

ORIENTAL WILL GIVE VIEWPOINT ON CHINA

Mrs. Induk P. Kim Will Address Y. W. C. A. in Temple Cafeteria.

Honoring Mrs. Induk P. Kim, traveling secretary for the Student Volunteer movement, members of the "Nebraska in Shanghai" staff, led by Minnie Nemecek, are sponsoring a dinner at the Temple cafeteria at 5:45 o'clock this evening.

All women who participate in work done by the various staffs of the university Y. W. C. A. may attend the meeting at which Mrs. Kim will speak about conditions in China. An Oriental, Mrs. Kim will attempt to portray conditions as they exist in China, so that the girls on the Nebraska campus may appreciate the work accomplished by the organization in China.

Schedules Other Talks. Mrs. Kim will speak before the sophomore commission groups on Wednesday afternoon at 5 o'clock in Ellen Smith hall. She will describe customs in China. Plans for the all sophomore party on Feb. 28 will be completed, under the direction of Helene Skinner who is assisted by Jean Rathburn, Bernice Hoffman, Dorothy Thurlow, Rachel Branson and Paula Eastwood.

On Thursday at 7 o'clock Mrs. Kim will meet with and talk to a group of student volunteers at the Baptist student house, 1440 Q street.

BUSINESS MEN WILL INTERVIEW UPPERCLASSMEN

Mr. H. T. Carmichael of New York, a representative of the W. T. Grant company, and Mr. A. L. Rhoads of Chicago, operating manager for the Goodyear Tire and

Oriental Speaker

MRS. INDUK P. KIM.

Traveling secretary for the Student Volunteer movement who will speak at a Y. W. C. A. dinner in the Temple cafeteria Wednesday evening and at various other meetings Wednesday and Thursday. Her subject will be "Conditions in China."

Rubber company, are to be here on the campus to interview graduating seniors who may wish to learn about employment possibilities in these organizations. They will both be here Wednesday and Mr. Rhoads will remain through Thursday. Appointments with Mr. Carmichael and Mr. Rhoads may be made in S. S. 306.

MINORITY FACTION STAGES COMEBACK

(Continued from Page 1.) Successful nominees and be presented at the Junior-Senior Prom on March 8.

Prom Girl Race Close.

According to the report of the prom committee which had charge of the counting of these ballots Tuesday night, the voting was very close and there was but a small margin between each candidate. At no time during the polling did any candidate have a decided lead and it was not until the last handful of ballots was counted that the leading four were determined.

A total of 1,655 votes was cast at this election. The proportional representation amendment drew the largest tally, while Russell Mattson, blue shirt candidate for Ivy day orator, was second in number of votes received. Robert Kelly, blue shirt junior leader, grabbed most of the votes in the class presidency races.

Up to noon Tuesday the yellow jackets were said to be far in the lead but as the afternoon gradually progressed the blue shirts were able to hold their own and with the agricultural college vote were able to make a pretty fair showing. In the positions taken by the blue shirts, the ag vote did not alter the count, since the successful aspirants were able to muster enough supporters on the city campus.

Constant watch was made over the polls by members of all factions. Two representatives from each of the factions were also present at the time of the counting of votes, in order to dispel any misimpressions concerning the results.

That the election was entirely on the square is attested to by Ralph Raikes, who was present at the polls the entire day. "There were no evidences of misconduct or fraud of any kind," declares Raikes.

MISS OLSEN WILL SPEAK AT Y.W.C.A. VESPER SERVICE

Miss Violet Olsen, girl reserve secretary of the Y. W. C. A. will discuss "Feminine Fables" at the vesper service Tuesday afternoon at 5 o'clock in Ellen Smith hall. The many interests of the Y. W. C. A. showing that it offers something for everyone will be the theme of her talk. The devotional service will be led by Paula Eastwood. A program of special music will be presented.

Large Class Enrolls For Psychology Course

Probably the largest number of students ever registered for any one course in teachers college is enrolled in educational psychology this semester. Three hundred eighty-six students are in the group. Two extra sections, making the total five, were added because of the unexpected large registration. Miss Winona M. Perry and Miss Mary Heurmann are instructors.

Dean Hicks Raises Flowers for His Recreation; Likes Delphinium Best

BY MARGARET TINLEY. Of all the flowers that he raises in his garden, perhaps the delphinium is the favorite with Dr. John D. Hicks, dean of the college of arts and sciences and professor of American history. But they are all a part of his fascinating hobby, he says, even the ever-present dandelion.

For about five years now Dean Hicks has been deeply interested in his flower garden and declares it the only hobby and that he is just a student gardener. He says that much of his gardening guidance has come from Dr. Upon, dean of the graduate college and professor of chemistry who also has a garden hobby. In fact it seems one cannot predict an instructor's hobby or recreational interest just from knowing his particular branch of teaching. Dr. Hicks has all kinds of flowers that grow well in this soil, flowers of all colors and of all seasons—from the early tulip to the late chrysanthemums and dahalias of the autumn. "The trouble with my garden," he says, "is that I am away quite a bit

MEDICAL COLLEGE ACTIVITY

PAUL G. PLATT, Editor.

