PRICE FIVE CENTS.

ENGINEERS PLAN OUTDOOR COURSE DURING SUMMER

Sophomores Will Depart For Ashland Camp On June 7.

FACULTY IS IN CHARGE

Six Week Session Will Be Run by Director on Strict Schedule.

The sophomore engineers of Nebraska will entrain for engineering camp, located at the Nebraska National guard grounds about two miles northeast of Ashland, on June 7. The camp will be under the supervision of the officers of instruction in the department of civil engineering at the university.

The faculty officers in charge are Professors C. Mickey, Morris I. Evinger, Henry J. Kessler, Paul F. Keim and Daniel H. Hoover. The number of these men in residence at the camp will depend upon the number of students in attendance. A physician will also be placed on the staff for any emergencies which might arise.

Camp is in session for a period of six weeks. The students are required to report at Saturday noon on the day camp opens, field work starting the following Monday. The only break in the routine will be a three day recess starting the third of July and ending the sixth. However, students must receive camp leave from the camp director before this privilege is granted.

University Equipment.

The university provides the surveying equipment and instruments for the housing of the students, cots with bed sacks, pillows, and all necessary cooking utensils and dining equipment. Each student must provide his own necessary bedding and personal toilet articles such as towels, etc. They also provide one working suit for rough service, outing shirts and under clothing; one pair of heavy boots with hobnailed shoes and heels; drawing instruments, large protractor, T-square, triangles; logarithm tables, text and reference books; stationery and envelopes, drawing inks, pencils and erasers.

All work at the camp will be under the immediate supervision of the civil engineering faculty. The camp director is the head of all matters of instruction and administration. He also details the other members of the faculty to various duties and assignments.

Split Into Groups.

The students may group themselves in parties subject to the approval of the departmental staff. Whenever possible the members of these groups will be put in the same tents which are assigned the first day of camp. The individual duties of each party will be subdivided in order to carry on the different parts of the work more effectively, thus enabling the students to take charge of the various activities which the group decided to sponsor.

CAMPUS CALENDAR

Wednesday, May 21.
De Molay meeting, 8 o'clock.
Student council meeting, Temple.

Thursday, May 22.
Interfraternity council meeting, Morrill hall, room 9, at 7:15 o'clock.

Sunday, May 25.
Kappa Phi initiation, 3 to 5 p. m., St. Paul M. E. church. Attendance required.

AG COLLEGE Y.M.C.A. STAFF HAS MEETING

Members Meet With Hayes To Discuss Plans of Coming Term.

CHOOSE NEW DELEGATE

Members of the college of agriculture Y. M. C. A. were guests at the home of Secretary C. D. Hayes for Saturday afternoon and evening, at which time plans for activities were adopted for the following year.

During the afternoon Harold Colvin, executive secretary of the Rocky Mountain district, discussed with the group the campus hindrances to Y. M. C. A. work and methods of procedure. A two hour recess was taken from 6 to 8 o'clock. An oyster supper was served and entertainment was supplied from the group, consisting of accordion and harmonica music.

Rev. Ervine Engles of the Vine Congregational church told of his experiences while attending Grinnell college from 1912-16.

Milan Austin who was elected as field council representative in the March election is unable to attend the Estes convention from June 6-16. The club unanimously elected Jason Webster to this office. He will attend the convention this year with Glen Heady, secretary, and Claude Roe, who is graduating this year.

A cabinet will be selected soon to take charge of the various activities which the group decided to sponsor.

CONGREGATIONAL SORORITY TAKES IN THREE COEDS

Three university coeds were initiated into Sigma Eta Chi, Congregational sorority, at the initiation ritual which was held yesterday afternoon, in Vine Congregational church at Twenty-fifth and S streets.

Students Will Be Given Chance To Travel, Learn on Three Weeks Geography Tour Starting July 15

Students of the University of Nebraska will be given an opportunity to travel and learn this summer, according to a recent announcement of a geography tour, sponsored by the geology department and the extension division of the university. The tour is scheduled to begin July 15 and it is to continue for three weeks.

