

GREEK CAGE RACE IS NEARING FINAL ROUND

Four Teams Are Undeclared in Fraternity Basketball Tournament

PHI SIGS LOOK STRONG

As the class A interfraternity basketball tournament enters another week of play, the leaders in each league are more or less certainly determined. In four of the five leagues there is but one undefeated quintet each. In the remaining league, there are but two teams with clean slates, and one of these is due for a blot when the two teams, Farm House and Kappa Sigma, meet Wednesday night on the Coliseum floor.

Phi Kappa Alpha has won five games in league one, and nothing but the unusual can topple that team from its position. Phi Sigma Kappa has been having an easy time with its opponents in league two. The Phi Sigs, runners-up in the tournament last year, and the winners the year before, show strong indications of repeating previous performances.

Phi Gams Lead League

Phi Gamma Delta disposed of the toughest threat to supremacy in league three when it beat Delta Sigma Phi.

Farm House with five victories, and Kappa Sigma with four, are tied for leadership in league four. The tie is scheduled for settlement Wednesday night. Alpha Sigma Phi is finding the competition in the fifth division comparatively easy, and seems to be lined up for league honors there.

At the conclusion of play in the five leagues, the winners in each division will be matched in a round robin schedule to determine the interfraternity champion.

The standings:

League 1.	W	L	Pct.
Phi Kappa Alpha	5	0	1.000
Phi Sigma Kappa	4	1	.750
Phi Gamma Delta	3	2	.600
Delta Sigma Phi	2	3	.400
Alpha Tau Omega	1	4	.200
Delta Theta Chi	0	5	.000
Tau Kappa Epsilon	0	5	.000

League 2.	W	L	Pct.
Phi Sigma Kappa	4	0	1.000
Phi Gamma Delta	3	1	.750
Delta Sigma Phi	2	2	.500
Kappa Phi	1	3	.333
Sigma Phi Sigma	0	4	.000
Lambda Chi Alpha	0	4	.000
Omega Beta Pi	0	4	.000

League 3.	W	L	Pct.
Phi Gamma Delta	3	0	1.000
Delta Sigma Phi	2	1	.667
Delta Tau Delta	1	2	.333
Delta Epsilon	0	3	.000
Sigma Alpha Epsilon	0	3	.000
Sigma Chi	0	3	.000
Alpha Gamma Rho	0	3	.000

League 4.	W	L	Pct.
Farm House	5	0	1.000
Kappa Sigma	4	1	.800
Phi Kappa Phi	3	2	.600
Sigma Alpha Epsilon	2	3	.400
Acacia	1	4	.200
Delta Sigma Delta	0	5	.000
Phi Delta Theta	0	5	.000

League 5.	W	L	Pct.
Alpha Sigma Phi	3	0	1.000
Alpha Theta Chi	2	1	.667
Delta Chi	1	2	.333
Phi Kappa Phi	1	2	.333
Delta Sigma Lambda	0	3	.000
Sigma Nu	0	4	.000
Theta Chi	0	4	.000

BIBLE IS GUEST OF BUSINESS MEN

Coach D. X. Bible was introduced to Lincoln business men Tuesday noon at a luncheon given at the Chamber of Commerce, honoring Nebraska's new football mentor. Ray Ramsay acted as master of ceremonies for the occasion.

The need of the support of the business men as well as that of the student body was stressed by Coach Bible in his talk to the body. He said that he was clipping all of the nice things said to show people in the middle of the football season.

FIFTY-FIVE TONS OF COAL USED MONDAY

Mr. Place points out a thing which is much like a mirror in shape, having a blue glass in it. "Show 'em your fire, Joe," he says, and the observer stoops down with a complacent manner—as fire is nothing new—preparing to look through the door.

The door is opened. Quickly one places the blue glass before the eyes. They had felt as though they were burning. The clothing steams. One's hands are roasting. "Stand back there," someone says. "It won't be so intense." One complies quite agreeably. What a fire!

