he holders of Waterman's fountain pens are made of rubber. Years of experience and experiment have demonstrated that there is nothing like rubber for fountain pen holders; nothing that is as light, as resilient, as pleasant to hold, and that has the advantage of being stainless.

Color effects in hard rubber have always defied the rubber chemist until our research engineers finally solved the problem. This notable achievement has resulted in a beautiful line of two-tone stainless ripple-rubber holders in Ripple-Blugreen, Ripple-Rose and Ripple-Olive.

The new two-tone Waterman's pen has a real collegiate look. It is a pen you will be proud to own. It will

be a constant companion throughout your college and business career and a valued memento of your college days. Dependable, speedy pen performance saves valuable time for thought a decided advantage during exams. Two-tone pencils are made to match two-tone pens.

They are sold where you buy your books and stationery.
