LINCOLN, NEBRASKA.

BAILEY WILL SPEAK TO STUDENTS ABOUT SECONDARY SCHOOLS

Headmaster From Liverpool
Arranges to Give Series
Of Talks Here.

Daily Meetings Are Planned
So All Nebraskans
May Attend

Brought to the university under the auspices of the department of secondary education in teachers college, Charles W. Bailey, headmaster of Holt secondary school, Liverpool, Eng., will deliver a series of addresses on the campus Monday, Tuesday and Wednesday of next week.

Mr. Bailey is an internationally known figure in the field of secondary education. In addition to being principal of the Holt secondary school at Liverpool, he is associate editor of Independent Education, an educational magazine, a member of the English association, the Classical association, the Incorporated Association of Head Masters, and the National Union of Teachers in England. Prior to his connections with the Holt school, he was connected with the University of Liverpool.

In making a nation-wide tour of the United States this summer, Mr. Bailey already has spoken at the following state universities: Tennessee, Missouri, Kansas, Oregon and Washington. On leaving here he will speak at Miami university, Northwestern, Indiana, Illinois, Harvard, Cornell and Pennsylvania.

A full program of entertainment for Mr. Bailey and his wife, who is accompanying him, is being planned by the department of secondary education. Prof. H. C. Koch is in charge. No general convocation will be held, but Mr. Bailey will speak every day in Social Sciences auditorium. All summer students are invited. Students who plan to teach in high schools and high school teachers now in summer school are expected to attend the daily lectures in Social Sciences if classes do not conflict.

KAPPA PHIS BACK FROM CONVENTION

Nebraska Delegation of 19
Girls Is Largest at
National Council.

Nineteen members of Kappa Phi, Methodist girls sorority, have returned from their biennial convention at Montreat, North Carolina. The Nebraska delegation was the largest of any colleges or universities represented at the council.

Official delegates from Nebraska were: Mrs. W. C. Fawell, sponsor; Margaret Wiener, active delegate; Louise Snapp, alumnae delegate. Others who attended were: Doreen Bailey, Hazel Beecher, Marjorie Foreman, Gladys Johnson, Ruby Watters, Mary Huerman, Mainda Keller, Eva Cooper, Elinor Cooper, Ruth Cooper, Maude Double, Dorothy Yuetter, Margaret Cunningham, Gertrude Ebers, Lena Peso and Miss Luvicy Hill.

Drill Field Space Not For Students;

Professors Only

Only professors will be allowed to park their cars on the south end of the drill field, according to Officer Regler, campus policeman, who has received summer instructions to the effect from L. F. Seaton, operating superintendent.

Those who do not have permits to park their cars there will be tagged in the future, he said. Some who already have been tagged have been excused because of ignorance of the restrictions.

Cars must park in a single line facing south, Regler says.

DR. CUTSHALL WILL PREACH SUNDAY AT ST. PAUL'S CHURCH

Dr. E. Guy Cutshall, president of the Iliff school of theology at Denver, who was brought to the University of Nebraska for a series of lectures on "Religion in Modern Life" last winter, Sunday will preach at St. Paul's Methodist church on "Heart of Wisdom."

His sermon will be directed at students and educators. He will point out the strong and weak points in the present educational system as he sees them.

"One of the greatest problems," he says, "is educating educators." Dr. Cutshall's lecture series last winter was under the auspices of the university who brought him here on recommendation of the University Federation of Church Workers.

Stag Picnic at Seward Draws Crowd of 150

One hundred and fifty men from the university summer session went to Seward Wednesday afternoon to attend the All-Men's Stag picnic, which the committee decided to establish as an annual summer school event.

Expenses of transportation and food were met and a small surplus remaining was turned over to Prof. E. W. Lantz to invest into sports equipment for next year. Such picnics have been held from time to time in years past but never have been on an annual basis.

The caravan which left Teachers college at 4 o'clock rolled into Seward forty-five minutes later. Three baseball games were played and a number of men went swimming before the picnic supper. Following the supper the six baseball teams played a short tournament while other men were playing volleyball.

"There were no spectators. Everyone was playing," Mr. Lantz declared.

At dusk the crowd gathered around the picnic tables and spent a half hour singing under the direction of Glenn Case and O. H. Bimson of the Lincoln schools. They returned to Lincoln about 10 o'clock.

The attendance of 150 at the picnic was fifty more than had been expected by the committee. Transportation and food were provided for all, however, Professor Lantz said.

The picnic was in charge of Lowell C. DeVoe, superintendent of schools at Geneva. Professor Lantz was faculty adviser. Others who served on committees were: W. R. Colson, E. L. Flory, E. Bize, J. N. Reigler, M. Bell, G. W. Roselius, Conrad Jacobsen, R. B. Carey, O. H. Bimson and Glenn Case.

