forth hills, in the western Moffat county, are also intested.

Posters have been placed through out the infested regions urging the residents to inform those in charge of the campaign as quickly as the crickets begin to hatch. County Ex-P. S. Ingham of Motfat and Routs counties will assist Mr. Cowan in any manner possible in the work.

### MADISON COEDS OUTSPEND MEN

Average Woman Student Spends \$148.80 More Than Males

Madison. Wis., April 9 -The average woman student. if any, at the University of Wisconsin spends \$148.80 more per year than the average man, according to a pamphlet entitled "Thar's Gold in Them Hills, Pardner," prepared by the Daily Cardinal, student publica-

The entire student body spends approximately \$8,355,321.02 in Madison, according to the newspaper's compliations. The average expenditure is \$902.58. Men students expenditures total \$15,000 daily. Women spend three times as much for clothes as men, but men's amusement expenditures

twice the amount spent by women Both sexes spend an equal amount for flowers, but women amount for flowers, but women and to 8.68 a.m.—Origin of Place buy three times as much jewelry to Espartment of Conservation and the men. Musical instruments cost the men \$21,705.88 an nually, which is one and one-half times as much as it costs women

Senior students spend more than those in other classes. Juntor men spend less than sophomores or freshmen while the first year men are second to seniors in expenditures. Junior women, top the list in the year's expenses.

The statistics were prepared from 1,202 questionnaries mailed to Craig, Colo., April 5. - War students in the spring of 1928. scainst the Mormon crickets in Thirty-five percent of the question-

destroyed by fire. This photograph, before the university library had been built.

State Geologist E. F. Bean believes that the pictures were left in the storeroom by W. H. Hobbs, a former professor of minerology at Wisconsin who left the university to go to Michigan in 1906. Mr. Bean has turned all of the photo-

More Accessible to Public

The consolidation of the State Geological and Natural History survey on the first floor of Science hall facilitates the department's work, and makes it more accessible to the public. It now occupies eleven rooms, including three large store rooms in the basement.

One of the conveniences of the new quarters is the bringing together of all maps and bulletins in single storeroom. Here on shelves is an orderly arrangement of informational material covering a wide range of subjects. Copies of all survey bulletins from the first one issued in 1898 down to the last issue are filed here. Subjects range from a "study of the habits of the solitary wasps" to "the Phylo-plankton of the inland lakes of Wisconsin." Series of builetins inciede scientific series, soils series, educational series, and economical

Youngsters Are Taught How to Use Typewriters

These twenty-five children from the rifth and sixth grades of Bancroft and Bryant schools formed into a class and spend forty minutes every afternoon learning the touch system on the type-writer. The advisability of teaching type-writing to students in the grade schools is being worked out by Ralph Relard, assistant instructor in type-writing at the University.