Another boiler next to this is "dead" so that it can be looked into. But first, an examination of the stoker might be well. It is called a Westinghouse Underfeed Stoker. Numerous levers, wheels, and joints are seen. They soon become an ordered stoker—not a mass of steel—as Mr. Place proceeds to explain its operation. There are several pistons and a crankshaft which look like those on a large gasoline engine. These are the instruments which force the coal into the boilers, from the hoppers.

Now glimpse inside. There are ridges and valleys on a plane which slopes toward the end of the fire box. The ridges are called "tuyer blocks" on each of which there are numerous small ridges running cross-wise with a blunt, steep side facing downward toward the ashpit. Numerous holes are visible on this side of the smaller ridges. The draft is blown. The air is forced through by a large fan which is automatic.

Coal Runs Down Groves

The coal runs down movable grooves connected with the stoker.

Pershing Rifles Hold Special Meeting Today

A special meeting of the Pershing Rifles will be held this evening at 8 o'clock. It will not be necessary to appear in uniform, but it is of prime importance that every member be present, according to the regular meeting Monday.

Noon Is Deadline for Interfraternity Lists

All entries in the interfraternity boxing tournament must be in the athletic office by noon today, according to R. F. Vogeler, who is in charge of the tournament. Each organization must enter at least three men in order to receive entrance points. If a bout is forfeited entrance points are lost.

burning from the bottom of the fire

instead of from the top. This causes the volatile gases to be burned before they are carried off, thus reducing the amount of smoke. When the coal reaches the end of the slope it has been transformed into ash and clinkers. They are dumped out automatically.

In a representative winter month, like December, 870,000 gallons of water are used for general purposes in the heating plant. Only about seven to eight per cent of this is used to replenish the supply which circulates through the steam pipes over the campus.

The water, as it enters the boilers, is turned into steam and is carried to the various buildings, and condensed, and as water again it is returned to the boilers.

When the water is received at the supply tank it has a temperature of from 110 to 120 degrees. It is then passed through a steam furnace where it is raised to about 250 degrees. At this temperature it is again passed into the boilers and circulated through the campus.

Steam from the boilers is also the source of power for the various water pumps, the draft fan, and the stokers, as well as for the generation of the electricity used on the campus.

Seventeen men, in all, are required to look after this business of keeping the university warm. Nine men are employed for firing and coal handling, three take care of the engine room where the electricity is generated, two look after plant and steam tunnel maintenance, one night heat man inspects radiators in cold weather. Mr. Small is assisted in the management by E. S. Place.

CAGE SEASON OPENS FOR CLASS COMPET

Co-Eds Start Preliminary Practice for Court Championship

Preliminary basketball practice for girls was started yesterday and will continue until after exams. This practice is preparatory to the annual Co-ed, intra-mural basketball tournament held from Feb. 5 to March 5, and also to the class tournament held later in the season.

Twenty teams have entered and assurance of competition has been forecast and enough interest should be shown to keep the practice sessions going. Winners of the tournament receive 100 points toward the intra-mural championship. Fifty points are given each group for every team entered. Many groups have entered two teams.

The purpose of the pre-season activity is to afford the officials the chance of getting a line on prospects for the class teams. These teams are selected only from members of intra-mural teams, hence anyone not registering for intra-mural practice is not eligible for their respective class team. Any one who has not registered but who desires to do so may see Miss Robbins or inquire at the women's gymnasium at 5 o'clock Tuesday.

FOUR CENTS OUT OF DOLLAR GOES TO U.

draw any salary, that the chancellor is the chief executive officer of the university, that 16,287 degrees have been granted by the university in its history, that the University of Nebraska according to full-time enrollment ranks thirteenth among the universities of the country or that athletics are entirely self-supporting.

Many people do not know that the university has such jurisdiction over fraternities and sororities as it has over the student body generally. In regard to conduct of members, that 46 per cent of the men and 35 per cent of the women students attending university the first semester 1927-28 were enrolled in fraternities and sororities, that during the past five years in the university, using an average of 6,000 full-time enrollment only about 5 per cent each year have been forced to leave school by poor scholarship.

Soldiers and Athletic Department Will Mount Wooden Steeds for Polo

Five days have elapsed since the department of military science sent their challenge to the athletic department questioning that staff's ability and daring them to compete in a polo game to be played on kiddie cars.

