### Nice Start.

Nebraska won a football game Saturday but that is not the only significant thing about the Cornhuskers' activities with Texas A. and M. The student body gave representatives of the southern school a real reception. And they appreciated it.

Some individuals praise football as an advertising medium for colleges and universities. If games were won without the support of students, however, the victorious gridiron men would not cause the school's name to be praised. Hospitality, courtesy, fairness ex-tended to visitors will brand any school as worthy of recognition, despite the final score

Those who attended the Friday afternoon reception for Texan must realize the value of such a display of spirit. The southerners were not greeted like foes, to be hated and massacred, but like friends. That spirit should be encouraged, for when any school engages in athletic games simply for the thrill of victory it sacrifices its claim to sportsmanship.

At the rally Friday evening, students applauded Nebraskans and Texans with equal enthusiasm. They did not growl at Aggie representatives, but cheered them and wished them luck-though not success.

The rallies of other days, during which fighting collegians howled their derision of opponents and threatened them with everything from manslaughter to disgrace, are gone. The absence of a swimming pool at Nebrasks has been a sore spot for several years. Past editors have commented on it-students are always puzzled at the university's failure to provide facilities for this sport.

## 'Among My Souvenirs.'

If one is to be a dyed-in-the-wool collegian, it seems that he must engage in a four year souvenir hunt, preying upon food shops, trains, hotels, drug stores and sign boards. This deplorable practice is not limited to college students; high school students, who are ties with spirit.

Youth apparently has a misguided idea of smartness and a well subjugated idea of honesty. Taking another's property is stealing, whether the loot is to be sold, traded, or eades. If a thing that has existed only two nailed on the wall of a room. The fault is not entirely with those gallant, fearless moderns like to discuss the meaning of the word with who stick glass ash trays under their coats, the Rag Man in person. The law college has but also with their less daring companions who admise this practice.

Colleges of today are suffering from a too apparent lack of honesty among their students.

Cribbing has become a popular trick in classroom; political corruption on any college cam-

"There are shop-lifters," the indulgent elders may reply, "and there are collegians." What, if we may ask, is the difference?

Some brilliant college men de not limit their practices to souvenir snitching. They pick up whatever comes within reasonable reach of their eager hands. It is not klepto mania. Stealing is the word.

Nebraska is helping the unemployment situation by having hundreds of people give things away before football games. Now the university has to bire men to pick papers up off the campus.

#### Supporting What?

TO THE EDITOR

Big time athletic contests are necessary, according to the department in charge, so that enough income may be assured to enable provision of facilities that students in general may enjoy. In other words, the football gate pays for the intramural program, the tennis courts, handball courts, coliseum facilities in general.

This is a very nice theory. It is working football battles while both were dijust well enough to prove that it could be a very practicable theory. So far, however, most of this income seems to go "back in the

## Raising Canes.

Evidently the members of the law college are again called upon to answer insidious and slanderous remarks made by unwitting or unknowing reporters or what-not from your august publication. Misled both as to the facts and as to the ultimate effect, the Rag Man attempted to poke fun at the law students by stating that the only claims of the laws to distinction had vanished.
