#### THE PARKING PROBLEM

OF ALL the worries that beset Nebraska students, the parking problem for more than 1,200 of them is a major annoyance. Since the popular advent of the automobile on the local campus, parking has presented a new difficulty which, up to this time, has not been met successfully.

There is little need to review the situation as it now exists. Any student interested in parking group are among Nebraska organizations doing exknows what it is. He realizes first that there is far from enough parking space. He is also cognizant of the fact that he must park three and four blocks away from his classroom,

Statistics compiled last semester by the university reveal that 1,254 undergraduate students drive cars to school. On the avenues immediately bounding the campus there is room for no more than seven or eight hundred. These figures tell the story of the scarcity of parking space-tell a story that needs no explanation.

Many students do not need to drive their cars to school. Many would do much better to walk five or six blocks from their domain to the campus. The array of motors, ranging from limousines to collegiate wrecks, that migrates daily from North Sixteenth street and environs, gets only a block or two nearer the campus.

Regardless of the wisdom or lack of it shown by these people, there is no way of preventing them from driving to school if they choose to do so. And so the student coming in from outlying parts of the city often finds all spaces near his classroom taken. He must drive around several minutes before finding a place perhaps three or four blocks distant.

TO BETTER this condition, The Nebraskan has two proposals which would provide space for approximately 200 more automobiles with little expense to the university and with no impairment of safety.

. . . . . .

1. The parking space for faculty cars just north of Social Sciences, never more than half full, should be doubled by permitting two rows of cars to park along this driveway. Space actually used by faculty members should be reserved for them, but no more.

street from R to the end of the paving should be at a 45 degree angle instead of parallel with the curbing.

There is no reason why the drive to the faculty parking area could not be widened slightly and the coeds have deemed it necessary to further add parking space be provided on the north side of the to the activities of the place by holding their nudrive as well as on the south side. Even a part of the south side, now in use by the faculty, could be turned over to the students. At no time during the past week has this been much more than half full. The provision for approximately eighty cars on one side could be reduced to sixty so that students could have one end of this and the entire north side.

This bites another piece off the already depleted drill field. But still the drill area is large enough for company or platoon meneuvers. On parade and review days this space could be shut off with little difficulty. The cost of cindering another strip of ground along the present graveled driveway would be of small consequence.

UNTIL about a year ago, parking at a 45 degree This was unsafe on such narrow thoroughfares besides adding to the congestion. Twelfth street. slightly wider than R street, is not open to general hallway to its classes? Perhaps when the fairer more unsafe than it is today. There would be little Paine's corner and on other busy thoroughfares. more congestion than now at the noon rush.

The parking problem has grown into considerable importance at the university. The fact that nearly one out of every four students drives a car evidences this truth. Relative to education proper and the importance of study, parking is of little sig- part of our great institution as anything that we nificance. But it is a problem that should be remedied for the convenience of a busy student body.

#### TALKIE PROFESSORS.

AT A local theater last week, a class from the university heard and saw a talkie dealing with oil tachment relayed the explanation of the film by a noted professor.

what will be the situation a decade, or even five should we? years hence? Will the talkie professor combined with visual education supplant the classroom in-

The Daily Nebraskan has for aid to education from the grammar grades through | many years proved to be a commendable laboratory the university. They will add materially to the al- for actual field work in one side of the profession of ready important part played by visual education. journalism-but how about the other side? They will make possible analysis of phenomena which often remain hazy in the student mind after find sections devoted to poetry (both verse and showing of a regular movie.

But talkies will never deprive professors of their jobs. The personality factor plays too dominant a sprinkled here and there, quite extensively, are the role in university education. Rather should the uni- parts that contribute to its apparent existence, the versity consider ways of increasing the contact wit and humor. professsors make with their students instead of promoting schemes that remove them farther.

others whose interests in the individual student and and humor good art?

Hauck's studio will presse.

the problems each of them meet make them invaluable from the student point of view. Instructors would do well to take an inventory

of themselves periodically and consider, among other things, if they are mere talkies of education or if they are contributing something more-something of their personality that is a distinct and direct aid to the students enrolled in their courses.

Nebraska does not want talkie professors. It wants live ones, intellectually keen and mentally alive to the divergent problems that come before the individual students in their classes. It wants profeasors who will take a personal interest in these students. It also wants students who are willing to endeavor to grasp what these professors have to offer and who are willing to make a personal contact with them that their knowledge may be expanded, that their lives may be further enriched.

#### FINE FEATHERS VS. FINE BIRDIES.

IOWA university's chapter of Sigma Delta Phi, honorary women's forensic sorority, is conducting an intersorority debating contest. Eleven groups are contesting. The subject to be debated in: Resolved that the women's panhellenic association of the University of Iowa should adopt a rule requiring that every candidate for admission to a sorority Them. have a grade average of 2.25 (approximately 78) for the semester preceding initiation.

The sponsors of the contest could have selected a much more significant subject to discuss. Their subject is one which may be a very pertinent one now but it is of only passing importance. The Iowa sorority is to be commended, however, for making a start in this kind of competition.

University women should have some interests in college aside from their regular school work and social activities. As future leaders in their communities they should be contemplating and discussing How to Teach it." some of the problems they will have to meet. The University League of Women Voters and the Vespers cellent work along these lines.

Too many coeds merely exist from one week end to another. Parties, picture shows, fine clothes and dates are the only topics they can discuss with any Culture." degree of enthusiasm. Anything of deeper meaning and significance is boring and is dismissed with a meaningless shrug of their shoulders.

They cannot afford the time to hear a noted convocation lecturer because it would detract considerably from the time they have allotted to " caking." In addition, the lecturer is probably talking on education, the defects of our social system or some other similar subject which interests them not in

Of course, the same indictment may be made against a very large percentage of men students. They make a better pretense, hypocritical though it may sometimes be, of considering some of the higher values of life.

There are no elections for the general student body to be concerned with for a month and a half. It's about time to pick another representative coed for Miss Nebraska, Miss University or Miss Appre-hension.

Literature."
Marburg. "In the Hills."
Millay, "Poems."

You can tell spring is here because the wails and blasts from the school of music are much louder now that the open-window season has begun.

Absence makes the marks grow rounder.

# The Student Pulse +