Various rules are to govern the proposed contest to be played as the feature event in the "N" club Husker carnival to be held Jan. 25. Their polo ponies are to be kiddie cars. The mallets are to be on any length under eight feet. The ball will be no less than three inches in diameter or greater than fifteen inches.

The military department promised upon their honor no material of an explosive nature would be placed in the ball to be used in the contest.

Both sides may wear any type of uniform except that no plumes of a length greater than three feet are to be worn.

The members of the departments are to play personally and not draft players for the game. The members of the teams are to be chosen in a very unique fashion. The chiefs of the department of military science are to choose their opponents' team while the athletic department will choose the competitors.

Although no acceptance of the challenge has been received as yet,

HUSKERS WILL HAVE FOUR INDOOR MEETS

Kansas City Athletic Club Is Season Opener for Thin Clads

Nebraska will compete in four indoor meets, preparatory to the outdoor season, according to the schedule outlined by Coach Henry H. Schulte yesterday afternoon. A fifth meet will probably be slated to fill out the program.

The schedule to date is as follows: Kansas City Athletic Club meet, Convention hall, February 2; Ames, here, February 23; Big Six indoor meet, Convention hall, Kansas City, March 1; Illinois Re-lays, Urbana, March 15. An extra meet will be slated to fill in the gap between the K. C. A. C. meet and the Ames contest.

Tonight Nebraska's basketballers take on South Dakota for the first basketball game of the week. The South Dakota five is the second quintet from that state to appear before Nebraska fans this winter. South Dakota State fell before the Huskers in the season opener before the holidays. Then Saturday Charley Black's fastest basket tossers take on the fast Allen crew from down on the Kaw. The Jayhawkers surprised critics in the conference by offering the Oklahoma Sooners a run for their money in the conference opener dated at Lawrence Saturday. The Jayhawkers will be plenty tough for the Husker five and with Thompson and Cox hitting the rim as they have been during the season, the Nebraska guards will have a large evening covering these two Kansans.

As far as we could see there was nothing particularly wrong with the Scarlet against Missouri last Saturday except that Nebraska lacked a Welsh. The floor work of the Husker team was fairly well perfected although the guard work was noticeably weak. Carl Olson surprised Husker fans with his dazzling speed and floor work against the Tigers and only lacked a running mate that could play the same brand of fast ball that he did. With only one guard a basketball five can not expect to stop men like Harry Welsh, Tiger sharpshooter. The center position, which for the past years has been weak, seems to remain in the same undoubted position. Since the day of Ted Fargo the Huskers have been unable to locate a man with speed, basket eye and a tall frame. Although Hubm was quite a surprise at center, "Red" Baker came in to perform very admirably for the Tiger five.

Morris Fisher and Harv Grace, the two Husker forwards, Fred Waldorf, the Tiger guard, a hard man to deal with and the Missouri guard combination held the Husker forwards to a pair of counters each. Fisher, a sophomore, looks plenty fast on the Husker five and has team-mates that can keep up with him, in Harvey Grace or "Dutch" Witte. The Nebraska forwards will find Cox of Kansas a dead eye on the basket. To allow him a time shot means two scores up in the other side.

Cavaders Are Dissected for Muscle Study

A number of cadavers preserved in phenol and formaldehyde, are obtained from Omaha each year for the laboratory use in the anatomy department. These are bodies of derelicts, paupers, criminals, or other unclaimed bodies of both white persons and negroes. They are of various sizes but the medium sized body is the best for laboratory work according to Dr. T. Anderson, head of the department.

Upon first entry into the laboratory the sight is rather gruesome and it sort of "gets" one to see the nine human bodies partly wrapped in cotton and lying on tables. Curiosity is certain to prevail, however, and before long one is feeling a piece of the skin of the cadaver and marvelling at its leather like thickness.