Those registering for the tour will receive three hours university credit. The trek is to be under the supervision of Leland Palmer, now with the geography department of Texas A. & M. He will teach a geography course at Nebraska during the first six weeks session of summer school, before beginning the tour.

The tour is to be made by bus and the class is limited to twenty-one students. The total cost of the trip is \$135. Fifteen dollars of this goes for the registration fee, while the rest is used to defray the expenses of the tour.

The first activities of the travel-study party will begin July 14, when the group assembles for preliminary instructions and preparations.

To Kearney First Day.

The first day of the trip, July 15, will take the party to Kearney, via Grand Island. Typographic and soil conditions will be the subject of research for the first day's work. The second day's jump will take the party to Ogallala. The itinerary for the next day will include visits to Kimball, through the Cheyenne plains, Pumpkin

MINIATURE CAMPUS IS ON VIEW IN MUSEUM

Thirty Cardboard Buildings Represent University Plan for Future.

TO TOTAL SIX BLOCKS

Housed in a glass show case in the basement of Morrill hall is to be found an orderly arrangement of some thirty-odd pasteboard houses separated by spotsches of green shrubbery. Here in a space about fourteen feet square are to be found the buildings of the University of Nebraska varying from two to four inches in height, done on a miniature scale.

In a much more vivid manner than could the painting of an artist, the architect presents an adequate view of the university campus as it will look when the proposed building plans are completed.

Beautiful Scenery.

Fairways, vistas and shrubbery break up the monotony of the buildings. A landscape artist could well profit by the tree-lined avenues, and the extensive scenery on which no buildings are to be found.

Ample space has been allowed for each building. As shown on the model, the campus will extend north from R to W street and will extend east from Tenth to Sixteenth street, covering a total of about six square blocks.

Construction north of Vine street is being planned. Directly north of the field house and forming the northern boundary of the campus is an isolated building. Here is shrouded in shrubbery lies the power plant. Directly north of the stadium and lying between the power plant and the stadium is a large tract of ground to be used for recreational purposes. Among other things, a practice football field and the tennis courts will be found here.

To the east of the field house are to be found two huge cardboard structures. An L-shaped building, which lies between the stadium and the coliseum, completes the northern extension.

Mall Divides.

The campus is divided from east to west into three parts by the mall which leads from Fourteenth street to the stadium, and by a wide avenue which leads from Twelfth street to the new university library at Fifteenth and S streets.

Besides numerous buildings which are added on this model, the absence of several buildings such as University hall and Nebraska hall is to be noted. Other buildings such as Bessey and Andrews hall are planned to be increased in size, according to F. G. Collins, assistant curator of the museum.

An addition is planned which will extend the campus from Fourteenth to Sixteenth street. Chief among the new structures planned is the new library which will face the capitol. Built after the style of the capitol itself with an imposing dome and extending almost twice as high as any of the other buildings, it will make an imposing structure.

The model has held its present position in the basement of Morrill hall for almost a year, having been placed there last fall. It was removed from the office of F. W. Seaton, operating superintendent, where it had been constructed.

Upperclass Commission Meets After Inactivity

The newly organized upperclassmen commission under the direction of Ruth Roberts, will hold an organization meeting Thursday afternoon at 5 o'clock in Ellen Smith hall.

The commission is open to all junior and senior women. Its purpose is to discuss matters of current interest in much the same manner as is done in freshman and sophomore commission. The commission has been re-established this year after a lapse of several years in which it was inactive.

MISS FAY WILL GIVE MAJOR ARTS RECITAL

Thirza Gwen Fay, dramatic art major, will read Sudermann's "Magda," Thursday evening at 7:30 in the Temple. Miss Fay's recital is one of a series of senior recitals that is being presented during the week, May 19-24.

The public is invited to attend the performance, and continental drama students are expressly urged to come, according to sponsors of the series.

Cold Weather Is Usual This in May, Says Blair

"This is characteristic of the month of May, but people fail to remember the rain and cold of May in previous years," said T. A. Blair, state meteorologist. "May is a cold wet month."