DR. JONES TALKS TO STUDENTS.

Dr. N. W. Jones of Oregon visited the University of Nebraska college of medicine Monday afternoon. During his visit he spoke to the students on Monday afternoon. Dr. A. D. Dunn in introducing him said that Dr. Jones was one of the best known internists of the west coast country. He has also been quite instrumental in the development of the medical college of the University of Oregon.

Dr. Jones' subject was "The Physician's Approach to the Cardiac Patient." He said that it is hard for the student to separate the fundamentals from the less important details.

There are two methods of approach. The first one is to decide whether or not it is a cardiac case. If it is a cardiac case then the student must have some details as working tools, to aid him in determining the types of failure, enlargement of rhythm, valves, and infection.

The other method of approach is with the idea of finding out the underlying pathology. Dr. Jones said that cardiac infection would be due to one of the following causes: 1. rheumatism, 2. syphilis, 3. renal, 4. cardiac sclerosis, and 5. thyroid. According to Dr. Jones the student has these methods of approach well in mind he should have little trouble in diagnosing cardiac patients that come for treatment.

ROBERT GILDER GIVES LANDSCAPE.

Doctor Robert F. Gilder has very generously made a loan of his colorful Arizona landscape to the University of Nebraska college of medicine. It is to be hung over the mantle in Conkling hall and will be on view for the first time Feb. 22 when the faculty of the college of medicine, with their wives, assemble in this hall for the annual Washington birthday dinner.

It is an especially interesting loan because of a long friendship the artist has had with the Doctor. Dr. W. M. Foster, now dean of the medical school, and because Doctor Gilder is state archeologist for the university, and several years ago received an L. L. D. degree from our university in recognition of his work.

NURSES HOLD DANCE.

Friday night the nurses of the nurses training school extended an invitation to all medical students to a dance in Conkling hall. A good crowd was present to enjoy the hospitality of the nurses.

PHI CHI AND NU SIG TEAMS PLAY IN FINALS.

The Phi Chi and Nu Sig basketball teams will play Thursday night for the last game of the tournament now being held at the school. Last Thursday night the Nu Sig team defeated the Phi Bet's 31 to 11. The Phi Chi team beat the barbs 21 to 11. The Nu Sigma Nu team is defending the cup which they won last year, yet from the strength of the two teams this year the odds are in favor of the Phi Chi team. The game will be played in the Technical High School gymnasium.

WORCESTER LEAVES FOR ATLANTIC CITY

Dr. Dean A. Worcester, professor of educational psychology, left Sunday evening for Atlantic City where he will attend meetings of the department of superintendents at the national educational meetings to be held there until March 1. Mr. Worcester will lead round table discussion upon psychology.

Women Voters Plan Discuss World Court

The "International Relations" discussion group of the University league of Women Voters will meet at 4 o'clock on Wednesday afternoon in Ellen Smith hall. Ethel Sievers, the chairman, will lead a discussion on the World Court. All girls interested are invited to attend. Refreshments will be served without charge.

Portrait of Former Uni Student Is on Display

A portrait study of Miss Valinquette Morrison, former University student, now studying advertising design in Munich, Germany, is being exhibited in the photograph display at Morrill hall this week. It is the sole entry of A. W. Olson of Chicago, and was taken when Miss Morrison was a student at the Chicago Art institute.

BOTANY INSTRUCTOR AWARDED FELLOWSHIP

Dr. Steiger Will Spend Eighteen Months in Europe.

Dr. T. L. Steiger, instructor in botany, has received a fellowship enabling him to travel and study in Europe for a year and a half. The fellowship is granted by the National Research council at Washington, D. C.

The grant will permit Dr. Steiger to take his family to his native land, Switzerland, for a full year of travel and research. He will spend the most of his time at the Geobotanisches Forschungsinstitut and university in Zurich, which is only about fifty miles from his boyhood home near St. Gallen where he attended college.

Dr. and Mrs. Steiger came to America about ten years ago. After a few years in various German-American communities they came to Lincoln where he was pastor at a German Congregational church for a time. He finally gave up his pastoral work to enter the graduate college of the university where he has held a fellowship in botany. He received the degree of doctor of philosophy in 1929 from the botany department and he is serving as an instructor in the department this year.

The fellowship comes as a substantial reward for the work that Dr. Steiger has accomplished at the university, and as a compliment to the instruction that is afforded by the graduate college. This is the first fellowship of the kind granted to a student at Nebraska.

Dr. Steiger and his family will go to Europe soon after the close of the university in June and will remain abroad until the fall of 1931. He will probably attend the sessions of the fifth international botanical congress at Cambridge, England, in August, 1930.

