SOCIETY K

Four Greek letter groups have scheduled formals for the coming week end. On Friday evening Delta Gamma and Sigma Alpha Iota will be hostesses, while Delta Delta Delta and Gamma Phi Beta have reserved Saturday evening for their formal affairs. During the week a number of informal lunchcons and dinners will be staged. Perhaps the most outstanding of these is that to be given Wednesday noon at the Annex to honor Kirby Page, editor of The World Tomorrow.

College Club to Play

For Delta Gamma Formal. Four hundred invitations have been issued for the Delta Gamma formal which is scheduled for Friday evening at the Cornhusker ho-tel. The College Club orchestra will play for the dance which Mr. and Mrs. O. Stepanek, Miss Pauline Gellatly, Mrs. H. Chauncey Smith and Mrs. Bertha Fenn, house mother, are chaperoning.

Delta Gamma Alumnae Entertains Actives.

Alumnae members of Delta Gamma entertained the active chapter at a buffet luncheon Saturday noon at the chapter house. Fall flowers decorated the tables Mrs. Edson Burgett, Mrs. Nelia Quick, Miss Blanche Garten and Miss Fanchon Hooper, assisted by the alumnae chapter, were presiding hostesses at the affair which eighty-five attended. The alumnae held a short business session after the luncheon.

Sigma Gamma Epsilon Elects New Officers.

Twenty-two members of the Nebraska chapetr of Sigma Gamma
Epsilon, national geological fraternity, held their first meeting of
the new year Saturday evening in the chapter room. Plans were dis-Lowe, will address the group on the armory.

Certified oat seed planted by ten farmers on 218 acres gave an average yield of 40.2 bushels pre recent history and development, acre, compared with an average and more important still that he acres on seven farms, which had been planted to common seed.

fact that very little registered international politics. wheat is grown and new varieties The improved wheat seed had been planted in ninetyfive acres, and the common in ninety acres.

The threshermen found the in-

very interesting and valuable as striking evidence of the fundamental fact that "it pays to plant pure seed.

SIGMA XI TO HEAR ANTHROPOLOGY TALK (Continued from Page 1.)

Nebraska, Dr. Strong declares, is a little touched field rich in material for anthropological research. He has found two types of archaeological remains, one relating to plains Indians still here and a second to pre-historic cultures, remains of which have not yet been

excavated. The work of the archaeological survey last year in this state shows promise of revealing noteworthy scientific results as well as considerable material remains, Dr. Strong says. He will illus-trate his talk with lantern slides showing the survey at work last summer.

At a short business meeting af-

BOTANY DEPARTMENT GETS 10,000 PLANTS

Collections of Late Rev-J. M. Bates to Be Displayed Soon.

Through the department of bot-any the university has acquired a large collection of Nebraska plants gathered by the late Rev. J. M. Bates of Red Cloud. The collection, which includes more than 10,000 specimens of Nebraska flora, was made by the Rev. Mr. Bates during his pastorates throughout Nebraska since frontier days.

Adding the Bates collection to the state herberium, there are now 40,000 specimens available for This collection is but a small part of the complete university collection of 400,000 specimens, illustrative of the plant life in all civilized countries of the The Bates specimens were brought from Red Cloud by Dr. T. J. Fitzpatrick during the holidays and will be mounted and displayed in Bessey hall soon.

Book Reviews

NEW EMPIRES, by Karl A. Bickel. J. P. Lippincott and Co.

In "New Empires," a scant hundred-page volume, Karl Bickel, president of the United Press associations, makes some concise generably larger yields were obtained eralizations with respect to the American press. He contrasts its functions with those of the press of fifty and seventy-five years ago, pointing out the rapid expansion Grande county extension agent, to of its interests, the decline of its the Colorado Agricultural college dominating influence in political and social affairs, and its growth as an advertising medium—all consequent upon the development

