ARTISTS NEGLECTED, REPORTS GRUMMANN

Deplores Slow Growth of Fine Arts Schools in KFAB Talk.

AMERICA LEADS IN TASK

"While development in college and university training has taken place, the representatives of the fine arts have stood aloof on the theory that artists must continue to grow up like Topsy, declared Prof. Paul H. Grumann, director of the school of fine arts, in his radio talk on "The Place of Art in Higher Education," from station KFAB Tuesday afternoon

"Colleges and universities have been very suspicious of the fine arts. The University of Berlin did open its doors to art history and criticism and the theory. Following its example such chairs appeared sporadically in our colleges and universities.

"But the applied arts," he dded, "remained in utter dark-European universities remained adamant on this subject. It seemed to reqire American common sense to reach the thoroughly logical conclusion that colleges and universities that are supposed to teach all things that are useful to man should include the fine arts in their practical applied

Treed Cat's Release Brings Back Faith of

Students in Frat Men Shortly before 9 o'clock Tues-ay morning, two members of hi Sigma Kappa fraternity were seen weaving out of the fraternity house driveway. With deft manipulation the driver succeeded in chugging his collegistely open flivver up on the sidewalk to the north of the Phi Sig house, on the corner of Fourteenth and R streets.

Coming to a stop directly be-neath a tree, the old Ford gasped and sputtered. The driver's accomplice climbed cautiously up on the back of the rear seat, reached into the overhanging limbs of the tree and hauled down a frightened scrawny cat.

Students who had paused, curious, on their way to 9 o'clock classes watched the open air car sidle back into the driveway, witnesed the release of a relieved cat and hiked on toward the campus, their faith in fraternity men restored.

forced to grow up by accident.

"No one desires artists that are bedged in by the pedantry of learning. graduate students in the departartists that are so hopelessly by traditions of the past bound that they have nothing to say in their own name. If colleges and university training in art means that, no sane man can welcome

"We of the universities are painfully aware of the fact that we are still harboring pedants in our "It would seem logical that if the chairs of literature," admitted leaders of tomorrow are to be Prof. Grummann, "but we are trained in our colleges and uni- not ready to abandon our college promities." versities, the artists that are to in that branch and we are firmly provide the inspiration for these of the opinion the literature of the coming generation will profit by this activity.

"Our art departments will cer-tainly harbor some traditionalists, but the youth of our universities, protected by an elective system, will never allow this evil to be-come serious. There has always been a glorious independence in college youth and there is nothing the horizon to indicate that this spirit is in decline.

Leadership Ahead.

"The time has come when looking forward to enlightened leadership and expert service. We again insist that a trained pharmacist should dispense our pills that traained dentists tease our molars, that a certified teacher train our process. The time required to fin-children. Why not see to it that ish an automobile body by that we be inspired by cultured artists?" he demanded

"When fine arts are incorporated in our schools, the art student will really have a chance to show what the possibilities of art are in America. In addition to this cussing the latest developments in the fine arts will bring a refine- pyroxylin lacquers. ment, a culture, an enthusiasm to the general student that will convert his drugery into something like inspired work."

Professor Grummann will speak again next Tuesday over radio station KFAB on "Art Galleries of Europe," at 2:30 p. m.

CANDIDATES TO MORTAR BOARD ELECTED TODAY

(Continued from Page 1.) school, and a record clear of all incompletes, failures or conditions. The second basis for selection of members of Mortar Board is service in colege activities of all sorts. The quality of service more than the quantity is regarded as important for participation in a very large number of activities to which none have been done justice does not determine a girl's service to college activities as much as the conscientious care with which she has worked at what she has been interested in, according to the opinions expressed by various members of the present group.

Leadership Important. drudgery is not important, and no girl should receive the honor of exceed 13,000. to the college activities in the way of original enterprise and leader

These three bases of consideration are general for all chapters of Mortar Board, and senior women who cast votes at the polls tomorrow are urged to choose girls who have really qualified for dis-tinction in scholarship, service, and

leadership Those thirty junior women who receive the highest number of votes in this election by the senior women, will comprise the list of girls from which the present chapter of Mortar Board will select its successors. This list of thirty will first be sent to the registrar to be checked for scholarship, and the girls who are finally selected will be among those who remain on Palo Alto, Clif.-Mumps is the the list after this final scholastic most popular prevalent disease at check.

