#### BREAKING THE MIRROR

The Western Association of College Comics, in convention at the University of Washington, voted unanimously to break all relations with "College Humor" at the expiration of their present contracts. Misrepresentation of college life was the reason for the

"Our reason for breaking the contract," said Albert Salisbury, president of the association, "is that we feel that College Humor is painting a picture of flaming youth which is not real, and which gives to the average reader a false idea or college life.

"The magazine takes all the gin and sex jokes and plays them as representative college humor, with no mention of any other type. College magazines bury the gin and sex jokes, with a greater proportion of clean humor just as representative of college life."

Such a step to curtail the misrepresentation of university life is a worthy one. Students throughout the country are beginning to realize that such distorted and unfavorable publicity is a menace to the welfare of higher education. It is hoped that other associations will take action to minimize such publicity.

We believe, however, that the Western Association of College Comics failed to strike at the root of the evil. It is true that College Humor distorts the idea of college life by selecting the gin and sex jokes from the various magazines. But, after all, the jokes were actually published by the colleges which were given credit when they were reprinted in "College Humor." By forbidding "College Humor" to reprint such jokes a certain measure of benefit will be derived from the fact that fewer persons not acquainted with actual campus life will have an opportunity of reading such material.

College magazines, however, usually have a circulation which extends considerably past the campus. Those who read these magazines will see the same jokes that would have appeared in "College Humor" although the percentage of "shady" jokes will probably not be as great. We include the word "probably" because we have seen college magazines which were so full of such material that we would have been ashamed to have the magazine placed in our home. We are glad to mention here that our own university magazine, the "Awgwan", is not of this type.

So the action taken by the western schools does not eliminate misrepresentation. It only reduces it, When one is displeased with his reflection in the mirror he does not break the glass. He knows that he alone is to blame. And if the editors of college magazines do not wish their gin and sex jokes to be reprinted and quoted they can easily eliminate the trouble by keeping such material from their own magazines.

Oh, yes, did you ever meet the girl who has cauliflower lips?-Purdue Exponent.

#### OUR TRACK SQUAD

Twenty-six men make up the track squad that will leave Lincoln today to represent the University at the Kansas Relays this week-end. These are the same men who made such a creditable showing against Oklahoma and Missouri last week.

Last fall it was predicted that Nebraska would not have much to offer on the track this spring. The fall practice sessions, with inexperienced men turning out, were not entirely satisfactory. Coach Schulte had a small nucleus of veterans around which to shape a

Through the fall and winter Schulte worked hard with the aspirants. Some good distances and times were turned in at the practices and tri-color meets. But the material was still somewhat green.

With the coming of track competition, it is seen that Nebraska is not so far behind the other schools. The defeat handed the Zuskers at Oklahoma was by a narrow margin, a single event deciding the meet. And the Sooners are given credit for having a good track aggregation. Nebraska walked off with the dual meet at Missouri. And the Tigers and Huskers are supposed to be strong in the same events.

Judging from the work already done by the Cornhuskers, it is probable that Nebraska will again finish near the top in the annual Missouri Valley out-door

To Coach Schulte should go a lot of credit for the work he has done in turning out a good team from the inexperienced material with which he had to work. To the men individually should go a lot of credit for the way in which they have worked to be able to make a good showing.

#### The Cynic Says:

The ideals of men at twenty years of age are much higher than those at forty, was the statement made yesterday in a sociology class. Of course few men are married at twenty.

IN QUEST OF KAPPINESS

Few men, if any, can boast of having attained at one time or another in life a state of perfect felicity. Mrny recall evanescent moments of bliss following the attainment of an end, transient joy inspired by beauty, or even a form of recurrent pleasure which lingers on as long as life itself, ut none of these fulfill the dick standards of happiness. All men find themselves murmuring from infancy to decrepitude: "If I only at this one thing, I should be perfectly satisfied with But one thing leads to another, and happiness trol and direct their course.—The Daily Northwestern. has an excess of exports over imports

seems always just around the corner. Pleasures take new forms when they are satisfied as the Hydra or Lerna sprouted heads when one was cut off.

