein will give a group of musical numbers, Vivian Vickery will entertain with a dance and a stunt, "Noah, Jonah and Captain John Smith," will be presented by Lona Conger, Winifred McClure, Betty Burham and Eleanor Shook. Helen Clark will direct the games. An orchestra has been engaged to play during the dinner.

### AG ENGINEERS WILL MEET ON THURSDAY

**Illustrated Lecture on "Soil Conservation" Will be Given by Students Under I. D. Wood**  
The Nebraska Student branch of the American Society of Agricultural Engineers is holding a special meeting on Thursday evening at the Agricultural Engineering Building on the Agricultural College campus.  
The meeting is in the form of an illustrated lecture on "Soil Conservation." The lecture will be put on by the students under the personal supervision of Mr. I. D. Wood, Extension Agricultural Engineer, of the University of Nebraska.  
Following is the program for the evening:  
Importance and Soil Conditions—Donald Walker.  
Control of Small Ditches by Brush Dams—Wayne Kinsey.  
Soil Saving Dams—Richard Covell.  
Terracing—Francis Young.  
Coeds at the Adventist College of Walla Walla, Washington, are required to wear their dresses within 12 inches of the floor. Three women who resented and refused to obey this edict were sent home.

### Nebraska University Shows Small Increase of Students During Year

Approximately twelve thousand students were registered in the University of Nebraska from June, 1925, to June, 1926. A comparison for the present year with the past indicates a slight increase of 119 students in spite of the unfortunate financial conditions in the state.  
The statistics of registration in all colleges and schools of the University are made up on June first. Inasmuch as a student may change his registration from one college to another, the sum of registrations is in excess of the actual number of registrants. By deducting the repeated names, the total number of students is obtained. These include all, collegiate, secondary, in residence, and in absentia.  
The grand total from June, 1925, to June, 1926, on the above basis amounted to 11,714. We have no way of telling what the number for the current year will be. It is, however, possible to make a comparison of the present with the previous year on the basis of actual registrations on November 15.  
The collegiate enrollment on November 15, 1925, was 6105. The collegiate enrollment on the same date of 1926 was 6124. The total enrollment on November 15, 1925, was 8283. For the corresponding date in the present year the enrollment was 8582.  
**Increase Due to Extension**  
The total increase is due largely to extension. The increased registration in Extension has been due to the natural growth of this work and especially to the fact that economic conditions in the agricultural west have made it more difficult for students to attend the University. Hence they have sought to continue their studies through Extension. Many of these students will be in residence at the University when times are more prosperous.  
In spite of regional crop shortage and unsatisfactory prices, there is a slight increase of students in residence. The increase would have been larger except for the policy of eliminating the less desirable as inaugurated by the several faculties. Probably about 200 of those eliminated last year for failure to maintain a satisfactory scholarship record would have been back this fall if the older, less exacting standards had been followed.  
The colleges and schools showing an increase of registration are Agriculture, the Graduate College, Teachers College, School of Fine Arts, School of Journalism, and School of Nursing. Most of the decreases are caused by a change of standards for admission, or for remaining in the college.  
A slight draft from the general to the specific courses, from those termed "cultural" to those termed "practical", is seen. Students coming to the University at a financial sacrifice are naturally more impressed with the need of remunerative employment after graduation. The inclination of students to take courses to fit them for "living", rather than to fit them for "making a living", is stronger in times of general prosperity.  
to confer with students regarding the progress they are making.  
Just before the close of the semester, the advisers will again hold office hours to meet these students who wish advice in the choosing of subjects for the following semester. These preliminary conferences are expected to simplify the enrollment work at the opening of the new semester.  
The Maryland department of the American Legion has gone on record favoring the printing of a reproduction of the American flag on the fly leaf of all text books used in the schools of the state.

### K. U. Adopts Advisory System For Freshmen

Lawrence, Kansas, Nov. 30.—A new freshman advisory system, designed to give first year students in the college of liberal arts of the University of Kansas opportunity to obtain further contact with the faculty has just been announced by Paul B. Lawson, assistant dean of the college.  
All freshmen students have been assigned to one of eight men and seven women members of the faculty. These advisers will hold special office hours for the next two weeks

### NEBRASKA, YALE AND HARVARD ARE COMPARED

(Continued from Page One.)  
tion drama. He also called attention to the splendid libraries of these organizations and their interest in collecting good libraries.  
"The loyalty here," he added, "seems primarily to the fraternity and not even secondarily to the University. This is another great difference between Yale and Nebraska." Dr. Harwood closed by pointing out the fact that both Yale and Harvard had campuses, without unity of architecture, cramped into small areas.

### Methodist Students Plan Christmas Party

The annual Christmas party given to all Methodist students will be held Friday night, December 3, in Ellen Smith Hall. Each Methodist student coming to the party has been asked to bring some ten cent toy to put on the Christmas tree, provided for the distribution of gifts.  
Christmas games and a special skit, presented by eight men students, will be among the entertainments of the evening. Refreshments in keeping with the holiday atmosphere will be served.  
More than 300 girls ride to classes on bicycles at Smith College.