HEINRICH WALTER EXPECTS TO STUDY NEBRASKA DROUGHT

To study native plants of this region under conditions of summer drought, Dr. Heinrich Walter, plant ecologist of Heidelberg university, Germany, will return to Lincoln within the next few days, according to word received by Prof. J. E. Weaver of the botany department.

Dr. Walter is now at Alpine laboratory at Pike's peak where he is studying Rocky mountain plant life. He spent three weeks here last spring when plants in this section of the country had plenty of moisture.

KAPPA PHIS PLAN PICNIC FOR TODAY

All active and alumnae members of Kappa Phi, Methodist girls sorority, will picnic Friday evening at Van Dorn park, Tenth and Van Dorn streets, Lincoln. The park is accessible by bus or street car. Each girl is to bring one dish and her own silver. They will discuss the national convention at Montreat, N. C., which nineteen girls of the Nebraska chapter attended last month.

The efficiency cup, offered by the national organization and awarded to the Nebraska chapter the past two years was given to the University of Pittsburgh chapter.

STUDENTS HAMPERED BY SCHOOL SYSTEM

Hedrick Stresses Need of
Rigorous Training Here
In America

Concluding his two-day visit to the Nebraska campus, Dr. Earle R. Hedrick discussed "Training of Secondary School Teachers in Europe" at a general convocation in the Temple Wednesday morning.

Dr. Hedrick, who was introduced by Prof. W. C. Brenke, is chairman of the department of mathematics at the University of California at Los Angeles. He spent Tuesday and Wednesday giving a series of lectures to classes in secondary education and mathematics.

In urging a consideration of the more rigorous European educational methods in training teachers, Dr. Hedrick asserted, "The waste of natural resources in America today is not comparable to the waste of brains of the American youth. It is an indictment against us that only one out of every ten university students really uses his brain."

Superior Student Suffers. Pointing out that the better students should be allowed to work unhampered toward the top the speaker declared, "We have not looked beneath the principle that all men are created equal. There has been too much of the leveling process."

"The man with brains has been placed on a basis with mediocrity. In our country we must find those people with superior ability and give them opportunity to become leaders of the United States in education and other things."

Training of teachers, especially in Germany, Dr. Hedrick said, is (Continued on Page 3.)

Students Will Inspect Gooch's Plant Monday

Gooch's mill and bakery will be visited and inspected by summer students taking the department of geography's eighth vacation tour next Monday afternoon. Those desiring to go should sign in Teachers college or at the department of geography office by Saturday noon, according to Dr. Floy Hurlburt who will be in charge of the trip.

The excursion will leave Teachers college at 3 o'clock Monday afternoon. Buses will be chartered. The mill with its enormous grain vaults, sifting, cleaning, grading and milling processes, and the bakery with its complete equipment of electrical machinery, will be inspected. Students will see how the various Gooch byproducts are made and also will learn how the large plant is organized.

Saturday the department of geography is sponsoring a tour of the Blue river valley. Buses will leave the former museum at 8 o'clock in the morning.

Rotifers Perish In Heat; Whitney Improvises 'Sun'

A number of heat prostrations were reported Wednesday by Dr. David D. Whitney, professor of zoology.

Many of his rotifers, i. e., minute and usually microscopic but man-celled aquatic animals, with which he has conducted extensive experiments, perished as a result of the intense heat of the early part of the week.

A number survived, however, and are being cared for in a tank which is cooled both externally and internally by running water.

Dr. Whitney is very solicitous of the welfare of his rotifers. He even manufactures sunshine in order that they may get the best food. The Fourth of July he improvised an electric sun by using a 200 watt light bulb cooled by running water. This "sun" is allowed to shine on water plants grown in tumblers which surround it. It is working satisfactorily and the plants are thriving.

The electric sunshine enables Dr. Whitney to supply his rotifers' menu without leaving his office in Bessey hall.

PLANT ECOLOGIST ENCIRCLING GLOBE STOPS IN LINCOLN

On the last lap of his trip around the world to gather material to write a plant geography, Dr. Otto Stocker of Bremerhaven, Germany, stopped in Lincoln for three days the first of the week. As the guest of Dr. J. E. Weaver of the department of botany, Dr. Stocker took a number of field trips in his company to learn of prairie vegetation, the salt flats, and conditions where prairies meet forests along rivers and streams.

Dr. Stocker sails from New York July 17 for Hamburg and home. He has visited the African deserts, India, eastern Asia, Arizona, California and Colorado on his 'round-the-world' trip.

Dr. Linn Shows Muskegon Folk Ways to Save

A saving to the taxpayers of Muskegon, Mich., of more than \$100,000 in his one year of service is the unique record of Dr. Henry H. Linn, who received his M. Sc. in education from the University of Nebraska in 1922.

Dr. Linn, who spent the first part of the week on the campus speaking to education classes in teachers college on business administration in the public schools, obtained his Doctor's degree from Columbia university in 1929. Before that time he was superintendent of schools at West Point, Neb.