Girls who major in physical education have overcome any feeling of distaste, and busily cut away at

Eight Seniors May Get Cornhusker Pictures

Eight more seniors may have their pictures taken for the senior section of the 1929 Cornhusker, according to William Mantzer, Jr., editor. Seniors who wish to have their pictures taken must report to Townsend's studio before Wednesday night. The first eight to report will get their pictures in the senior section of the Cornhusker.

legs and arms in their study of the muscles, arteries and nerves. The heads are to be used later by dental students. There are now about twenty in the physical education class and thirty dental students.

The Anatomy department also has a number of embryological exhibits which are interesting.

ESTES GROUP MEETS TO TALK OVER PLANS

Eighteen Students Attend Fourth Meeting For Discussion

Eighteen students attended the fourth meeting of the Estes conference group of the University Y. W. C. A. and Y. M. C. A. held Sunday evening at the home of Eloise Keefe, 1702 South Fifteenth street. Each student presented the names of others interested in attending the conference this year.

The preliminary announcements concerning the conference to be held June 7 to 17 were made. More than twenty men and women from the university attended the conference last year. It is expected that a larger number will attend this year, including the secretaries of the two Christian associations.

Hays Reads Book
C. D. Hays, general secretary of the university Y. M. C. A., led the discussion which was taken from the first two chapters of the book, "Christ at the Round Table," by E. Stanley Jones. This turned upon the statements made in the discussions by men of various religious faiths, which had to do with their own experiences. The Hindus and Mohammedans present seemed greatly impressed with the joy and peace that had come to the Christians and not to them, according to Mr. Hays.

Songs that were favorites at the conference last year were sung during the evening, and a light informal lunch was served. All students and faculty members who are interested in attending the conference are urged to be present at these group meetings. The next being held Sunday, February 10, at the home of Carl Olson, 1405 South Sixteenth street. Definite announcement of the topic for discussion has not been made, but it will grow out of last night's discussion topic.

Frankforter Will Speak On Story of Petroleum

Dr. C. J. Frankforter, assistant professor of chemistry, will give a fifteen minutes lecture on petroleum, followed by a seven reel moving picture on the "Story of Petroleum" Thursday, January 17. The meeting is open to all persons who may be either directly or indirectly interested in chemistry and will be held in room 206 of the Mechanic Arts hall at 7:45 o'clock.

Zoology Students Meet on Saturday

Crowded conditions will force many students of Zoology 1 and 2 to register for Saturday laboratory for next semester. The number of students in the Tuesday and Thursday laboratory sections will be cut from seventy-two to forty-eight because of the class in Ornithology and nature study.

WRESTLERS PREPARE FOR MEET WITH AMES

Kellogg Is Handicapped By Lack of Material For Mat Team

John Kellogg, wrestling coach, is putting his men through hard try-outs in preparation for the wrestling meet with Ames next Saturday evening after the basketball game. Wrestling is one of the favorite sports at Ames and a strong team is anticipated for the meet.

Coach Kellogg is hampered by the fact that very few men are coming out for the team. Because of an injury, Hunt the only 175 pounder is not able to wrestle and therefore there are no Nebraska men in this class.

In the heavyweight class only one man is placed on the team, Arden Peterson. Peterson is a sophomore and has had very little experience in wrestling. Last Saturday's crowd witnessed his first match. He performed unusually well, but was defeated by a much more experienced opponent.

Fordyce Writes Article On Youth and Careers

Prof. Charles Fordyce, chairman of the department of educational psychology and measurements, is the author of an article which appears in the December issue of the National Vocational Guidance Magazine.

In this article Prof. Fordyce puts forth the results of his research in the methods of his discovery of special aptitude as criteria in the guidance of youth into a life career.

Wimberly Is Guest Speaker at Press Club

Prof. Lowry C. Wimberly, associate professor of English, will be one of the guest speakers of the Omaha Women's Press club dinner at the Fontenelle hotel this evening. He is also the chairman of the board of editors for the Prairie Schooner.

Girls Club Will Meet At Luncheon Thursday

Girls Commercial club, a business administration organization, will hold its monthly luncheon Thursday, January 17, at 12 o'clock in the Lincoln Chamber of Commerce rooms. Announcement of the meeting was made by Mildred Olson, president of the organization.