DR. LEROSIGNOL IS SPEAKER AT KEARNEY DINNER

Dean J. E. LeRossignol was principal speaker at an annual banquet of the Kearney, Nebr., chamber of commerce, Tuesday evening, Feb. 18.

The purpose of the banquet, which was attended by 400 persons, is for the boosting of community progress. Dean LeRossignol spoke on "Advocations and Community Improvement."

Miss Shanafelt Will Talk on 'Washington'

"George Washington" will be the subject of the talk that will be given by Miss Marjorie Shanafelt to the juveniles at the regular Sunday afternoon Morrill hall program at 2:45 o'clock, today. Two films will be shown. These are, "Man Handlers," and an animated cartoon film of "Felix the Cat."

Lady Spring Steps In to Lure Greeks And Greekesses Out of Study Hall

BY EVELYN SIMPSON.

Lady Spring, coy little vixen that she is, has begun her dirty work and only laughs mischievously at the bewilderment she has created in the long dormant minds of campus figures when they find themselves longing for the wide, open spaces, a car, a moon, and a girl.

Coincident with Her Ladyship's pretense at an early arrival only to encourage young innocents to buy a new bonnet or a clean pair of corduroys comes the desire of imprisoned pledges to cut study table and follow the call of the wild.

Even as the sirens in days past lured the sailors with their songs and exquisite beauty to certain death, so Spring murmurs through the trees and breathes her perfumed breath into the remotest corners of the cob-webbed brains of the most conscientious pledges.

Conspiracy Leads to Skip.

A conspiracy between two of cupid's aides—camp, her above mentioned ladyship, and Diana of the silver chariot resulted last

Groundhog Fails To Predict Weather Correctly This Year

The ground hog had better look to his laurels! For several years people have been doubting this little animal's sagacity. Monday's temperature of 64 degrees may disprove his ability to forecast the weather. This temperature was not a record breaker, however. The highest temperature for February in Lincoln was the fifteenth in 1921 when the temperature was 74 degrees. Other seventeenth of February with high temperatures were in 1888 with 65 and 1913 with 72. Feb. 11, 1928 showed 65 degrees.

TEACHERS ARRANGE LIBRARY EXHIBITION

Miss Fitzsimons Groups Text Book Display For Students.

A permanent textbook exhibit in room 5 of teachers college has been added to the elementary department of teachers college according to announcement made Monday by Ethel Fitzsimons, instructor of elementary education. Books are obtained from the publishers, classified, and sent to the department office. They are then grouped under heads and placed in the library.

The plan has been working successfully and instructors of the college are highly pleased with the plan. The books are of use to students in the college in preparing lesson plans, and in examining and selecting suitable textbooks. Approximately 300 volumes are now in the room which is the only library of teachers college.

Engineering Graduates Visit Nebraska Campus

Engineering graduates who have been on the campus during the past week are Lee Smedley '28, who has been with the Lago Petroleum company, at Maracaibo, Venezuela, South America, and Edgar Safarik '23, water and light commissioner at DeWitt, Nebraska. Smedley, a graduate from the geological department, was a visitor at Morrill hall also.

Professor Bruno Will Teach at Summer School

Frank J. Bruno, professor of applied sociology and head of the department of social work in the school of business and public administration at Washington university, will have charge of a two week summer session in social work at the University of Nebraska, July 28 to Aug. 8. This is the fourth time that Professor Bruno has had a short session at the university.

GLIDER WILL SOON TAKE AIR IN TRYOUT

Sharp Says Craft Will Be Ready to Launch in Early Spring.

Progress is being made on the construction of a glider, by the Glider club. C. Willard Sharp, president of the organization, says that they expect to complete and launch the craft early this spring.

The framework of the glider is practically completed and it was temporarily assembled during Christmas vacation. The cloth covering is as yet lacking and a few minor parts are still uncompleted. The wing span of the machine is thirty-two feet, height eight feet, and length twenty feet. Two methods of launching it have been proposed but the club is undecided as to whether they

shall tie it behind a car or use a rubber shock cord.

The club, a comparatively young organization at this university is sponsored by Prof. J. W. Haney, departmental chairman of the mechanical engineering college. A. E. Hasting, in charge of the woodworking department is an honorary member of the club.

Present members of the Glider club are: C. Willard Sharp, president; L. K. Humphreys, J. Cema, G. Leeson, R. M. Henry, Ziph, K. W. Morrill, L. D. Miles, W. C. Norris, B. H. Osterloh, and C. W. Vredenburgh.

Hertzer Will Teach at Colorado Summer School

Dr. J. O. Hertzer, chairman of the department of sociology, will teach in the initial session of summer school at the University of Colorado at Boulder, this coming summer. He will have classes of graduate students mainly, but will conduct two courses open to undergraduates.