Buddha, dreaming beneath his tree, was suddenly struck with the idea that man's only hope of happiness lay in the possibility of escaping desire and want. This seemed impossible on earth, but in death he saw a loophole in the blank wall of despair. Nirvana alone, the negation of being, the complete absence of desire, would bring happiness to man.

Another moral genius who saw beyond Buddha knew that there was a way other than death to avoid the regenerative tendency of desire and the pangs of want. Man might side-step his own wants by concerning himself with the wants of others. There was a living oblivion to be found in service.

Today men work without quite knowing why. The millionaire says he cannot retire because he has become a part of the "game" and the "game" is a vital tish Rite temple, part of him. The restless son of a wealthy father scorns the coupons of the "parental bonds" and sets himself up in business. The carpenter with his plane ner, Ellen Smith Hall, 6 o'clock. and chisel is as near to happiness in his simple life as the great financier in his yachts and country houses. #### A BROADENED VIEW

Much has been said of the increasing narrowness of the American college education. Undeniably the major system contributes to this narrowness, but it is our belief that this tendency might be offset by certain curricular changes for which there is a decided need at this institution. The major system is necessary in Girls Prepare preparation for any profession, but the electives could offer broader viewpoints.

The principal fault in the major system at the University seems to be that in every department, and semester. Florence Swihart will serve in every subdivision of a department, there are offered from 3 until 5 o'clock. Miss Swihart lems of life. There is also that eleonly very detailed courses in each subject. We have was a news editor of the "Rag" last ment which maintains a sophisicated courses in English literature and in Spanish literature, semester. Dorothy Nott will handle courses in Greek literature and in German literature, but there is in the schedule of courses no mention of the paper goes to press. a course in which we might get a general idea of English, Spanish, German, Greek, French, Italian, and have been selected to act as assistant American literature; the student majoring in a subject news editors. #### "SESSIONS" AND ERUDITION

When a Northwestern dean cast his stamp of ap- arranged for, and will be presented proval on "bull sessions" recently . . . he eased the during the banquet. conscience of thousands of students who have been harassed by the idea that they were wasting time by engaging in informal intellectual discussions.

It is consoling to realize that educators are beginning to justify the unauthorized workings of the Thursday by Gordon Hedges, who is students' minds; and if the dean is right it will not be long before the students' ideas will be given more value than they are at present, for he forecasts in the near future a new type of education which will be founded mainly upon informal discussions between students and faculty members.

The erroneous idea that "bull sessions" were nothing but "smut fests" is fast passing. It is true ning. that when a group get together, at first there is no topic before them and they are forced to pose a few stories. Niebuhr Closes Eventually, however, some question of ethics comes up, and then the real discussions begin. Where these end is oftimes an interesting study. If the arguments are very fiery, no conclusions are derived; but one thing has been accomplished, and that is a fair organization of ideas.

The trouble with ideas in the classroom is that they have no time to be evolved. So many students are obliged to contribute to the discussion that a short time only is permitted for pondering, and this is without enthusiasm. If a student in class cannot reply with a fact the next one on the list has a chance to supply it. In time someone will answer, but it remains a fact without enlargement and without any justification in the student's mind.

In the "bull session" the student does not dread However generous the mortgage his turn on the floor. Rather he fights for a break in holder might be toward the farmer, the discourse of others, and if he gets off on the wrong the farmer nevertheless feels some start, he may resign without disgrace, and enter again resentment toward the banker who when he is better able to express the fleeting idea.

We have often sat in at these informal discussions The economic situation is a far to watch the phenomena of real ideas and the reactions more pressing one than the outlawry they make upon minds used to being passive in the of war, the League of Nations or classroom.