At Muskegon, Dr. Linn is assistant superintendent of schools in charge of business administration. He not only supervises purchasing, repairing and the building program of the Muskegon schools but also conducts numerous research projects to effect savings.

Believing the school coal bill to be excessive, he had the corps of fifteen trained how to take care of the boilers. Investigating insurance policies he found that nothing had ever been deducted for depreciation on school buildings and secured a large refund from insurance companies. Finding light rates too high, he secured a substantial reduction by threatening to put in a school power plant.

The importance of efficient business management of schools conducted in relation to the school curriculum is often neglected, Mr. Linn believes. It is very necessary to co-operate with the superintendent. The business manager, he said, should not be a watchdog to check the expenditures of the superintendent but must work with him and regard the work in terms of the school program.

MUSEUM WORKERS BUSY ARTICULATING AN OLD SKELETON

The skeleton of a titanotheres, prehistoric animal of the Nebraska prairies, is being articulated in Morrill hall by Henry Reider, assisted by Frank Bell and John Lamar. The skeleton will be placed in a showcase in the west corridor. The background, painted by Elizabeth Dolan, is of the toadstool flats in northwestern Nebraska. In the bluffs behind the flats the fossil remains of a number of titanotheres have been found.

BIZAD GRADUATES REVISIT CAMPUS

Recent visitors at the college of business administration include: L. H. Redelfs, '20, now commercial supervisor of the Northwestern Bell Telephone Co., Fargo, N. D.

R. B. Aldrich, '23, manager of the Kresge store at Birmingham, Mich.

C. O. Davis, '26, assistant merchandising manager of the Kresge stores, connections with the Chicago district office.

J. Maurice Hannaford, '26, assistant manager of the J. C. Penney store at Compton, Calif.

A. J. Cox, '25, now attending summer school, next year will head the commercial department at the Racine, Wis., high school. He has been teaching in the Sioux City high school the last few years.

LUDLAM ORCHESTRA IS CHOSEN TO PLAY FOR MIXER TONIGHT

Games Start at 8:30, Dance
At 9:30; Admission to
Be 10 Cents.

Better Floor, More Space,
Good Ventilation at
Party Promised.

Ludlam and his Music Makers will furnish music for the dancing program at the All-Summer School mixer in the women's gymnasium tonight. Announcement that Ludlam's orchestra had been secured for the dance was made Thursday by Prof. E. W. Lantz, chairman of the faculty committee in charge of the mixer.

The program of dancing, according to Professor Lantz, will last from 9:30 to 11:30 o'clock. An entertainment consisting of stunts and group games will begin promptly at 8:30 o'clock. Miss Frances Ash, Herbert D. Gish, and Miss Marjorie Easterbrook will be in charge of the games. Prof. A. R. Congdon will direct the dance.

To defray the expense of hiring the orchestra an admission charge of 10 cents will be made. Professor Lantz said. At the mixer a week ago Friday the 350 students in attendance voted unanimously to contribute some such small sum for an orchestra.

Every effort to have the gymnasium ventilated as completely as possible will be made. Large windows on both the north and south sides of the building, usually kept closed, will be opened to permit free circulation of air. Both parts of the gymnasium will be opened to avoid congestion and crowding in the front part of the building.

The dancing floor for the Friday mixer will be considerably better than for the last party, Professor Lantz declared. The floor will be waxed thoroughly in both the east and west rooms of the gymnasium.

Men especially are urged to attend the mixer, Professor Lantz said. Because there are so many more women than men in summer school he pointed out that it would be necessary to have a large representation of college men to balance the crowd.

GOLF TOURNAMENT DEADLINE SATURDAY

No Qualifying Cards Turned
In Yet by Faculty Men;
Prizes Offered.

Faculty men are urged by Hal Bowers and Herb Gish to turn in qualifying score cards at once for the faculty golf tournament. They should be submitted at the office of Prof. R. D. Moritz, director of the summer session. Though the tournament deadline has been set for Saturday noon, no men on the faculty had turned in cards early Thursday.

The tournament proper is scheduled to begin July 15 on the Antelope course. Cards for qualifying rounds are solicited in order to fix handicaps. The average score of the best three rounds played by entrants between June 24 and July 12 is to be used to determine the handicap for each player.

A number of prizes consisting of golf balls and other sports equipment have been offered both for the qualifying rounds and for the tournament.

Museum Gets Wood From Mummy Case Interred 1400 B. C.

The museum has been given a strip of wood from the center of an ancient Egyptian mummy case by Mrs. L. P. Hartley, 1424 D street, Lincoln. The mummy case from which it came presumably was that of Seti I of the nineteenth Egyptian dynasty, 1400 B. C.

The wood is enameled in many colors and shows the lotus and papyrus motif in its external design. It will be placed with the museum mummy collection in the basement of Morrill hall.