May in 1924 was the coldest on record with a mean temperature of 55.7 degrees. Last year May was even colder. The month thus far this year, there are ten more days in this month however, and the month may live up to all expectations.

There was a total rainfall last year of 3.25 inches in May. Only a little more than two inches has fallen this year. A precipitation of 1.43 inches was recorded on the last day of May last year, however, so the month may not fall behind when all records have been completed.

Only eight rainy days have been noted this May while last year there were nine. In previous years there have been as many as fourteen.

GRAFT RAMPANT IN ELECTIONS ON ARMOUR CAMPUS

Students Control Voting At C. J. School; No Interference.

DRINKING NOT PROBLEM

Confined to Fraternities, Says Student Editor; Few Drunks.

BY THE OFFICE PEST.

"Graft to a great extent creeps into the elections held at the Armour Institute of Technology, Chicago, according to the editor of their paper in answer to the questionnaire sent out by the editor of The Nebraskan. Students control the elections with no faculty supervision of any kind.

Fraternity politics dominates. The student athletic board controls all athletics. There are non-fraternity, athletic fraternities and socially inclined fraternity factions at Armour and allegiance to factions are permanent while the issue involved in the elections are merely fictitious ones.

Eligibility requirements for school activities, publications work or athletics are "not very strict." There is no interference from authorities unless a student has very low grades. "There are no definite requirements as to eligibility," the editor declared. The semi-honor system is in vogue.

No Drinking Problem.

"Drinking is confined to fraternities but drinking is not a problem. The editor couldn't say as to whether or not the situation was worse now than it was before prohibition. A questionnaire has not been conducted on the Armour campus but from observations the editor thought "30 percent were total abstainers, 60 percent were occasional drinkers and 10 percent were regular drinkers." The sentiment of both the student body and the editor was in favor of modification to permit sale of light wines and beers.

The institute is non-coeducational. However, any dances held on the campus start at 9 o'clock and close at 1 a. m. There seems to be a close distinction between Greeks and non-Greeks and fraternities dominate the all-college parties as well as leading in sponsoring social affairs.

Rushing rules are very strict yet there is some "throat cutting." However, rushes may break dates promiscuously during rush week which is held the fifth week of the first semester. In order to be initiated a pledge must obey certain pledge rules and serve a pledge period as at Nebraska, of one semester.

Faculty Interference.

There is interference from the faculty in the student government and faculty members participate in all student affairs as advisors. In the publications there is "only advisory supervision, but in some cases censorship." There is a censor for the humor column of the paper but the editor is responsible "only to advisor in certain cases."

The outstanding tradition at the Armour Institute of Technology is (Continued on Page 4.)

GRADUATES VISIT ENGINEERS' COLLEGE

Recent visitors at the college of engineering during the past week include Clifford H. Rees, '26, who will be soon transferred from the Pacific Telephone & Telegraph at Oakland, Calif., to the Bell Laboratories, Inc., New York City; Frederic Campbell, '25, who is with the Westinghouse Electric and Manufacturing company at Minneapolis, Minn.; and Emerson M. Mead, '28, with the American Appraisal company at Minneapolis.

KOSMET KLUB LISTS NAMES OF INITIATES

Six Will Be Taken Into Dramatic Group on Friday, May 23.

WILL PICK ASSOCIATES

Kosmet Klub announced Tuesday afternoon that the following men would be initiated into the organization on Friday, May 23, 1930: Joe Alter, Alma, '32; Dick Devereaux, Omaha, '32; Edwin Faulkner, Lincoln, '32; Wally Frankfurt, West Point, '32; Lloyd Jeffries, Omaha, '32; Bill McGaffin, Polk, '32.

Alter is a member of Sigma Nu fraternity and also plays in the R. O. T. C. band, and is vice president of Gamma Lambda. Devereaux is an Alpha Tau Omega and was chairman of the Interfraternity banquet held recently. Edwin Faulkner is a member of Phi Kappa Psi. He has been active on the Cornhusker, is a Corn Cob, and a newly elected member of the Student Council.