While he comments upon the present lack of opportunity for personal distinction in the newspaper field comparable to that of showed that seventeen farmers Greeley, Medill, Pulitzer, and othwho had planted certified or clean ers, he does give etiucational advice barley seed on a total of 419 acres to students in journalism. The obtained yields averaging 53.8 value of cultural education he minimizes, although he points out the journalist should understand the larger play of current economic, political, and social forces, their of 28.9 bushels from eighty-five should recognize the significance of current events in relation to those forces. Manifestly rather Wheat showed a difference of difficult in view of some of the two bushels per acre in favor of doubtful precictions Mr. Bickel clean seed, probably due to the chooses to make when discussing

A large part of the book is given have not been introduced, it is over to a discussion of the uncerstated. The wheat yields were tain relations between the newspa-compared on approximately equal per and the radio in their conflicting fields of news reporting and advertising. Mr. Bickel foresees a possible struggle, though he is not at all antagonistic toward radio as it is now managed. He is inclined formation they had secured to be to expect, however, an eventual very interesting and valuable as amaignmation of the newspaper and radio industries.

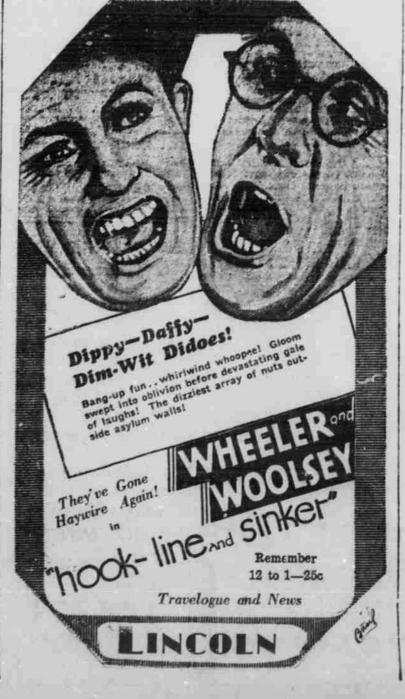

> The Lives of a Beogal Lancer, ing Press. \$2.75.

> Ever since the publication of "Mother India" five years ago, a wide section of the western world which had hitherto been little interested in India has been alert for books about that incredibly mysterious land. Major Yeats-Brown's "The Lives of a Bengal Lancer" is

BUCK'S COFFEE SHOP (FORMERLY DAVIS)

without doubt the best of all the popular books which have appeared. If it were nothing more than a collection of true stories of the author's strange adventures the book would yet be among the most fascinating of its kind. Ex-citing tales of the bold, dangerous sport of pig sticking, the pursuit of wild boars, of cobra charming, ambush by rebellious mountain clans, air observation behind the Turkish thes during the war, life in Turkish prison camps, visits to the quarters of the seductive nautch girls, and of fast polo matches—all skillfully told—make

the book interesting as entertain-Intriguing as they are, these stories serve but to beguile the reader to listen to what obviously lies near the author's heart, his approach to the inevitable mysticism of the Hindus. The philosophy, or rather the practices, of the Yogi interested Major Yeats-Brown throughout the twenty-odd years of his interrupted Indian any attempt to proselyte, but with a sympathy which betrays the extent to which he is moved and convinced by what he saw.

On one occasion he sat on a river bank looking across toward the Taj Mahal, talking to a young asthetic, the pupil of a famous guru, when the body of a young girl floated past among funeral wreaths. "The Jumna was carrying down the white flowers and the yellow flowers that are the daily tribute of India to her gods goddesses. Amongst these flowers rose an arm as if waving a goodbye. It sank under the even waters, without sound or ripple. but the turtles had seen it and making tracks like the periscopes of submarines. A big white turtle reached the body first, and raised its obscene idiot's head, with a ribbon of flesh in its mouth, snapping and gobbling. Others arrived. Soon there was a red foaming and scuffling where the body of a girl

"I turned away, but Sivanand did not flinch. 'All this,' he said, 'is indeed God.'"

When one remembers that he writes as an English soldier with a first class European education, Major Yeats-Brown's sensitiveness and his strange emotion and intellectual reactions become considerable and our curiosity about India leaps on to questions which his restraint, underestimating our credulity, forbade him to raise.

Registration in the university increased in 1901, much to the surprise of officials who feared the attendance would be cut down because of a crop failure and a new incidental fee of three dollars.