DR. DEMING PREDICTS PLASTIC FURNITURE

Chemistry Professor Makes Forecast in Lecture Tuesday Night.

HAD A YEAR'S LEAVE

Furniture molded from plastics, the same material now used for making buttons, cigarette holders. ash trays, and ink stands, is an entire possibility which may not lie too far in the future, Dr. H. G. Deming of the department of chemistry told a gathering of students and Lincoln citizens attending a special meeting in Chemistry hall Tuesday evening

Dr. Deming has just returned from a year's leave of absence which he spent with Arthur D. Little, Inc., Cambridge, Mass. His lecture Tuesday evening dealt with the sources, the manufacture and leaders should at least have an application to everyday life of cerequal chance, and should not be tain plastic materials made from ment of chemistry.

Plastics Replace.

"Until very recently many of mittee will handle all the details of the conveniences of life were laboriously fashioned from wood, consistent offenders to appear bebone, horn or stone by a process fore the court. of sawing, whittling, chiseling or Enforcement of the traffic orditurning on a lathe. Today these nances was taken from the hands declared.

Plastic materials are those which | men's council. may be shaped by pressure, the speaker reiterated. Telephone re- at court they will be suspended ceivers, mouthpieces, paper knives and other conveniences which fifty special arrangement. years ago were made by costlier processes are now made from synthetic plastics, shaped by pressure. Furniture molded from the same material will come next, Deming predicted.

Shellac Important.

"The most important plastic resin is shellac which is secreted by the lac insect on the twigs of certain trees in Siam and neighboring parts of the Far East Phonograph records are molded and America are again from plastic materials consisting largely of shellac," he related.

Until as late as 1922 automobiles were finished with varnish and other oils that dried by a slow weeks. Today this has been re-duced to a few hours by the devel-in his speech. opment of certain lacquers that

Acceptance of Principles ficers for the coming year was cards are to be of one style, but Of Christianity by Ghandi Is Good.

"Christianity is doing and will do a lot for the people of India, but only through the right kind of missionaries," stated M. Kamaka-bri Rao, Hindu engineering student from the University of Kansas at Vespers Tuesday evening. Christianity has already given to

many people of India a definite, concrete outlook on what they thought intangible things, accord ing to Rao. Ghandi, the greatest political leader India ever produced, bases many of his ideas on the service of the mount. When the Indians realize that Ghandi, around knowledge of athletics whom they adore, believes in the would carry him far in the coach-Bible, they will think there is something in it, he stated.

Missionaries are needed, July 1. in order to conduct a good ones who will teach the right coaching school. His real work ways of living and thinking. There will begin in the fall when his first are already too many of the wrong type, Mr. Rao says. send more of the right type."

The present tendency of the

Hindu is to analyze every religion he comes in contact with and take the best from each of them. Christianity has done a little in abolishing the caste system and bringing the four different social classes on an equal footing, Rao declared.

In briefly outlining the history of India M. Rao pointed out that the Indians were of Aryan stock. India consists of a number of native states ruled by princes or rajahs. The Indians are a darkskinned race due to climatic conditions although there are many blonde Indians. A great number of religions originated in India, including Hinduism, Mohammedan-ism, Buddhism and combinations of these

It takes more than a degree to make an engineer

It's pretty hard to keep your mind on a study of fatigue-of-cable-sheathalloys, when you are thinking of the joys of artistic creation. And why try? There is work aplenty in this world for engineers and artists, for doctors, lawyers, builders, salesmen.

The difficulty is that the individual

doesn't always connect up with his work. Too many college men never take the trouble really to analyze themselves. Self examination now with the aid of

your faculty advisor may save years of groping later on. And at graduation it will help you off to a