Frankfurt is a member of Delta Upsilon fraternity and is a Corn Cob and a member of base ball team and worked on the Blue Print staff.

Lloyd Jeffries is also a Corn Cob and is affiliated with Alpha Sigma Phi. Bill McGaffin is a Sigma Nu and a Corn Cob. He is news editor on the Daily Nebraskan and is a member of the newly elected Student council. He is a member of Gamma Lambda and a member of the R. O. T. C. band. These men have all worked in various Kosmet Klub productions.

The Klub will meet this afternoon at 5 o'clock in the Klub rooms to elect associate and honorary members, also officers for next year. The present officers are Don Kelley, president; James Musgrave, business manager; Neal Bailey, secretary.

MISS CORBIN GIVES TALK AT AG VESPERS SERVICE

Members of the university Y. W. C. A. held a special vespers service in the home economics parlors on Tuesday evening, Miss M. F. Corbin gave an address on "Home Economics Leaders."

FIFTEEN NEBRASKANS WILL GO TO MEETING

Annual Conference of Y. M., Y. W. To Be Held in Estes Park.

Fifteen delegates will represent the University of Nebraska at the annual Regional Student conference of the Y. M. C. A. and Y. W. C. A. to be held at Estes Park from June 6 to 16. This conference will include delegates from all organizations in the Rocky mountain region which includes Nebraska, Colorado, Wyoming, Kansas and Utah.

A list of noted speakers has been provided to address the group of delegates and it is planned to discuss questions vital to the welfare of the student associations. Among the Nebraska delegates who will attend the conference is Wendell Groth, chairman of both the Regional and National Student councils, of the M. C. A.

Delegates from the Ag college include Ted Menke, Claude Roe, Glenn Heady, and Jason H. Webster. From the city campus Harold Dahms, Jack Epeneter, George Gant, Wendell Groth, William E. Kaplan, Leonard R. Nelson, Meredith K. Nelson, Arthur A. Nemechek, Willard Spence, Coburn Tomson and C. D. Hayes will attend the conference.

Schramm Praises Work of Burnett In Campus Beautification; Suggests Thick Evergreens, Curving Drives

"As far as campus beauty is concerned Nebraska ranks near the bottom of the list," stated Professor E. F. Schramm of the geology department in an interview with the Daily Nebraskan yesterday afternoon.

Questioned concerning the plans of campus beautification at Nebraska, Mr. Schramm remarked that the present plan was in the hands of Chancellor E. A. Burnett and the board of regents. As soon as financial aid can be secured a mall will be created between Andrews hall and Teachers college, extending from Fourteenth street to Twelfth street. It is uncertain as to how soon this development can be completed, he said, but we are all hoping to see it take place as soon as possible.

"We all like to see our campus as beautiful as possible," said Professor Schramm. "but it is pretty hard to make much progress within the city limits and near the business section." "My idea," he continued, "is to plant great numbers of evergreens because they are beautiful both in winter and in summer. If one does not believe that evergreens are the most beautiful of all trees for such purposes he needs but to see the Morison park at Nebraska City which is studded promiscuously with these trees. They are not only beautiful but they are also long-lived."

Needs More Walks.

According to Schramm, we need more walks, especially between

Social Sciences and Andrews and Morrill halls.

Most schools also have an advantage over Nebraska in that they have much more land and can have long drives through the campus under spreading boughs and along shaded lanes.

While we cannot have any such elaborations we should have a few drives even though they be short ones. In Mr. Schramm's opinion it would be practical to have a drive through the southwest portion of the campus past Nebraska hall, University hall and off toward the library and law college.

"As far as buildings are concerned, especially in size and equipment Nebraska is far ahead of many other state universities," averred Professor Schramm. "But Ames, Oklahoma, Kansas and Missouri are all ahead of us in the line of campus beauty, although Chancellor Burnett is now pushing his new plan and is doing everything he can to bring local campus beauty to a par with that of universities in neighboring states."

Mr. Schramm thinks the idea of pillars is excellent. They are fine (Continued on Page 2.)

BURNETT REPLIES TO PAMPHLET BY FORMER TEACHER

Charges of Administrative Tyranny Are Made by Anton Jensen.

ACCUSATIONS REFUTED

Alexander Case Cited and Reasons for Jensen's Leaving Given.

Giving a complete account of the famous Alexander case and listing the reasons which he believes are the cause of Anton Jensen's present attitude toward the University of Nebraska, Chancellor E. A. Burnett yesterday declared there was nothing to the pamphlet that Jensen distributed yesterday. He indicated that the pamphlet, which contained dire accusations against the university and the administration was nothing but a farce. This is the first reply that has been made to the statement since its appearance late Thursday evening.

"I have been here as chancellor only a little over three years in temporary and official capacities and do not care to discuss anything further back than the beginning of my term. That is not an indication, however, that anything was not above board before that."

Faculty loyal.

"But as to the present, I do not believe the faculty is disloyal or disaffected in any way. And I have been assured by many that the university is making good progress."

Chancellor Burnett stated that he had given considerable consideration to a statement on the subject and that was why a reply had not been given the circular at an earlier date. He emphasized that, in his opinion, a newspaper controversy would not contribute anything to the situation and that that was not the object of his statement. He merely wanted to clear up the statements which have been circulated and might have a bad impression on those who had not heard the right side of the affair.

Jensen, in his pamphlet, insisted that faculty members have been "driven out because of a variety of causes not related to salaries." He also declared that "for any faculty member to protest to the administration is only to court slanderous ruination."

Answers Charges.

Chancellor Burnett answered these accusations first by describing the causes, in his opinion, of Jensen's attitude toward the university. These are, first, the great disappointment which Jensen felt when Dr. H. B. Alexander, chairman of the philosophy department, left a few years ago and was not permitted to work out his ideas in regard to reorganization of the arts and science college.

Second, Jensen was dismissed from the university after seven or eight years service in the romance language department, not because of a tenure of office rule, according to the chancellor, but because (Continued on Page 4.)

RAG BANQUET IS SET FOR THURSDAY NIGHT

65 Invitations Mailed to Contributors; Expected to Spread Scandal.

WILL BE 'DOGGY AFFAIR'

Members of The Daily Nebraskan staff will hold their annual Rag banquet at the Lincoln Hotel at 6 o'clock tomorrow evening. Invitations to the event have been sent to approximately sixty-five persons who have contributed regularly to the paper for the past year.

The affair is, according to the invitation, "a doggy affair—nearly exclusive" since admission is only by invitation, and even the moneyed few are barred unless they have the requirement expressed above; and to the invited ones, the banquet is free!

In past years, and the precedent will be adhered to, much of the evening is spent in wise-cracking between the combatants, noted for their witticisms. In accordance with the custom, the "Ragger" scandal sheet of the year will be presented at the banquet.

Libel! Scandal!

According to Frances Holyoke, who with Elmer Skov is collaborating in the production of the "Ragger," it will contain all the unprintable material that finds origin in the Nebraskan office. Mr. Skov refused to express himself on the matter, but subtly breeds mischief!

Adelle Eisler is in charge of the invitations; Marshall Fitzer is responsible for the menu. Everyone is responsible for having "good clean fun, just like a steady school picnic," according to the invitations.

Prof. and Mrs. Gayle C. Walker, Prof. and Mrs. J. E. Lawrence, Prof. J. E. Crawford, and Mr. and Mrs. Lawrence Lick, all associated with the faculty of the school of journalism, will be guests at the affair.

Here is a bird's eye view of the campus of the University of Nebraska as it will look after plans for its beautification have been completed and all new buildings and operations contemplated have been carried out. It will extend from Tenth to Sixteenth streets, and from R street to spacious drill and athletic fields north of the coliseum and stadium. The proposed new library building, the largest and most costly unit in the plan, will occupy a commanding position at the head of Fifteenth street. One when opened and beautified, Two malls, or park like avenues, are integral parts of the plan. One is now open running from the stadium to Fourteenth street, south of the coliseum. The second will run parallel to this, occupying what is now the drill field, between Andrews hall and Teachers college. Twelfth street will then be closed.
